

THE PRACTICAL METAL-WORKER'S ASSISTANT.

NOW READY.—THE PRACTICAL METAL WORKER'S ASSISTANT; comprising Metallurgical Chemistry, and the Arts of Working all Metals and Alloys; Forging of Iron and Steel, Hardening and Tempering, Melting and Mixing, Casting and Founding, Works in Sheet Metal, the Processes dependent on the Ductility of the Metals; Soldering and the most Improved Processes, and Tools employed by Metal Workers, with the Application of the Art of Electro-Metallurgy to Manufacturing Processes. Collected from original sources, and from the works of Holtzapffel, Bergeron, Leupold, Plummer, Napier, and others. By Oliver Byrne. A new revised and improved edition, with additions by John Scofield, M.B., William Clay, William Fairbairn, F.R.S., and James Napier. With five hundred and ninety-two engravings, illustrating every branch of the subject. In one volume, 8vo. Price SIX DOLLARS. Sent by mail, free of postage, to any address.

The extensive and varied character of the matter in the book may be judged from the following, which only gives a portion of it:—

CONTENTS. CHAPTER I.—ON METALLURGICAL CHEMISTRY. The useful metals and metallic ores defined. History of metallurgy. Refining processes. Advantages of cast iron. Crystallizing tendency of wrought-iron in large masses. Classification of metals. Alloys. Affinity of metals. Theory of alloys. Metallic oxides. Reduction of metallic oxides. Carburetted hydrogen. Sulphides. Chlorides. Calcination and roasting. Carburets and carbons. Metallic salts. II.—SPECIAL METALLURGICAL OPERATIONS. Volatile combinations. Metallic distillation processes. Fluxes and fuming. Furnaces. The combustive junction. Products of combustion. Natural and artificial blasts. Blast machines. Catalan trompe. Chain blast. The Cagniardelle. III.—RECENTLY-PATENTED REFINING PROCESSES. Plant's, Martien's, and Clay's processes. Bessemer's process. Bessemer's converting vessel. Application of the tuyeres. Pouring out the fluid metal. Preparing the vessel. Process of conversion explained. Bessemer's squeezers. Bessemer's hammer and gauge. Analyses of Bessemer's iron and ordinary puddle-iron. Reductions on Bessemer's process. IV.—REFINING AND WORKING OF IRON. Iron-furnaces in the United States. Dickerson's method. Malleable iron. Puddling. Winslow's machine. Rollers or rolls. Varieties of iron. V.—MANUFACTURE OF STEEL. Cementation. Blistered steel. Sheer steel. Cast-steel. Qualities of steel. VI.—FORGING IRON AND STEEL. Fires. Blast. Furnaces, forges, and hearths. Ordinary practice of forging. VII.—ON WROUGHT-IRON IN LARGE MASSES. Forge tools. Limits of welding power. Auxiliary tools. Forge-hammers. Nasmyth's steam-hammer. Effects of Nasmyth's hammer. Materials for forging. Tendency of over-refined iron to deteriorate. Cast and wrought-iron for ordnance. Tensile strength of the monster gun. Material used in forging. Varieties of treatment required. Modes of working large forgings. Different modes of forging large iron masses. Forging the monster gun. Crystallization explained. Crystalline tendency of iron. Causes of fissures and their remedy. Danger of forgings in cooling. Report of the Franklin Institute on the "Princeton's" gun. Effects of hammer hardening. Importance of metallurgy to engineers.

VIII.—GENERAL EXAMPLES OF WELDING. Trip and tilt-hammers. IX.—HARDENING AND TEMPERING. General view. Hammer hardening. The quantity of carbon in cast-iron. Steel and glass-polarized. Practice of hardening and tempering steel. Examples of hardening and tempering steel. Razors, pen-knives, hatchets, adzes, cold chisels. Saws and springs. Jacob Perkins's discovery. Oldham's process.

X.—HARDENING CAST AND WROUGHT IRON. Chilled iron castings. Malleable iron castings. Case-hardening wrought and cast-iron.

XI.—ON THE APPLICATION OF IRON TO SHIP-BUILDING. Constructions of iron vessels for ocean traffic. Half cross section of a frigate. Ribs. Keels. Decks. Form of the deck-beams. Riveting of the plates. Single and double riveted joints. Wood and iron as materials for ship-building. Resistance to tension and compression in iron-ships. Practical tests of iron-ships. Durability. Economy. Effects of shot on iron-ships.

