

RECENTLY PATENTED INVENTIONS. Pertaining to Apparel.

CLOTHES-HANGER.—H. K. SMITH, Union S. C. The invention provides a hanger which can be used for hanging up suits, jackets, etc., and which will dispense with the ordinary hooks in connection with the body or main bar of the hanger.

Of General Interest.

MOLD AND MEANS FOR MAKING THE SAME.—E. A. CONNER, Tacoma, Wash. The mold is more especially designed for use in making concrete columns such as are used in buildings and other structures to permit of its being conveniently and quickly built up and each part accurately placed in position and firmly secured one to the other, and parts of the mold being readily removable after the column is built.

FIREPROOF WALL.—W. DRYDEN, New York, N. Y. The invention relates to fireproof construction, and the object is to produce a wall which will resist the passage of flame through it. It concerns itself not only with the construction of the wall itself, but also with the blocks out of which the wall is constructed.

COLLAPSIBLE PACKING-BOX.—M. T. LYNCH, JR., New York, N. Y. The aim in this instance is to provide a packing box, more especially designed to take the place of expensive wooden packing boxes, and which is durable in construction, capable of standing hard usage in shipping and the like, and at the same time fully protecting the contents of the box.

Machines and Mechanical Devices.

CLOCK COMBINED WITH COIN-FEED WINDING-UP APPARATUS.—A. G. P. WINN-GAARD, Romersgade 3, Copenhagen, Denmark. The present invention pertains to a clock in which a clock combined with a winding up mechanism is provided with a stop device arranged in the clock, which device when in the normal position prevents the clock from being wound up. This device is released by means of a coin introduced into the clock through a coin chute.

CHANGEABLE-SPEED GEARING.—W. MORROW, Fremont, Neb. The gearing is such as used in connection with motor cycles or any other types of machinery where it is desirable to increase or decrease the speed rapidly while the machine is in motion. One object of the invention is to provide a changeable speed belt driver which may be adjusted while the machine is in motion.

MICROMETER-GAGE.—L. MASTRANGEL, New York, N. Y. The invention provides a standard serving as a support for a laterally-extending arm, and at the end of the arm an indicating mechanism is provided whereby the distance between the end of a movable member at the end of the arm and the base for the standard may be read on a suitable dial carried by the arm.

APPARATUS FOR FEEDING FLOUR IRON ORE TO BLAST-FURNACES.—E. L. HARPER, JR., Big Stone Gap, Va. This invention refers to improvements in the apparatus for use in feeding of flour iron ore, that is, ore in an extremely fine state of subdivision, to blast furnaces, in such a manner that it will not be blown out immediately by the blast, but will become amalgamated with the molten mass in the bosh of the furnace.

DIPPING-MACHINE.—W. B. CROCKER, New York, N. Y. This invention relates to confectionery machines, and its purpose is to provide a machine, more especially designed for coating marshmallows held on biscuits or cakes with chocolate, icing, coconut or other coating material and without submerging the biscuits or cakes in the material.

BREAKAWAY-CLUTCH FOR ELEVATORS AND MINE-CAGES.—M. C. HUTCHINGS, Bozeman, Mont. The invention relates more particularly to self-detaching hooks such as are already known for use in the attachment of shaft cages or the like to the swing chains. An object is to provide a self-detaching hook which will automatically release the cable-hold when the elevator car or cage has been drawn too high, as, when the engine which operates the winding drum is beyond control.

Railways and Their Accessories.

RAILWAY-WHEEL MOUNTING.—J. H. BROWN, New York, N. Y. The purpose here is the minimizing of the friction incident to, and the power required in, rounding curves, and reducing lateral stress on rails tending to spread the gage. To this end the wheel is pivotally supported at one side to swing in a horizontal plane, which admits of the turning of the wheel, by the contact of the flange with the rail, in the direction of the track. This is preferably done by journaling the axle in a bearing-box at the outside of the wheel, having substantially vertical trunnions.

LIFTING DEVICE.—J. P. RENNEKER, Logansport, Ind. The invention relates to lathes for turning a pair of car or locomotive wheels mounted on an axle, and its object is to provide a device arranged to permit of conveniently lifting the wheels to bring the axle in

axial alignment with the lathe centers, for the latter to engage the axle and allow the same to be rotated for turning the wheels.

NOTE.—Copies of any of these patents will be furnished by Munn & Co. for ten cents each. Please state the name of the patentee, title of the invention, and date of this paper.

Kindly write queries on separate sheets when writing about other matters, such as patents, subscriptions, books, etc. This will facilitate answering your questions. Be sure and give full name and address on every sheet.

Full hints to correspondents were printed at the head of this column in the issue of March 13th or will be sent by mail on request.

