24,702.—A. S. Philips, of Boston, Mass., (assignor to himself and Isaac Adams), of South Boston, Mass., for an Improved Hawse Pipe, for Ships:

I claim a tubular cable g ide curved substantially as described.

24,703.—Peter Plater (assignor to himself and J. S. Fleming) of Moore's Hill, Ind., for an Improvement in Corn Planters:

I claim the arrangement of the shield, T, hammer, G, sliding feed bar, I, lever, O, crank shaft, K, and spring, H, the whole being constructed for operation, conjointly, as and for the purpose set forth.

24,704.—John I, Rollow (assignor to Chas. C. Wellford), of Fredericksburgh, Va., for an Improvement in Threshing Machines.

I claim the combination of the inclined carrier, H, with the shoot, I, and curved screen, J, the whole being constructed, arranged and operated in the manner and for the purposes set forth.

24,705.-Wm. Spink (assignor to Oliver A. Washburn, Jr.), of Providence, R. I., foran Improved Machine for Pointing Nails and Spikes:

I claim the combination of the bunter, G, the pointer, F, and the spring, I, with each other, and with the back piece and other parts of the reed machine, or with the corresponding parts of any other nail machines, constructed and operated substantially in the manner as set forth.

24,706.—Geo. C. Wheeler, of Graysville, Ga., assignor to himselfand Geo. Calvert, of Upperville, Va., for an Improved Machine for Washing and Amalgamating Gold:

I claim, first, The relative arrangement for united operation of the hopper, I, horizontally revolving vertical tubes, H H H, horizontally revolving rakes, G G', G'', and stationary washing vessels, B C, substantially as and for the purpose described.

Second, Making the receiver or washing vessel into two parts, B C, and combining with the part, C, an adjusting device, D, a a, substantially as and for the purpose described.

24,707.—W. W. W. Wood and Henry Howson, (assignor to John Rice,) of Philadelphia, Pa., for an Improved Device for Operating the Cut-off Valve of Steam-

engines:

We limit our claim to causing the positive power of the engine to operate the throttle valve, by the employment of two vibrating, redprocating or rotating strikers, actuated by any positive movement of the engine, in combination with two inclined planes intervening between the said strikers, and the valve or appliances connected therewith, any governor being so connected to the strikers or to the inclined planes, that the movement of the governor caused by any norcase or diminution in the speed of the engine, shall change the position of the inclined planes in respect to the strikers in respect to the inclined planes, and that the latter may thereby be the intermediate means of regulating the extent of the opening of the valve to suit the speed of the engine while the actual movement of the valve is effected through one or the other of the strikers by the power of the engine itself, as set forth.

RE-ISSUES.

752.—Albert Fuller, of Cincinnati, O., for an Improved Faucet. Patented Oct. 16, 1855:

I claim the elastic plug valve attached to a stem, when operated by an eccentric, or its equivalent, substantially as set forth for the purposes described.

I also claim the elastic plug valve, constructed as described, in combination with the cup-shaped cap to prevent the cup from spreading, substantially as described.

753.—James Powell, of Cincinnati, Ohio, for an Improvement in Faucets. Patented March 22, 1859: I laim the described arrangement of the cam, F, flanges, J and , longitudinal slot, i, and spurs, K, combined and operating in the lanner and for the purposes set forth.

ADDITIONAL IMPROVEMENT. -Hubbard Beebe, of New Haven, Conn., for Mode of Preparing and Mounting Slates. Patented March

I claim the combination of leather, or cloth, or felt, (or felting) ustead of, or in addition to, india-rubber and g tta-percha, so far as beauty, and economy, and desirableness in use may require, with the metallic band or rim around the edge of the slate, as patented March 29, 1859.

18, 1859.

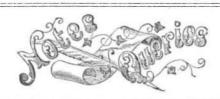

I also claim, as my improvement, the combination of leather and cloth with my metallic rim, or with a waterproof cement of such strength and stiffness as will warrant, to some extent, the disue of said metallic rim, especially in mounting slates in portfolio form or forms, as set forth in the specification and accompanying drawings.

EXTENSION.

