Scientific American.

TO CORRESPONDENTS.

J. O. G., of Vt.-Your proposition to construct a balloon to start from the top of Mt. Washington during the sum-mer, with a pleasure party for Saratoga, is somewhat out time. You should have begun its construction last win ter if you expected to have it ready for embarkation in season. You ask our advice as to the best means of propelling the aerial car, and also as to the cost of such an establishment. We confess our inability to meet your wishes on these points. Rufus Porter, late of Washington and Professor Pennington, of Virginia, have bestowed more time to the consideration of this subject than any other persons known to us. If you could put your heads together, perhaps something grand mightresult from your combined wisdom. If you are really serious about the matter and wish the best advice we can offer, we advise you to drop the scheme and go to hoeing corn and pota bes-a more profitable employment of your time, by far. L. M. C., of Mass-If you would amalgamate linseed

oil with the pulp of paper machie, it appears to us it would render it water proof. Or by mixing it with a very thin solution of india rubber, then submitting the sheets, before they are quite dry, to the fumes of sulphur in a hot chamber or oven, you would accomplish the object. These are suggestions merely, as you are acquainted with the use of copal and other varnishes for rendering such articles water-proof.

H. A., of C. E.-From the data you have given us, w make the nominal power of your wheel 37-horse. If 'it is well made, its actual power will be 28-horse; if not first-rate, deduct a third from its nominal power.

G. B. O., of --.--Indiarubber and guttapercha have often been proposed as a better material for railroad cars than wood, so as to remove the accidents arising from splinters by collisions. Corrugated sheet iron, we think, is a better material, and is fire-proof

B. P., of Conn,-There is no special treatise on gums to which we can refer you. Gum copal will make a water proof fabric stiff; a thin varnish of gutta percha will not do it.

T. G. S., of Md.—The method described by you for finding out the hight of a tree is not so good as the old plan so well known, by the use of a notched rod held up o the eye.

A. L. B., of Phila.-\$675 is the lowest price for the engine. The metal nickel contains no acid. Overman's Metallurgy will give you some information. You will find it for sale in your city. W. B., of Pa.-We have been told that sweet oil drunk

freely is an antidote for that terrible poison strychnine. but personally we cannot endorse the statement. You might make some experiments with animals.

H. McL., of Me.-One square foot of grate surface and nine square feet of heating surface-flues, &c .- are al-

lowed for each horse power in a boiler. C. C. M., of N. Y.—All new boilers are subject to prim ing. A funnel-shaped mouth-piece with a perforated

plate on the pipe that conducts the steam to the cylinder tend to shed the water and prevent it passing over. D. C. W., of Ohio-Write to A. M. Mace, of Spring-

field, Mass., about his Benzole apparatus. J. C., of N. Y.-You cannot obtain motallic silicon in this city

Fairchild & Lawhead, of Morgantown, Monengalia Co Va., wish to correspond with a manufacturer of the best

lathe for turning carriage spokes. E. W., of N. Y.-The courts have decided that the Norcross Planing Machine is not an infringement of the Woodworth. See case reported in the Sci. Am. some time

ago. G. E., of Wis.—The method of case hardening iron with the prussiate of potash is described on page 256, volume 3, Sci. Am

J. C. C., of Mich .- You will find the information wanted about files on another column.

Moneyreceived at the SCIENTIFIC AMERICAN Office on account of Patent Office business for the week ending

Saturday, June 21, 1856 .--N. B. S., of Ind., \$110 ; C. W. O'L., of S. C., \$25 ; G. B, C., of N. Y., \$10 ; E. & A. S., of N. Y., \$25 ; H. B. & Co., 0. 01 N. 1. 3250; T. W. R., of Al., \$29; W. H. B., of Ind., \$350; J. H. Jr., of N. Y., \$20; E. C. C., of Mass., \$25; C. W. & Co., of Min, \$100; V. & B., of N. Y., \$100; S. B. F., of Mass., \$30; J. A. B., of N. J., \$30; M. S. P., of Mass., \$30; G. S., of N. Y., \$30; P. & P., of _____, \$20; A. Mass., 500 ; G. S., 51 N. J. B., of III., \$25 ; J. S., of Conn., \$30 ; S. & G., of N. Y., \$30 ; J. T. D., of N. Y., \$52 : W. M., of S. G. (1, 11, 1, 505); J. D., 01, 11, 502; W. H., (30);
(1, 25); H. H. J., of N. J., \$25;