(12055) E. E. B. asks: 1. Could a 24-volt storage battery in an automobile be replaced with 12 dry batteries of 2 volts each in case of emergency? A. A dry cell when fresh may have 1.4 volts. To replace a 24-volt storage battery will require as many dry cells as 1.4 is contained in 24 volts, or 17 dry cells. 2. Would the motor in SUPPLEMENT No. 641 run a bicycle if more cells of battery were used? A. The motor in SUPPLEMENT No. 641 is not adapted to be attached to a bicycle, nor has it power enough to drive a bicycle. 3. Please give me formula for bichromate battery, and also for chromic acid battery. A. For a bichromate of potash solution take water 1 gallon, sulphuric acid 1 quart, and potassium bichromate 1 pound. Pour the acid into the water slowly with constant stirring, and add the bichromate while hot. Use when cold. Bichromate of soda may be used in place of the potash salt; many think to better advantage. For a chromic acid solution take 6 quarts of water, 1 pint sulphuric acid, and 1.5 pounds chromic acid. Mix and use as above.

(12056) C. C. W. asks: Will you kindly answer and settle a very simple but confusing question? A horse running away attached to a four-wheeled wagon turns a corner sharply, and the wagon overturns. Which way does it tip over? That is, in or toward the corner or outward or away from the corner? It is not supposed that the wheels stick in striking an obstruction that overthrows the wagon or that it is overthrown by cramping the wheels so as to tip it over. In going around the corner, the corner being a curve, can the inside wheels get off the ground? Will not the outside wheels gradually rise from the ground until the wagon tips in or toward the corners? A. Under the conditions you mention, when the wheels lock against the side of the buggy, it must turn over toward the side upon which the wheels are locked, i. e., toward the corner it is turning. This is the only case in which a vehicle turning a corner too sharply overturns inward; in an automobile, for instance, turning a right-hand corner, the right-hand wheels leave the ground first and it turns over onto its left side from its momentum tendency to go straight on. The causes are different in the case of the buggy, the inner side being first retarded by the locking of the wheel.

(12057) C. B. B. asks: I have a problem to submit, the solution of which will confer a great favor upon the writer. There are two large public halls with practically no ventilation; one is illuminated by gas, the other with electricity. Both rooms are occupied by the same number of people. In which room, the former or latter mentioned, is the air purest? Does not the gas have a tendency to purify the oxygen by consuming a large percentage of the impure air or hydrogen? A. Although not at all for the reasons you give, it has been sufficiently proven that under equal conditions of ventilation (whether good or bad) the air at breathing level in any room illuminated by gas will, after several hours' occupation by a number of persons, be more healthful than if the same room was electrically lighted. The products of combustion of a gas flame in air are largely identical chemically and nearly identical physically with those of exhalation from human lungs, and as the least quantity of gas consumed by a single burner (say 4 cubic feet of gas per hour for an atmospheric incandescent mantle) produces 2 cubic feet of carbon dioxide per hour, while an average man breathes out only 0.6 cubic foot per hour, one gas burner vitiates the air of a room more than do three persons. As incandescent electric lamps not merely add nothing to the impurities of the atmosphere, but withdraw no oxygen from it, it has been assumed not unnaturally that it must be the most hygienic form of illumination to employ; but in the years which have elapsed since electricity was first used for lighting purposes, experience has increasingly proved the contrary. The burning of gas does not in any way purify the air or consume any irreparable constituents—quite the contrary; but because the heating effect of gas in proportion to its lighting effect is so much higher than that of electricity, the carbon dioxide, otherwise much heavier than air, is heated sufficiently to rush

to the ceiling of a room, where its descent upon cooling is prevented by diffusion. The explanation involves chemical, physical, and physiological considerations and cannot be at all completely given here, but you will find it admirably discussed in an article by Prof. Vivian Lewes, a high authority on this subject, in our SUPPLEMENT, Nos. 1661 and 1662, which we shall be glad to send for 10 cents each, postage paid.

Legal Notices

60 YEARS' EXPERIENCE PATENTS TRADE MARKS DESIGNS COPYRIGHTS & C.

Anyone sending a sketch and description may quickly ascertain our opinion free whether an invention is probably patentable. Communications strictly confidential. HANDBOOK on Patents sent free. Oldest agency for securing patents. Special notices taken through Munn & Co. receive special notice, without charge, in the Scientific American. A handsomely illustrated weekly. Largest circulation of any scientific journal. Terms, \$3 a year; four months, \$1. Sold by all newsdealers. MUNN & Co. 351 Broadway, New York. Branch Office, 225 F St., Washington, D. C.

INDEX OF INVENTIONS

For which Letters Patent of the United States were Issued for the Week Ending March 23, 1909,

AND EACH BEARING THAT DATE

[See note at end of list about copies of these patents.]

Table listing inventions with patent numbers and names of inventors. Includes entries like 'Account keeping system, D. L. Cline', 'Adjustable gage, S. F. Atkinson', 'Aerial tramway, marine, G. W. Jackson', etc.