XII.—THE METALS AND ALLOYS MOST COMMONLY USED. Description of the physical character and uses of the metals and alloys. Antimony. Bismuth. Copper. Alloys of copper and zinc. Alloys of copper and tin. Alloys of copper and lead. Alloys of copper, zinc, tin, and lead. Gold alloys. Nickel. Palladium. Platinum. Rhodium. Silver. Silver alloys. Tin. Zinc. Babbitt's anti-friction metal. Fenton's anti-friction metal. Alloy of the standard measure used by government. Tug-ages. Expansion metal. Tables of the cohesive force of solid bodies. Tabular view of the properties of metals. Weights of wrought-iron, steel, copper, brass and plates.

XIII.—REMARKS ON THE CHARACTER OF THE METALS AND ALLOYS. Hardness, fracture, and color of alloys. Malleability and ductility of alloys. Strength of cohesion of alloys. Alloy-balance. Table for converting decimal proportions into divisions of the pound avoirdupois. Fusibility of alloys. M. Mallet's process for the protection of iron from oxidation. Palladiumizing process.

XIV.—MELTING AND MIXING THE METALS. The various furnaces, &c., for melting the metals. Antimony, copper, gold, and silver, and their alloys. The management of the furnace and mixing alloys. Britannia metal. Barron's furnace.

XV.—CASTING AND FOUNDING. Metallic, earthen, and complex molds. Metal molds for pewter works. Bearings for locomotive-engines. Type founding. Plaster of Paris molds and sand molds. Stereotype founding. Molding sand and flaska. Patterns, molds, and moulded simple objects. Foundry patterns. Cores of molds. Molding-cored worms. Core-boxes. False core and drawback. Reversing and figure-casting. Casting figures, ornaments, bronzes, and foliage. Guns and shot. Casting of gun metals and pot metal. Casting of brass and lead. Radiating pieces for patterns for iron-castings. Loam molding. Melting and pouring iron. New method of manufacturing drop shot.

XVI.—WORKS IN SHEET METAL MADE BY JOINING. On malleability, &c.—division of the subject. Terrestrial globes. Works in sheet metal made by cutting, bending, and joining. A hexagonal box. Polygonal figures. Prismatic vessels. Pyramids. Frustums of pyramids. Mixed polygonal figures. Radiating pieces for polygonal vases. Polygonal vases of unequal sides. Tools. Modes of bending curved work. Improved machine for rolling up sheet-metal pipe. Angle and surface joints. Francis's metallic life-boats.

XVII.—WORKS IN SHEET METAL MADE BY RAISING; AND THE FLATTENING OF THIN PLATES OF METAL. Circular works spun in the lathe. Works raised by the hammer. Solid and hollow blows. Raising and hollowing. Raising globes. Vases. Jelly molds. Stamping. Peculiarities in the tools and methods. Flattening thin plates of metals with the hammer.

XVIII.—PROCESSES DEPENDENT ON DUCTILITY. Drawing wires, metal tubes, &c. XIX.—SOLDERING. General remarks and tabular view. Tabular view of the process of soldering. Hard soldering. Soft soldering. Soldering per se, or burning together. Alloys and their melting heats. Fluxes. Modes of applying heat in soldering. The use of the blow-pipe. Examples of hard and soft soldering. Richemont's afro-hydrogen blow-pipe.

XX.—SHEARS. XXI.—PUNCHES. XXII.—DRILLS. XXIII.—SCREW-CUTTING TOOLS. Originating screw. Cutting internal screw with taps. The principle of chamfering. Transverse sections of taps. Die-stocks. Master-taps. Bolt-screwing machine. Shaping machine. Screws cut by hand in a common lathe. Cutting screws in lathes with traversing mandrels. Cutting screws in lathes with traversing tools. Healey's screw-cutting apparatus. System of change-wheels for screw-cutting. Screw-tools for angular threads. Screw-tools for square threads. Various modes of originating and improving screws. Fusee engine. Ramsden's screw-cutting engine. Clement's mode of originating the screw-guide. Chucking and reaming lathes. Engine-lathes. Screw-threads considered in respect to their proportions, forces and general characters. The measures and relative strengths of screw-threads. Sections derived from the angular thread and from square threads. Table for angular thread-screws. Table for small screws of fine angular threads. Approximate values of Holtzapffel's original screw-threads. Holtzapffel's original taps.