Isaac T. Grant, of Shagticoke, N. Y., for an Improvement in Fan Mills. Patented July 10, 1845.

I claim the manner in which I have arranged the screen F, and the chess-board, H, and combined them with the screens ordinarily used so as to obtain two distinct currents of wind, and to subject the falling rain to the stronger currents below the screen and chess-board thereby blowing off the heavier portions of foreign matter, whilst the chaff is blown off by the ordinary currents in the upper compartment of the shoe.

- James Greer and Rufus J. King, of Dayton, Ohio, for Design for Cooking Stoves.
- -James Greer and Rufus J. King, of Dayton, Ohio, for Design for Sides and Doors of Cooking-Stoves:
- 1,114.—Henry Hebbard, of New York City, for Design for Spoon and Fork Handles.
- 1,115.—Wm. W. Wilson, of Pittsburg, Pa., for Design for Sundials.
- 1,116.—James Bogle, of West Newton, Mass., assignor to himself and Daniel Bogle, of Dover, N. H., for Design for Floor Oilcloth:
- 1,117.—James Bogle, of West Newton, Mass., assignor to himself and Daniel Bogle, of Dover, N. H., for Design for Floor Oilcloth.
- 1.118.—Garrettson Smith and Henry Brown, (assignor to J. G. Abbott and A. Lawrence), of Philadelphia, Pa., for Design for Stoves.
- 1,119.—Wm. W. Stevens, of Westbrook, Maine, assignor to N. P. Richardson & Co., of Portland, Maine, for Design for Fire Frames.
- 1,120, 1,121, 1,122, and 1,123—E. J. Ney, of Lowell, Mass., assignor to the Lowell Manufacturing Com-pany, for Design for a Carpet Pattern. (Four Cases.)

- H. G. F., of Va.-We shall be happy to insert an engraving of your invention in the Seinnife America American if you will send us your model and Letters Patent, and are willing to incur the expense of the cut, which will not exceed \$15. It is only good and we have once used them; they can be sent to you by express with the model and Letters Patent. You must be your own judge as to the model and Letters Fractic. It is most be your own judge as to the benefit you will derive from having your invention illustrated on these very liberal terms, and while our chief object is to interest our readers, we are willing you should have, gratuitously, the benefit of the circulation of our journal, which is regularly seen by at least 75,000 persons every week. The charge for the engraving (\$15) is merely its cost to us, and while you get an equivalent for your money in the engraving itself, you also have the benefit of a circulation which, taken with the cost of the white paper and the printing so large an edition as we publish, would cost you hundre sof dollars in any other journal but our own.
- C. E. N., of Maine.—The lacquer used for brasswork is made by coloring lac-varnish either with turmeric or gumboge. You can obtain these coloring materials at any druggist's store.
- C. E. B., of Ala.—The method of propelling vessels by forcing out a stream of water at the stern through a tube by mea of a steam-engine is quite old, and was proposed and tried by Rum sey, the cotemporary of John Fitch.
- L. B. A., of Wis.-You can only replace the quicksilver rubbed off from the back of your looking-glass, by an amalgam of the same material; as a partial substitute, put on a piece of tin-foil.
- D. P., of Ark.-An injunction can be obtained by proper process of law against a Cherokee Indian or any other person within the jurisdiction of the United States Supreme Court, because patents are held, not under local, but United States law.
- J. S. H., of Wis.-You can prepare mink and muskrat skins with the fur on, for wearing, by tanning them with weak li-quors of sumac or blackberry stems. They should be dried in the shade, and stretched with tacks on boards while drying. You can also tan them by passing them through a solution of soap-suds, and afterwards through a strong alum liquor. Rub the skin with aromatic oil on the flesh side after it is dry.
- G. S. K., of Fla.-In admitting the water to the center-vent wheel, you should not carry it down in a straight trunk and conduct it from thence at right angles in a flume to the wheel because you lose much of the effect due to the direct pressure. The trunk should be angled from the top of the penstock, and should have no sharp corners. Your arrangement of the wheel and flume is not good.
- O. H., Jr., of Cal.-In a windmill it requires 40 square feet of sail surface moving at the velocity of 12 feet per second, with a pressure of 12 flbs on the square foot to be one horse power. The wind must act on the whole 40 feet continually to give out this amount of power. There is no power in such a mill independent of the pressure on the sails; consequently, the power varies with the ocity of the wind.
- J. H. W., of La.-A round cistern, 12 feet in diameter and 12 feet in depth, will contain 1.357 feet of water. A four sided cistern, 16 feet in length, and 16 feet in width, and 22 feet in depth, will contain 5,632 cubic feet of the same element.
- N. P., of N. Y .- If you will give us some further ination regarding the method by which you keep the battery ac tive for telegraphing through a long circuit, we will publish it with the letter you recently sent us.