The Prime Object with every machinist is to produce the best and most effective work. To do this it is necessary to have the right kind of tools.

Engine and Foot Lathes MACHINE SHOP OUTFITS, TOOLS AND SUPPLIES. BEST MATERIALS. BEST WORKMANSHIP. CATALOGUE FREE

Foot and Power and Turret Lathes, Planers, Shapers, and Drill Presses. SHEPARD LATHE CO., 133 W. 2d St. Cincinnati, O.

FOSTER SHOCK ABSORBER

A new and simple device for eliminating excessive spring action without destroying the resiliency or free central movement. Elliptical shaped cup. Write for particulars. GABRIEL HORN MFG. CO., Cleveland, Ohio

CONCRETE HOUSES

Cost Less Than Wood More handsome than Brick. Durable as granite. A Pettyjohn \$35.00 concrete block machine, sand, gravel and cement are all that is needed. Simple, easy and quick. We furnish full instructions. Save money for yourself or make money by selling blocks. Write for catalog and suggestions THE PETTYJOHN CO., 615 N. Sixth Street, Terre Haute, Ind.

THIS GRINDER

Has no pumps, no valves. No piping required to supply it with water. Always ready for use. Simplest in construction, most efficient in operation. Price will interest you. W. F. & JNO. BARNES CO., 1999 Ruby St., Rockford, Ill.

THE BARKER MOTOR

Has from the first shown itself to be of superior design. Mechanical ideas of proven worth, combined with the best materials and careful attention to details make it THE LEADER OF ITS CLASS. G. L. BARKER, NORWALK, CONN.

ELBA HAND SEARCHLIGHT LIGHTS 300 FEET ELECTRIC LIGHT BATTERY The Willard Storage Battery Co. CLEVELAND, OHIO

JAGER Marine 4-Cycle Engines

Skillfully designed and well built. Single lever control, combining automatic carburettor with spark advance. Develops wide speed range and reliability under most trying conditions. Sizes 3 to 60 h. p. Send for catalog. CHAS. J. JAGER CO., 281 Franklin, cor. Battery March St. Boston, Mass.

"Aeronautics" American Journal of Aerial Locomotion

Read the Enormous Progress in Flying Machines and Airships. Nothing happens aeronautically anywhere in the world unrecorded in this magazine. The Only Aero Journal in America. Third year. Send for sample copy. 1775 Broadway, New York

Gas, Gasoline and Oil Engines

Including Producer Gas Plants By GARDNER D. HISCOX, M.E.

Sixteenth Edition, Revised, Enlarged and Reset. Size 6 1/2 x 9 1/2 inches. 442 pages. 351 illustrations. Price \$2.50 postpaid

THIS new revised and enlarged edition is a complete, comprehensive and thoroughly up-to-date work, treating fully on the construction, installation, operation and maintenance of gas, gasoline, kerosene and crude petroleum engines. It treats on the theory of gas, gasoline and oil engines as designed and manufactured in the United States, for stationary, marine and vehicle power, together with their care and running. Electric ignition by induction coil and jump spark are fully explained and illustrated. Valuable information on the testing for economy and power and the erection of power plants is also included. The special information on producer gas and its utilization in gas engines. A list of the leading gas and oil engine manufacturers in the United States and Canada, with their addresses, is included, as well as a list of United States patents issued on gas, gasoline and oil engines and their adjuncts from 1875 to date.

MUNN & COMPANY, Publishers 361 Broadway, New York

Table listing various mechanical items and their prices, including Gas generator, Gate, Gear, and various tools.

The Science of A Star Screw Anchor. A Real Fastening. Is demonstrated by these illustrations above. The Expansion occurs at inner end, insuring against chipping or defacing outer surface of wall. Star Screw Anchors are made in one piece of soft lead composition to fit all wood screws (Nos. 5 to 24-inch). We make many other styles. Get our catalogue and free samples. Star Expansion Bolt Company, Bayonne, N. J.

The Oil for Every Car VACUUM MOBIL OIL. The cost of maintaining your automobile and the amount of service it gives you depend to a great extent on the use of the proper oil. No matter what the make of your car, its type or purpose, the right grade of Vacuum MOBIL OIL will give it perfect lubrication at all times and under all conditions. VACUUM MOBIL OIL, in barrels and in cans with patent pouring spout, is sold by dealers everywhere. Manufactured by VACUUM OIL CO., Rochester, N. Y.