XXIV.—HISTORY OF THE ART OF ELECTRO-METALLURGY. XXV.—DESCRIPTION OF GALVANIC BATTERIES AND THEIR RESPECTIVE PECULIARITIES.

XXVII.—MISCELLANEOUS APPLICATIONS OF THE PROCESS OF COATING WITH COPPER.

XXVIII.—BRONZING. XXIX.—DEPOSITIONS OF METALS UPON ONE ANOTHER. XXX.—ELECTRO-PLATING. XXXI.—ELECTRO-GILDING.

XXXII.—RESULTS OF EXPERIMENTS ON THE DEPOSITION ON OTHER METALS AS COATINGS. XXXIII.—THEORETICAL OBSERVATIONS.

The above or any other of my Practical and Scientific Books sent free of postage at the publication price. My catalogue of Books, covering nearly every branch of Industry, sent free of postage to any one applying for it. Address HENRY CAREY BAIRD, Industrial Publisher, 406 Walnut street, Philadelphia.

THE BELLEVUE STEREOSCOPE, WITH SLIDING FOCUS and Field Piece, accommodating all eyes, recently noticed in the SCIENTIFIC AMERICAN, is mailed, prepaid, for \$3, or with 25 Assorted views, \$6, by HENRY CRAIG, 335 Broadway, New York.

A VALUABLE WORK FOR INVENTORS PATENTEES AND MANUFACTURERS.

The publishers of the SCIENTIFIC AMERICAN have just prepared with much care, a pamphlet of information about Patents and the Patent Laws, which ought to be in the hands of every inventor and patentee, and also of manufacturers who use patented inventions. The character of this useful work will be better understood after reading the following synopsis of its contents:—

The complete Patent Law Amendment Act of 1861—Practical Instructions to Inventors, how to obtain Letters Patent, also about Models—Designs—Caveats—Trade-marks—Assignments—Revenue Tax—Extensions—Interferences—Infringements—Appeals—Rescission of Defective Patents—Validity of Patents—Abandonment of Inventions—Best Mode of Introducing them—Importance of the Specification—Who are entitled to Patents—What will prevent the granting of a Patent—Patents in Canada and European Patents—Schedule of Patent Fees; also a variety of miscellaneous items on patent law questions.

It has been the design of the publishers to not only furnish, in convenient form for preservation, a synopsis of the PATENT LAW and PRACTICE, but to answer a great variety of questions which have been put to them from time to time during their practice of upwards of 30 years, which replies are not accessible in any other form. The publishers will promptly forward the pamphlet by mail, on receipt of six cents in postage stamps. Address MUNN & CO., Publishers of the SCIENTIFIC AMERICAN, No. 37 Park Row, New York.

JUST WHAT EVERYBODY WANTS.—OUR NEW

Pocket Album (for soldier and civilian), holding 16 pictures, is the cheapest and best of its kind ever offered to the public. Sent by mail to any address post-paid on receipt of seventy-five cents. It can be filled with pictures (16) and sent by mail to soldiers in the army, or friends anywhere in Uncle Sam's domains, at the very trifling sum of thirty cents postage. All orders promptly filled by SAMUEL BOWLES & CO., Photograph Album Manufacturers, Springfield, Mass.

BAIRD'S PATENT

INCORUSTATION PREVENTER, AND REMOVER, FOR STEAM BOILERS in either Salt or Fresh Water.—No invention connected with Steam Power combines so many advantages as this. THE ECONOMY IN FUEL, from its use, repays the cost of the preventive. Certificates from Engineers and owners of Steam Boilers, at sea and on shore, can be seen at the office of JAS. F. LEVIN, 23 Central Wharf, Boston, Mass.

STEAM ENGINES AND BOILERS OF EVERY DESCRIPTION: Shafting; Pulleys and Machinists' Tools, for Sale by C. GAY, 29 Doane street, Boston, Mass.

HEMP, FLAX AND JUTE PREPARING AND SPINNING Machinery, new and second-hand, all built on the most improved system. All kinds of Steel-pressed Wood Clothing and Leather Filleting—Hackles, Gills, and Gill Pins. Sole Agent for Grimston's Patent Self-acting Baling Machine. Also, the Excelsior Horner's Heckling Machine—producing more yield, with less labor, than any machine heretofore known. THOMAS JENNINGS, Machinery Merchant, Leeds, England.