 S. A. C., of N. C.—The Oswego phenomenon proved
- to be a humbug got up by an enterprising hotel-keeper for the pur pose of raising the wind.
- C. R. B., of C. W.-Some of our steamboats have run at the rate of 28 miles in one hour. If you were to enter a tight chamber filled with air ten feet high at the surface of the earth, the pressurewould be 15 lbs. on the squareinen. There is a work published on ballooning, by Mr. J. Wise, the famous American aerial
- J. O. G., of Mo.—The cheapest mode of heating water. without a regular heater, before it enters a boiler, is to use tubular grate-bars and force the water through them. Cold water may be safely fe into a steam boiler; it should enter at the back end. A suction tube eight inches in immeter will answer for force pump of five inches diameter each.
- C. E. S., of Iowa.—The Great Eastern will be propelled by quadruple engines, the aggregate power of which, it is stated will be about 6,000 horses.
- J. C. B., of L. I.—Bone can be stained a deep black by boiling it in a strong solution of logwood and a little copperas. After it is dry, rub an ethereal solution of asphaltum over its surface, and it will become smooth and glossy.
- J. W., of Miss.—If a piece of paper, coal, or wood be burned, there exists no less matter than before; all that has taken place is a change of arrangement or combination of atoms.
- M. S., of Ala.-With the assistance of a microscope, the of gold may be seen divided into fifty millions of distinc
- J. P. B., of Mo.-One hundred yards of the raw silk of the silkworm does not weigh a grain; and it has to be doubled and twisted many times to form a fine thread for domestic use. Still finer are the fragile threads of the spider, which, proceeding from 4,000 holes in the little animal, are all twined together to form one slight beautiful gossamer line.
- R. M., of Ind .- The invention of the long pendulum was claimed by a London artist named Richard Harris, who applied it to a clock in 1611, which is seventeen years before the time that Galileo directed one to be made.

Money Received

At the Scientific American Office on account of Patent

Office business, for the week ending Saturday, July 9, 1859:—
R. D., of N. H., \$55; D. & C., of Conn., \$25; W. J. K., of Ga., \$20; C: C. B., of Ohio, \$10; P. & S., of La., \$30; T. C., of Mass., \$30; P. M. H., of Pa., \$30; J. M., of Ill., \$10; S. M. C., of Mass., \$275; J. W., of N. Y., \$30; I. M., of N. Y., \$10; J. F. S., of Pa., \$35; L. K., of N. Y., \$30; F. J. P., of Tenn., \$30; H. C., of Ga., \$25; L. M., of Wis., \$25; A. L. E., of N. E. D. of La. (2 cases); H. T., of N. J.; W. A. of Ill; J. D. of N. Y.

Rates of Advertising.

Thirty cents per line for each and every insertion, payable in advance. To enable all to understand how to calculate the amount they must send when they wish advertisements published, we will explain that ten words average one line. Engravings will not be admitted into our advertising columns; and, as heretofore, the publishers reserve to themselves the right to reject any advertisement sent for

IMPORTANT TO INVENTORS.

IMPORTANT TO INVENTORS.

A MERICAN AND FOREIGN PATENT SOLICIATIONS,—Messrs, MUNN & CO., Proprietors of the Scientific Areers, continue to precure Patents for Inventors in the United States and all fereign countries on the most liberal terms. Our experience is of thirteen years' standing, and our facilities are uncaualed by any other Agency in the world. The long experience we have had in preparing Specifications and Drawings has rendered us perfectly conversant with the mode of doing business at the United States Patent Office, and with most of the inventions which have been patented. Information concerning the patentability of inventions is freely given, without charge, on sending a model or drawing and description to this office.