"HOW TO REMEMBER" Sent Free to Readers of this Publication Stop Forgetting. You are no greater intellectually than your memory. Easy, inexpensive, increases income, gives ready memory for faces, names, business details, studies, conversation; develops will, public speaking, personality. Send today for Free Booklet. Address DICKSON MEMORY SCHOOL, 700 Auditorium Bldg., Chicago

Dwiggins Lifetime Quality Fences. "Cost Less Than Wood" LAWN, FARM AND POULTRY FENCES. GATES, ETC. Highest Grade. All Work Guaranteed. Large Illustrated Catalog and Special Prices FREE. Dwiggins Wire Fence Co., 87 Dwiggins Ave., Anderson, Ind.

Convert Your Bicycle into a Motor-Cycle using an Attachable Outfit. Fits any wheel. Also Marine and Stationary Motors and Rough Castings. Stamp for catalog. STEFFY MFG. CO., 2941 W. Girard Ave., Philadelphia, Pa.

MOTORCYCLES BICYCLE MOTORS 100 New Motorcycle Accessories. Everyone interested in Motorcycles should have our big catalog. Write today and enclose stamp. Motorcycle Equipment Co., Hammondport, N. Y.

Castings—Motors. 1 1/2 H. P. \$8.00, 2 H. P. \$12.00, 4 H. P. \$22.50, 5 H. P. (2-cylinder) \$25.00. Suitable for air ships, railway velocipedes, bicycles or launches. Largest motor supply house in America. HARRY R. GEER CO., Dept. C, 851 McLaren Avenue, St. Louis, Mo.

Wizard Repeating LIQUID PISTOL. Will stop the most vicious dog (or man) without permanent injury. Perfectly safe to carry without danger of leakage. Fires and recharges by pulling the trigger. Loads from any direction. No cartridge required. Over six shots in one loading. All dealers, or by mail, 50c. Rubber-covered holster, 10c. With Pistol, 55c. Money-order or U. S. stamps. No coins. PARKER, STEARNS & CO., 226 South Street, Dept. G, New York

Incorporate Your PATENTS and BUSINESS in ARIZONA. Laws the most liberal. Expense the least. Hold meetings, transact business anywhere. Blanks, By-Laws and forms for making stock full-paid for cash, property or services, free. President Stoddard, FORMER SECRETARY OF ARIZONA, resident agent for many thousand companies. Reference: Any bank in Arizona. STODDARD INCORPORATING COMPANY, Box 8000 PHOENIX, ARIZONA

The BUGGYAUT 4 cylinder power and service with 1 cylinder simplicity. \$650. CHAS. S. DURYE, Reading, Pa.

To test your taste A pure Havana filled Cigar for Two Cents. Panetela Shape NOT a Stogie 4 1/2 Inches Long Pure Havana Filled Two Cents. In there any other tobacco grown that can even approach the rich, full, delicious flavor of genuine, pure Havana? You know that taste—that indefinable, unapproachable Havana taste! Among the millions of cigars sold there is so much GROSS MISREPRESENTATION about HAVANA TOBACCO that we propose putting our pure Havana filled Santa Gloria TO TEST. In the making of our Yara Specials (higher priced), in which every particle of the filler is grown in and imported from Cuba, there are Havana Cuttings. From these is made our Santa Gloria with a clean, well cured York State wrapper. No scraps, no dust. Just the wrapper and pure Havana, exact size of illustration. Rolled by experts—in an immaculate clean, airy, sanitary factory—a factory which bears the closest inspection of the public—every body—towhom it is open the year round. Box of 50 Santa Gloria for \$1.00 Prepaid Everywhere. Santa Gloria is a quickly rolled cigar—not expensively finished—not a rough stogie. Just like the illustration. But for smoke—a genuine, pure Havana smoke—you can't approach Santa Gloria anywhere in price. We guarantee, absolutely, to refund your purchase price (no matter where you buy them—from your dealer or us) if a single Santa Gloria is ever found different from our representation. Ask your dealer for Santa Gloria. Ask about our standing in the tobacco world. Or, send a dollar bill to us direct for box of 50, prepaid. State color wanted. R. & W. JENKINSON CO. (45th year—600 employees) 1162 Liberty Street, Pittsburg, Pa.

Palmer Motors Two and Four Cycle, One, Two and Four Cylinder. Stationary and Marine. One to Twenty H. P. Catalogue FREE. PALMER BROS., Cos Cob, Conn. New York: 30 East 20th Street Philadelphia: The Bourse Boston: 85 Union St. et Providence, R. I.: 942 Eddy St. Portland, Me.: Portland Pier Seattle, Wash.: Colman Dock Vancouver, B. C.: 1600 Powell St.

If You Use Gas we can supply you the cheapest hot water in the world for every purpose. Let us send you our illustrated booklet and give you our 30 day trial plan for installing water heaters. Write stating your needs to HUMPHREY CO., Dept. 424 Kalamazoo, Mich.