TO WIRE DRAWERS.—I have patented and brought into practical operation, a Machine for Pointing Wire in the Coil for drawing, without the use of files or emery, and for pointing all kinds and sizes of wire where a perfect taper is required. C. JILLSON, Worcester, Mass.

PECK'S PATENT DROP PRESS FOR FORGING PURPOSES.—All sizes manufactured by MILO PECK & CO., New Haven, Conn.

JAMES HORNER & CO., MANUFACTURERS OF CAST Steel and Files. Orders solicited for all kinds, shapes and sizes. Office and Warehouse, 28 Cliff street, New York.

SELF-REGISTERING CALIPERS.—GIVING THE sizes without recourse to a rule. See engraving in SCIENTIFIC AMERICAN, of Aug. 8, 1863; 1 1/2-inch (pocket) size, at 75 cents; 2-inch size (with set screw attached to indicator), \$1.25. Now ready and will be delivered free of expense to purchasers on receipt of the price. A limited number of the 3-inch size are in process to supply demand only. Early orders will secure them. Larger sizes will be made if sufficient orders are received. Send for illustrated circulars. Liberal discount to the trade. Reliable agents wanted for all parts of the United States. KIMBALL & TALBOT, Worcester, Mass.

AMERICAN NEEDLE COMPANY, 442 BROADWAY, New York. J. W. Bartlett, Needle manufacturers for all the Sewing Machines. Needles Burnished and Needles. "We find Bartlett's Burnished Needles a wonderful improvement over others for sewing machine or hand sewing."—MME. DEMOREST.

SAVING OF FUEL TO PARTIES USING STEAM.—DAMPER REGULATORS. Guaranteed to effect a great saving in fuel and give the most perfect regularity of power. For sale by the subscribers, who have established their exclusive right to manufacture damper regulators, using diaphragms of flexible vessels of any kind. CLARK'S PATENT STEAM AND FIRE REGULATOR COMPANY, No. 5 Park Place, New York.

WM. CLEVELAND HICKS, CIVIL AND MECHANICAL Engineer, 480 Broadway, New York.

PORTABLE STEAM ENGINES OF ALL SIZES, ON hand and built to order. Send for description and our prices, and get the best, cheapest, and most economical Engine made. HOAG & HAMPSON, 95 Maiden Lane, N.Y.

GUN AND PISTOL SCREWS.—COMSTOCK, LYON & CO., Manufacturers (Office, 74 Beekman street, New York), are always prepared to furnish Gun and Pistol Screws to sample. Send to the U.S. Musket, Sewing Machine Screws, and Metal Screws generally, of the best quality, at short notice.

LES MESSIEURS LES INVENTEURS.—AVIS IMPORTANT. Les inventeurs non familiers avec la langue Anglaise, et qui préfèrent nous communiquer leurs inventions en Français, peuvent nous adresser dans leur langue natale. Envoyez nous un dessin et une description concise pour notre examen. Toutes communications seront reçues en confiance.

THE CHEAPEST MODE OF INTRODUCING INVENTIONS.

INVENTORS AND CONSTRUCTORS OF NEW AND useful Contrivances or Machines, of whatever kind, can have their inventions illustrated and described in the columns of the SCIENTIFIC AMERICAN on payment of a reasonable charge for the engraving.

No charge is made for the publication, and the cuts are furnished to the party for whom they are executed as soon as they have been used. We wish it understood, however, that no second-hand or poor engravings, such as patentees often get executed by inexperienced artists for printing circulars and handbills from, can be admitted into these pages. We also reserve the right to accept or reject such subjects as are presented for publication. And it is not our desire to receive orders for engraving and publishing any but good Inventions or Machines, and such as do not meet our approbation in this respect, we shall decline to publish.

For further particulars address—MUNN & CO., Publishers of the SCIENTIFIC AMERICAN, No. 37 Park Row, New York City.

OIL! OIL! For Railroads, Steamers, and for machinery and Burning. PEASE'S Improved Engine and Signal Oil, indorsed and recommended by the highest authority in the United States. This Oil possesses qualities vitally essential for lubricating and burning, and found in no other oil. It is offered to the public upon the most reliable, thorough and practical test. Our most skillful engineers and machinists pronounce it superior to and cheaper than any other, and the only oil that is in all cases reliable and will not gum. The "Scientific American," after several tests, pronounces it "superior to any other they have ever used for machinery." For sale only by the Inventor and Manufacturer, F. S. PEASE, No. 61 Main street, Buffalo, N.Y.