Consultation may be had with the firm, between NINE and FOUR COLOCK, daily, at their PRINCIPAL OFFICE, No. 37 PARK Row, NEW YORK. We have also established a Brancia Office in the City of WASHINGTON, on the corner of F AND SEVENTILIBEETS, opposite the United States Patent Office. This office is under the general superintendence of one of the firm, and is in daily communication with the Principal Office to all such cases as may require it. Inventors and others who may visit Washington, having business at the Patent Office. This office is under the general superintendence of one of the firm, and is in daily communication with the Principal Office to all such cases as may require it. Inventors and others who may visit Washington, having business at the Patent Office at Nos. 66 Chancery Lane, London; of Patents in the various European country experience, For the transaction of this business we have Offices at Nos. 66 Chancery Lane, London; of Patents in the various European country experience, provided through our Agency.

Inventors will do well to bear in mind that the English law does

Patents secured to American citizens are procated enloyed of Agency.

Inventors will do well to bear in mind that the English law does not limit the issue of Patents to Inventors. Any one can take out Patent there.

A pampllet of information concerning the proper course to be pursed in obtaining Patents through our Agency, the requirements of the Patent Office, &c., may be had gratis upon application at the Principal Office or either of the Branches. We also furnish a Circular of information about Foreign Patents.

The annexed letters from the last two Commissioners of Patents ecommend to the perusal of all persons interested in obtaining

we commend to the perusal of all persons interested in obtaining Fatents:

Messrs. Munn & Co.:—I take pleasure in stating that while I held the office of Commissioner of Fatents, more financement of Eatents, more financement of Eatents of E

WOODWORTH PLANING MACHINES, AT prices very much reduced, for sale at No. 135 North Third-street, Philadelphia, Pa. CHAS. H. SMITH.

SLIDE LATHES! DRILLS! SLOTTING MA-chines! Bolt-Cutting Machines! Universal Chucks! &c., at No. 135 North Third-street, Philadelphia, Pa. . H. SMITH. 3 4*

60-HORSE STEAM-ENGINE, AT A GREAT BARGAIN !-Also, Engines, Boilers, &c., at low prices, for sale by CHAS. H. SMITH, Ne. 135 North Third-street, Philadelphia.

PATTERNS FOR BRASS, MALLEABLE AND Cast Iron, by J. MURRAY, No. 220 Center-street, near Grand, New York.

1000 YOUNG MEN OF SMALL MEANS CAN make over 100 per cent. in my ink business, and other matters described in a circular sent free on receipt of a return stamp. Extraordinary inducements offered. Pr. M. J. COOK, No. 59 Grand-street, New York.

O GASMAKERS.—THE SUBSCRIBER, INVENtor and Patentee of a new method of purifying gas by means of water alone, an improvement, the utility and simplicity of which, with the great saving in expense, recommends itself to all gasmakers, and must be adopted by all as the only proper way to purify gas, is now ready to negotiate for individual, town, city, county, or Stater ights for the use of his patent. Address AURELIUS DICKINSON, Cl aremont, N. H. FARMERS, READ THIS.—"THE FARMERS'

OWN PAPER"—THE GENESEE FARMER. a

Monthly Journal of Agriculture and Horfieduture. Translisted in

1831.—Published for twenty-eight years in one of the finest wheat
and first sections of America; it has attained an unrivaled circulation,
and has able and experienced correspondents in every State of the
Union and in the British Provinces. Each volume contains three hundred and eighty-four pages, and is prefusely illustrated with expensive
weedcuts. It is sent to any address for Fifty Cents a Year! In order to introduce the Farmer into districts where it has few readers,
we will take subscriptions to the coming half-volume (July to December inclusive) at the following rates:—Single subscribers, 25 cents:
five copies for 31, and a copy of our beautiful 25-cent book, the "Rural
Annual and Horticultural Directory," prepaid by mail, to the person
getting up the club; Eight copies for \$1.50, and a "Rural Annual,"
repaid by mail, to the person getting up the club; sixteen copies for
\$3, and a "Rural Annual" and an extra copy of the Farmer for
year, or two for the half-volume, to the person getting up the club,
uncement to form clubs. Full particulars will be found in the paper,
and everyone interested in the culture of the sails invited to send
for a copy, and, if pleased with the paper, to act as ugert. Specimen
copies sent free te all applicants. Address JOSEPH HARKIS, Publisher and Proprieter, Rechester, N. Y.