Pipe Cutting and Threading Machine For Either Hand or Power. This machine is the regular hand machine supplied with a power base, pinion, countershaft, etc., and can be worked as an ordinary power machine or taken from its base for use as a hand machine. Pipe 1/4 in. to 1 1/2 in. diameter handled easily in small room. Illustrated catalogue—price list free on application. THE CURTIS & CURTIS CO., 6 Garden St., Bridgeport, Conn.

USE GRINDSTONES? If so we can supply you. All sizes mounted and unmounted, always kept in stock. Remember, we make a specialty of selecting stones for all special purposes. Send for catalogue "I." THE CLEVELAND STONE CO., 2d Floor, W. L. Shaw, Cleveland, O.

STUDY LAW Leading Law School in Correspondence Instruction. Established 1892. Prepares for the bar. Three Courses: College, Post-Graduate and Business Law. Method of instruction combines theory and practice. Approved by the bench and bar. Classes begin each month. Send for catalog giving rules for admission to the bar of the several States. Chicago Correspondence School of Law 506 Reaper Block, Chicago

IRON AND WIRE FENCES. DATA-LOG FREE. HIGH GRADE. FOR ALL PURPOSES. ENTERPRISE FOUNDRY AND FENCE COMPANY 434 South Senate Avenue Indianapolis, Ind.

Classified Advertisements

Advertising in this column is 75 cents a line. No less than four nor more than ten lines accepted. Count seven words to the line. All orders must be accompanied by a remittance. Further information sent on request.

READ THIS COLUMN CAREFULLY.—You will find inquiries for certain classes of articles numbered in consecutive order. If you manufacture these goods write us at once and we will send you the name and address of the party desiring the information. There is no charge for this service. In every case it is necessary to give the number of the inquiry. Where manufacturers do not respond promptly the inquiry may be repeated.

MUNN & CO.

BUSINESS OPPORTUNITIES.

DONT LET YOUR PATENT LIE IDLE. We'll make dies and tools and manufacture your articles ready for market. Write now—don't delay. Southern Stamping & Mfg. Co., R. S., Nashville, Tenn.

Inquiry No. 8868.—Wanted to buy nickeloid for buttons.

MACHINE SHOP OWNERS.—Bids wanted for milling, planing and shaper work on small cast iron parts in quantities. For particulars address 1111 Flatiron Building, New York.

WILL PURCHASE interest in good patented article, and push sales, giving inventor good income. Address, giving description. Box 110, Baltimore, Md.

PATENTS FOR SALE.

FOR SALE.—The patent right of the new invention, "Simplex Blind Regulator." A practical article, can be manufactured at a small cost. Everyone will buy it. (See last page of this paper). For particulars write Carl Maechler, No. 234 Second Avenue, Long Island City, New York.

Inquiry No. 8877.—For manufacturers of convex glass for pictures.

FOR SALE.—Vehicle wheel, the best on the market, can be manufactured for \$7.50 to \$9.00 per set of four wheels. It is better in every respect than the inflated tire costing \$30, rides easier, lasts longer, has been demonstrated and found perfect in every respect. Address M. Joachim, Sr., Versailles, Mo.

Inquiry No. 8885.—For manufacturers of the "Mysterious Ball" like that of Mr. Lepere's—a man in a ball.

FOR SALE.—Patent No. 906,852. Automatic shut off gas valve, goes next to the light. Good and quick seller. Geo. F. Barnard, 1009 Washington St., Lorain, O.

Inquiry No. 8889.—Wanted to buy a machine which breaks and divides apricot stones.

FOR SALE.—Patent No. 884,599. Improved stanchion latch. The best known. Address D. E. Miles, Beece, Kansas, R. 1, or Fredonia, Kansas, Box 597.

Inquiry No. 8894.—For manufacturers of an automatic camera for making photographs on pin trays, etc.

PATENT No. 903,446.—Will have made on royalty, a new and useful improvement in cornhuskers. Simple and efficient. 3 H. P., 4,500 lbs. per hour. For full information address T. L. Brumback, Stanleyton, Va., E. 2.

Inquiry No. 8897.—For the manufacturers of the "Lid on" can opener.

FOR SALE.—U. S. patent. Windmill oiler. Thoroughly tested. Oils mill perfectly. Operated from the ground. Simple, durable, easily and quickly adjusted to 90 per cent. of the mills. Agents make \$200 to \$500 a month. H. E. Brown, 112 Jackson Place, Baltimore, Md.

Inquiry No. 8904.—Wanted to buy new or second hand machinery for making "bow type," mouse and rat trap springs and wire parts, single machine or full outfit.

FOR SALE.—Patent No. 887,851. Latest improved self-closing sifting-top box. Will sell outright, on royalty, or both. For full particulars address Geo. W. Rowe, Hampton, Virginia.

Inquiry No. 8905.—For a dealer in tapes and cords for Venetian blinds.