WHAT EVERY ONE OUGHT TO HAVE.—ONE OF Farr's Tool Chests, fitted with complete sets of tools, sharpened and set ready for use and packed in cases for shipping, suitable for mechanics, amateurs, farmers and boys. Prices from \$2 to \$35 each, and containing from 8 to 92 tools, according to size. To be obtained of all respectable hardware dealers or shipped on receipt of price by the manufacturer, GEORGE FARR, Buffalo, N.Y. Send for descriptive circular.

REYNOLD'S TURBINE WATER-WHEELS.—THESE celebrated water-saving and powerful wheels, now so extensively used on limited streams, are furnished and adapted to every head and supply of water, by TALLCOT & UNDERHILL, 170 Broadway, New York.

BISULPHIDE OF CARBON, CHEMICALLY PURE, for sale in quantities from one to fifty carboys. Address DU BOIS D. PARMELEE, Chemist, 22 East 41st street, New York.

PAGE'S PATENTED LIME KILN WILL BURN 300 bushels lime per day, with three cords wood or 1 1/2 iron coal, hard or soft. Address C. D. PAGE, Grand Rapids, Mich.

HOLSKE & KNEELAND, MODEL MAKERS, PATENT Office Models, Working Models, and Experimental Machinery, made to order at 100 Walker street, between Center and Elm, New York. Refer to Munn & Co., SCIENTIFIC AMERICAN Office.

FAN BLOWERS.—DIMPPEL'S, ALDEN'S, MCKEN ZIE'S and others, for Steamboats, Iron Works, Foundries, Smith Shops, Jewelers, &c., on hand for sale by LEACH BROTHERS, 86 Liberty street, New York.

VULCANIZED RUBBER.—Adapted to mechanical purposes.—MACHINE BELTING, STEAM PACKING, VALVES, HOSE, EMERY VULCANITE WHEELS, &c., &c. Directions, prices, &c., can be obtained on application to the NEW YORK BELTING AND PACKING COMPANY, Nos. 37 and 38 Park Row, New York.

PORTABLE STEAM ENGINES.—COMBINING THE maximum of efficiency, durability and economy with the minimum of weight and price. They are widely and favorably known, more than 200 being in use. All warranted satisfactory or no sale. A large stock on hand ready for immediate application. For descriptive circulars sent on application. Address J. C. HOADLEY, Lawrence, Mass.

GUILD & GARRISON'S CELEBRATED STEAM Pumps.—Adapted to every variety of pumping. The principal styles are the Direct Action Excelsior Steam Pump, the improved Balance Wheel Pump, Duplex Vacuum and Steam Pumps, and the Water P. opeller, an entirely new invention for pumping large quantities at a light lift. For sale at Nos. 55 and 57 First street, Williamsburgh, and No. 74 Beekman street, New York.

WHEELER & WILSON'S HIGHEST PREMIUM SEWING MACHINES and Foot's Patent Umbrella Stands, 505 Broadway, New York.

IRON PLANERS, ENGINE LATHES, DRILLS AND other machinists' tools, of superior quality, on hand and finishing constantly on hand for sale by LEACH BROTHERS, 86 Liberty street, New York.

BOLTS, NUTS AND WASHERS OF ALL SIZES constantly on hand for sale by LEACH BROTHERS, 86 Liberty street, New York.

Zur Beachtung für deutsche Erfinder. Die Unterzeichneten haben eine Anstalt, die Erfindern das Verhalten anzeigt, um sich ihre Patente zu sichern, herauszugeben, und veranlassen solche gratis an dieselben. Erfinder, welche nicht mit der englischen Sprache bekannt sind, können ihre Mittheilungen in der deutschen Sprache machen. Skizzen von Erfindungen mit kurzen, deutlich geschriebenen Beschreibungen beliebe man zu adressiren an Munn & Co., 37 Park Row, New York. Auf der Office wird deutsch gesprochen. Die Patent-Gesetze der Vereinigten Staaten. Nach den Regeln und der Geschäftsunterordnung der Patent Office und Anweisungen für den Erfinder, um sich Patente zu sichern, in den Ver. St. sowohl als in Europa. Ferner Auszüge aus den Patent-Gesetzen fremder Länder und darauf bezügliche Nachrichten; ebenfalls müssen Blätter für Erfinder und solche, welche Patente zu erlangen.