AMERICAN RALWAY TIMES—ESTABLISHBed in 1849.—Devoted to the Construction, Operation, Management and Finances of Railways; Machinery, Civil and Mechanical Engineering, Railway Law, Iron Manufacture, Mevements of
Lupital, Wandy and Stock Market, &c., &c. It likewise contains a
very full United States Railway Share and Bend List, corrected
every weck, showing the miles open, capital stock, funded debt, cost,
receipts and net earnings, dividend, and the latest current prices or
stocks and bonds of mest of the Railways in the country. The extensive circulation of the RAILWAY TIMES among Railway Superintendents, Frusidents, Directors, Stockholders, Master Mechanics,
Car and Track Masters, Contractors, Locumotive and Car Builders,
Machinists, Civil, Mechanical and Locomotive Engineers, Manufacturers, Supply Agents, Bankers, Carituitists, Brokers, and others
throughout the country, renders it an unequaled medium fer Advertising. JOHN A. HAVEN, Editor and Proprietor.
Subscription price, \$3 per annum. [147] Boston, Mass.

THE AUBIN VILIAGE GAS WORKS WERE erected last year by gas companies in several States and in Canada. The success attending these works has already led to the erection of one city and one village work this season, has secured three village works for immediate erection, and so nearly secured five more that they may be reliaded on before August next. For reference apply

WANTED—TWO HAND-PRESSES FOR PRES-SING BRICKS—The bricks, made of concrete stuff, are intended in mud machines in the usual way, and the hand-presses are intended to press the bricks as seen as the stuff begins to set. Com-munications will be received by R. NEISCH, No. 508 Fourth-street. New York.

NORVELL'S CHOKING STRAP FOR BRIDLES AND HALTERS.—The most perfectinvention ever made to subdue and make gentle all wild, vicious or runaway horses, mules and colts. It has never failed to perform a perfect cure in any instance. Rights for sale. Descriptive circulars sent gratis. Apply to R. B. NORVELL, Patentee, Huntsville, Ala.

PLANING AND MOLDING MILL FOR SALE IN BOSTON.—Now doing a good business. Engine 30 horse power, with all kinds of first quality machinery for a custom business. The proprietor has been eight years in the business and ill health compels him to retire. The whole, including land and building, will be sold at a great bargain on easy terms, or a silent interest retained. For particulars address L. DAGGETT, Planing and Melding Mill, Boston, Mass.

INSTRUMENTS. — CATALOGUE CONTAINING
250 illustrations of Mathematical, Optical and Philesephical Instruments, with attachment of a large sheet representing the Swiss instruments in their actual size and shape, will be delivered, on application, to all parts of the United States, by sending 12 cents in C. E. AMSLER,
No. 635 Chestnut-street, Philadelphia.

185 Catalogue of Stereescopic Pictures is furnished gratis on application.
1 4eow*

MERCHANTS DEALING IN HARDWARE, Planished and Britannia Ware, Pressed and Japanica Tinware, &c., are requested to communicate with a cash customer, giving a catalogue, prices and terms. Address box 1,842, Post-office, Detroit, Mich.

MARINE RAILWAY.—WANTED, A COMPE-tent man, who is able to invest a few hundred dellars in a Marine Railway, and take the entire charge of the same. The works are nearly completed, and are situated in a flourishing city in Flori-da; this is s-favorable opportunity for a ship-carpenter wishing to engage in the business, as there would be plenty of business in the way of repairing and building vessels. For particulars in regard to leaction and prospects, inquire of J. HOLMES, No. 58 Wall-street, New York.