FOR SALE.—Patent No. 911,974. Simple and efficient device to set a spring-pole in connection with a steel trap. Will fill a long-felt want among trappers. Cheap to produce. M. Gravatt, P. O. Box 272, Charlottesville, Va.

HELP WANTED.

WANTED.—First-class tool maker on jig and fixture work. No other need apply. Address U. S. Co., Box 773, New York.

Inquiry No. 8909.—For a machine to paint shade or blind rollers.

AGENTS WANTED.

AGENTS WANTED for new 25c. darning machine; just out. Weaves new heel or toe in sock in few minutes; one agent sold 288 one day. 15c. for sample or \$1.25 for doz. Hutton Co., Walnut St. Desk 33, Phila., Pa.

Inquiry No. 8918.—For manufacturers of "Wyd's Electro-Catalytic Sparking Plug."

STAMPS AND COINS.

WE BUY U. S. and foreign coins many dates and denominations; premiums up to \$5.00. Also every kind of used stamps. Particulars free. May be worth many dollars, perhaps fortune to you. Money and Stamp Brokerage Co., 150 Nassau St., E 23, New York.

Inquiry No. 8921.—For the manufacturers of gilt paper

LISTS OF MANUFACTURERS.

COMPLETE LISTS of manufacturers in all lines supplied at short notice at moderate rates. Small and special lists compiled to order at various prices. Estimates should be obtained in advance. Address Munn & Co., List Department, Box 773, New York.

Inquiry No. 8922.—Wanted the address of Worthington Boiler Co.

A LIST OF 1,500 mining and consulting engineers on cards. A very valuable list for circularizing, etc. Price \$15.00. Address Munn & Co., List Department, Box 773, New York.

Inquiry No. 8926.—Wanted to buy a tree digger of steel plates which are forced down beside the tree and locked in position.

MISCELLANEOUS.

WANTED.—Maker for my vehicle wrench, No. 509,514, patented January 12, 1908. Address Carroll J. Atkins, Cando, North Dakota.

Inquiry No. 8928.—For the manufacturers of a steam rotary excavator as described in the Scientific American of December 12, 1908, page 847.

UNFAMILIAR LITERATURE, including sermons and weekly publications, sent free, on application to Miss Peck, 106 George Street, Providence, R. I.

Inquiry No. 8931.—For parties who manufacture the Western Stump Borer for boring stumps.

FREE ILLUSTRATIONS of woodless railway road-bed. Patented by W. H. Coffman, Bluefield, W. Va., showing material used and construction information.

Inquiry No. 8936.—Wanted machinery used to spin or wrap paper pencils in the manner that paper pencils are made.

Inquiry No. 8941.—For manufacturers of machinery for making fly screens.

Inquiry No. 8943.—Wanted a portable band machine for breaking stones for installing road surfaces. To be worked by two or three men.

Inquiry No. 8944.—For the address of the manufacturers of the King or lever collar button.

Inquiry No. 8945.—For manufacturers of gearing, noiseless or otherwise, suitable for speed of 3,000 to 4,000 r. p. m., for wheels 5 inches diameter.

Inquiry No. 8950.—For manufacturers of machinery for the production of Coquito, Palm, Babosa, and Mame seed or nuts.

Inquiry No. 8951.—For manufacturers of machinery for making milk bottle sanitary fiber caps.

Inquiry No. 8952.—For firms making apparatus for using oil for fuel under a steam boiler instead of coal.

Inquiry No. 8953.—For manufacturers of water turbines.

Inquiry No. 8954.—For machinery used in manufacturing collar buttons.

Inquiry No. 8955.—For a machine to extract the small kernel from the pea-nut.

Inquiry No. 8956.—For makers of wood distilling machinery, also makers of philosophical instruments and chemists' hardware.

Inquiry No. 8957.—Wanted manufacturers of angle bars either malleable steel or sheared.

Inquiry No. 8959.—For manufacturers of any platinum sponge gas lighter.

Inquiry No. 8960.—For the address of the Windsor Mfg. Co., manufacturers of waterproof collars and cuffs.

Inquiry No. 8961.—For the manufacturers of imitation pearls.

Inquiry No. 8962.—For the manufacture of the different parts of vacuum systems such as electric motor and pumps.

Inquiry No. 8963.—Wanted a machine for wrapping coin.

Inquiry No. 8964.—For address of parties making imitation horse hair.

Inquiry No. 8965.—Wanted the address of the Dirt Mover Magazine.

Inquiry No. 8966.—Wanted the address of the Cohendet Motor Co.

Satisfaction guaranteed or money refunded. Write for free booklet. E. S. BESHORE, Dept. B, Myerstown, Pa.'

Advertisement for Mendets featuring an illustration of a bottle of Mendets and the text: 'Does Your Granite Dish or Hot Water Bag Leak? Don't Throw it Away. USE MENDETS. They mend all leaks in all utensils—tin, brass, copper, granite, etc., hot water bags, etc. No solder, cement or rivet. Any one can use them; fit any surface; two million in use. Send for sample pkg. 10c. Complete pkg. assorted sizes, 25c. postpaid. Agents wanted. Collette Mfg. Co., Box 492, Amsterdam, N. Y.'

Advertisement for 20 Years a Favorite! featuring an illustration of a machine and the text: '20 Years a Favorite! Furniture manufacturers realize the great advantage in perfecting drawer work of the time and labor-saving DODD'S New Gear Dovetailing Machine which cuts dovetails in gangs of 9 to 24 at one operation. Cuts them true and perfect fitting. Does away with bells and saves much power. Occupy but little space. Free catalog. ALEXANDER DODDS, Grand Rapids, Mich.'

Advertisement for SPARK COILS featuring the text: 'SPARK COILS Their Construction Simply Explained. Scientific American Supplement 160 describes the making of a 1 1/2-inch spark coil and condenser. Scientific American Supplement 1514 tells you how to make a coil for gas-engine ignition. Scientific American Supplement 1522 explains fully the construction of a jump-spark coil and condenser for gas-engine ignition. Scientific American Supplement 1124 describes the construction of a 6-inch spark coil. Scientific American Supplement 1087 gives a full account of the making of an alternating current coil giving a 5-inch spark. Scientific American Supplement 1527 describes a 4-inch spark coil and condenser. Scientific American Supplement 1402 gives data for the construction of coils of a definite length of spark. The above-mentioned set of seven papers will be supplied for 70 cents. Any single copy will be mailed for 10 cts. MUNN & COMPANY, Publishers 361 Broadway New York'

Long Distance Vision

The 18-Power Perplex Prism Binocular is as light and compact as an opera glass - as easily held steady. The lenses are close to the eye, giving, at one mile, a field of view in diameter, nine times the area of view possible in ordinary field glasses and furthermore every detail is sharply and clearly defined.

PERPLEX PRISM BINOCULAR

"The Masterpiece of Optical Mechanism" The Perplex is mechanically perfect and will "pick up" objects even in dim light and at great distance. Catalogue, illustrating the Perplex and giving the prices of all powers, sent on request.

How to Construct An Independent Interrupter

In SCIENTIFIC AMERICAN SUPPLEMENT, 1615. A. Frederick Collins describes fully and clearly with the help of good drawings how an independent multiple interrupter may be constructed for a large induction coil.

This article should be read in connection with Mr. Collins' article in SCIENTIFIC AMERICAN SUPPLEMENT, 1605, "How to Construct a 100-Mile Wireless Telegraph Outfit."

Each Supplement costs 10 cents; 20 cents for the two. Order from your newsdealer or from MUNN & CO., 361 Broadway, New York

Canadian patents may now be obtained by the inventors for any of the inventions named in the foregoing list. For terms and further particulars address Munn & Co., 361 Broadway, New York.

CRYSTAL Domino SUGAR 5 lb Sealed Boxes Only! Best Sugar for Tea and Coffee! By Grocers Everywhere!

This Dam Will Last as Long as the River Runs because it is made of granite-like, ever enduring and practically indestructible EDISON Portland Cement Costs no more to buy, but makes the most economical concrete, because the same amount of "Edison" makes more concrete but equally strong, as the same amount of other brands, or as much concrete, but stronger. The reason— Uniformly 10% Finest Ground in the World. Write us for catalog showing who specifies Edison Portland Cement, and where used. EDISON PORTLAND CEMENT CO. GENERAL SALES OFFICE: 932 ST. JAMES BUILDING, NEW YORK

WANTED—A RIDER AGENT in each town and district to ride and exhibit a 1909 Model "Ranger" bicycle furnished by us. Our agents everywhere are making money fast. Write for full particulars and special offer at once. NO MONEY REQUIRED until you receive and approve of your bicycle. We ship to anyone, anywhere in the U. S. without a cent deposit in advance, freight, and allow TEN DAYS' FREE TRIAL during which time you may ride the bicycle and put it to any test you wish. If you are then not perfectly satisfied or do not wish to keep the bicycle you may ship it back to us at our expense and you will not be out one cent. We furnish the highest grade bicycles it is possible to make at one small profit above actual factory cost. You save \$20 to \$25 middlemen's profits by buying direct of us and have the manufacturer's guarantee behind your bicycle. DO NOT BUY a bicycle or a pair of tires from anyone at any price until you receive our catalogues and learn our unheard of factory prices and remarkable special offers to rider agents. YOU WILL BE ASTONISHED when you receive our beautiful catalogue and study our superb models at the wonderfully low prices we can make for 1909. We sell the highest grade bicycles for less money than any other factory. We are satisfied with \$2.00 profit above factory cost. BICYCLE DEALERS, you can sell our bicycles under your own name plate at double our prices. Orders filled the day received. SECOND HAND BICYCLES. We do not regularly handle second hand bicycles, but usually have a number on hand taken in trade by our Chicago retail stores. These we clear out promptly at prices ranging from \$3 to \$8 or \$10. Descriptive bargain lists mailed free. TIRES, COASTER-BRAKES, single wheels, imported roller chains and pedals, parts, repairs and equipment of all kinds at half the usual retail prices. DO NOT WAIT, but write today and we will send you free by return mail our large catalogue, beautifully illustrated and containing a great fund of interesting matter and useful information; also a wonderful proposition on the first sample bicycle going to your town. It only costs a postal to get everything. Write it now. MEAD CYCLE COMPANY Dept. L 175 CHICAGO, ILL.