ACHINERY.—S. C. HIJ.I.S. NO. 12 PLATT—streets, New York, deader in Steam-engines, Bollers, Planers, Lathes, Clarks, Driks, Famps; Mortising, Tenoning and Sash Machines, Wasdwards and Dariel's Planers, Placks Penches, Presses and Sheare; Cob and Com Mille; Harrison's Grist Mille; Johnson's Shingle Mills; Belting, Oil, &c. 2 cdw

COBURN'S EXTRA OIL—FOR MACHINERY and burning; warranted first-rate (never gums, will burn in might tamps, &c.); has given a trisflection for ten years, during which we have said it.

LD DOMINION" COFFEE AND TEA-POTS. English and French Patents for Sale.—The undersigned having secured Letters Patent in England and France on the "Old Dominion" C ffee and Tea-p ts, offer for sale the entire right of manufacture in those countries. These patents were obtained through Messrs. Munn & Co., of New York, and are in all respects right. The opportunity here presented for the establishment in England and France of a new manufacture is a rare one, and certain tyield a large return to any enterprising capitalist. The intrinsic excellence of the article, its extensive sale in this country, and its aimest worldwide popularity, give to the patents in England and France a real value, and ensure a quick introduction, a rapid demand and a large sale. Duplicates of dies, presses, &c., used in the manufacture of the "Old Dominion" Coffee and Tea-pots, will be furnished the purchases of the patents if desired, at a small advance beyond cost, and all required information be given as to the production and sale. The English and French unterties will be sold together or separate as may be desired. Address AltClutte. BURNHAM & GLEROY, Nox 117.

Fredericksburg, Va., joint owners of the English and French patents on the "Old Dominion" Coffee and Tea-pots.

UCIUS W. POND, MANUFACTURER OF SU-perior Flaning-machines for Iron, Engine Lathes and Machinists Tools generally. Address L. W. POND, Worcester, Mass. 2 16t*

RONPLANERS, ENGINE LATHES, AND OTHER Machinists Teels, ef superier quality, on hand and finishing, and for sale lew; also Harrison's Grain Mills. Fer descriptive circular, address New Haven Manufacturing Ce., New Haven, Conn. 2 13

NEW PROCESS.—PHOTOGRAPHIC ART APplied to Wood Engraving (Price's patent), by which the original—either portrait, landscape, machinery, or picture illustration of either is photographed directly on the block of wood without the aid of handwawing, thereby avaluating an accurate perspective and a perfect representation. This proces is beautifully adapted for magnifying or diminishing the originals in perfect perspective. Tinted envelopes designed and engraved.

2 3t* WATERS & TILTON, No. 50 Fulton-street, New York.

CHRONOMETERS, FINE WATCHES, NAUTI-CAL AND ASTRONOMICAL INSTRUMENTS, &c.—D. EGGERT & SON, No. 239 Fearl-street, New York, offer on favorable terms first-class Marine, Siderial and Pocket Chronometers; also, plain and finer quality of Watches, with new series train, so thoroughly adjusted as to be unaffected by sup change of temperature, exercise or position in the pocket; Astronomical Clocks, Transit Instruments, S andard and Self-Registering Thermometers, Barometers, &c.

THE UNDERSIGNED, WHO HAS A STORE London, is prepared to undertake agencies for the sale (by wholesale or retail) of novel American Agricultural, Demestic, and other machines and apparatus, and to, let room and steam power to proprietors of patent machinery who wish to set up machines in London (s show them in action previous to disposing of their patent rights in Europe. Business transacted in the Froncia and German languages. Reference—L. P. PORTER, Edg., New York Rubber Co., No. 45 Liberty-street, New York. WELBURN WILLIAMSON, 2 7*

No. 133High Hol orn, London, England.

SEVENTEENTH EXHIBITION OF THE OHIO
MECHANICS' INSTITUTE—For the Promotion of Industrial
Arts.—The Committee on Exhibition respectfully announce that the
17th Exhibition of the Institute will be opened in Pike's Opera
House, in the city of Cincinnati, on 'THURSDAY, SIFT. I, 1859,
and continue for three weeks. In behalf of the members of the Institute, the Committee certilally invite all Manufacturers, Mechanics,