SMALL HOUSE NUMBER of AMERICAN HOMES AND GARDENS THE artistic and inexpensive house is the chief demand of the home seeker of to-day. For that reason the April, 1909, number of American Homes and Gardens is a SPECIAL SMALL HOUSE NUMBER. This issue contains a vast amount of most valuable information for the prospective home builder. It tells him how to select a country site, and how the various rooms of the house should be planned; the style of architecture in which the house should be designed; the material of which it may be built; the kind of plumbing fixtures to be used; the heating system to be selected; the choice of the hangings for the walls, doors and windows; appropriate furniture for the home; the interior decoration of the home; and the laying out of the grounds surrounding the house, as well as the planting of them. THE ARTISTIC EXPRESSION OF THE SMALL HOUSE is well explained in an article by Francis Durando Nichols, illustrated with fifty engravings showing exterior and interior views and floor plans of a group of model houses of small size and small cost. PLUMBING FOR A SMALL COUNTRY HOUSE, by John A. Gade, is a very important subject. No part of a house needs greater attention than the laundry, kitchen and bath room. Hence the economic and convenient placing of the plumbing fixtures, the kind to use, and the cost of the same are matters of interest to all prospective home builders. THE MAKING OF AN IRIS GARDEN, by Samuel Howe, is an illustrated article showing how a swamp or lowland can be developed and transformed into a beautiful iris garden. DECORATIVE FEATURES IN THE SMALL HOME, by Alice M. Kellogg, presents in a brief way with ten illustrations artistic schemes of covering the floors and walls of the house, harmonious and appropriate hangings for the doors and windows, with numerous suggestions for the decorating of the various rooms of the house. A GROUP OF MODEL MOTOR HOUSES FOR THE SMALL COUNTRY PLACE, by Ralph de Martin, forms two pages of illustrations and sets forth the best designs for a small motor house suitable for the accommodation of one motor car and with sufficient space for a work bench. HOME-MADE NOVELTIES FOR THE COUNTRY HOUSE, by Mabel Tuke Priestman, treats of the conversion of unlikely things into useful articles, and the illustrations show the results. THE EVOLUTION OF THE SMALL HOUSE PLAN, by Joy Wheeler Dow, is an important article by a well-known architect on the economic planning of a small house, costing from \$2,500 to \$8,000. The plan and the arrangement of the rooms is the first thought given to the house and is one in which the layman should be most interested. A FORMAL GARDEN AND PERGOLA, DESIGNED BY AN AMATEUR, by Alexander R. Holliday, informs the reader how an amateur planned and laid out his garden and how he built his pergola. Illustrated with plans and scale drawings. PROPER FURNITURE FOR THE SMALL HOUSE, by Esther Singleton, with illustrations showing the artistic and appropriate furniture for the house, and the proper position in which it is to be placed, together with an accurate treatment of the fireplace and mantel. THE USE OF CONCRETE IN THE BUILDING OF A SMALL COUNTRY HOUSE, by Benjamin Howes, is a timely and comparatively new subject, and is one in which much interest is shown at the present moment. The article is profusely illustrated with fifty engravings showing exterior and interior views and floor plans of small houses of various styles of architecture in which concrete is used with artistic results. THE HEATING APPARATUS FOR THE SMALL COUNTRY HOUSE, by Allyn Frogner, is the title of an article treating in a practical manner one of the most important features of a small country house. How to heat and what is the cost? That is a question which has been well answered for the three respective systems of hot air, steam heat and hot water. PROBLEMS IN PLANNING THE GROUNDS OF A SMALL COUNTRY PLACE, by Charles D. Lay. Mr. Lay has explained in a very concise form how the grounds around a small country place may be planted at a very low cost, and enumerates the best and most effective shrubs and plants to be used. This SMALL HOUSE NUMBER contains 165 illustrations covering 52 pages, the whole being inclosed in a striking colored cover. The price is fifty cents. Those now subscribing for American Homes and Gardens for the year will receive it at the regular rate. Subscription price \$3.00 a year. MUNN & COMPANY, Publishers, 361 Broadway, New York City