A. & G. M. F., of N. Y., \$30; A. G. B., of Conn., \$25; W. W. H., of —, \$30; H. P., of O., \$27.

Specifications and drawings belonging to parties with the following initials have been forwarded to the Patent Office during the week ending Saturday, June 21 :-

E. T. H., of Pa.; D. C. W., of Pa.; C. W. O'L., of S. C.; S. W., of Ind.; J. B., of Ill., (2 cases); T. B., of Conn. B., G. C. C., of Mass.; D. H., of Conn.; H. P., of O. I., A. & G.
M. F., of N. Y.; A. G. B., of Conn.; E. G. S., of N. Y.;
J. S., of Conn.; S. & G., of N. Y.; J. C. T., of Ill.; W. M., of O.; A. M., of Mass.

Important Items.

TO THE UNFORTUNATE-We areno longer able to sup

ply the following back numbers of the present volume Nos. 6, 12, 14, 15, 17, 13, 19, 21, 22, 23, 24, 25, 27, 28, 29, 30, 34, 35, and 37. Such numbers as we have to furnish, are gratuitously supplied to such sub-scribers as failed to receive them ; and we would take occasion to state, that any person failing to receive their paper regularly, will confer a favor by notifying us of the fact. Missing numbers should be ordered early, to insure their receipt, as an entire edition is often exhausted within ten days after the date of publication.

MODELS-We shall esteem it a great favor if inventors will always attach their names to such models as they end us. It will save us much trouble, and prevent the liability of their being mislaid.

PATENT CLAIMS-Persons desiring the claim of any invention which has been patented within fourteen years can obtain a copy by addressing a letter to this office stating the name of the patentee, and date of patent when known, and enclosing \$1 as fees for copying.

RECEIPTS-When money is paid at the office for subscription, a receipt for it will always be given ; but when subscribers remit their money by mail, they may consider the arrival of the first paper a bona fide acknowledg ment of the receipt of their funds.

Literary Notices

Literary Notices. THE MARBLE WORKERS' MANUAL-This is a very excellent treatise on marbles, and the methods of work-ing them-translated from the French by M. L. Booth. It sloc contains an appendix concerning American mar-ble, which thus rendersit of greater init cet to American marble workers. It describes the various kinds of mar-their characteristics. The working of designs, coloring marble, making criticial stone, and a vest quantity of char information relating to the subject is presented in a clear and vigorous style. This book should have a large circulation, as the workers in marble are very numerous in our country. It is published by Sheldon, Blakeman & Co., this city.

North Bartish REVIEW—The number of this distin-guished Review for this quarter contains nine very fine essays. Mistorical Painting is a review of Macauley, or rather, his style, and is very farcule to that historian. Grotes' history o' Greece, Indian Literature, British New Testament Criticism, and Peace and its Political Duties, are some of the subjects treated. This Review is always profound, and characterized by a spirit of moral liberal-ity and candor. It is published by Leonard Scott & Co., by Gold st. this city.

United States MaGAZINE—The July number opens a new volume, and commences a new rea in the history of that work. The magazine comes to us in handsome book form, and contains 100 pages splendidly illustrated. It com pares closely, if indeed, insome respects it does not exceed the best of our present monthies. How the pub-lishers are enabled to furnish so elegant a work for so small a price is a puzzle. Terms 20 cts, persingle copy. \$2 a year. Emerson & Co., N. Y., publishers.

ex a year. Emerson & Co., N. Y., publishers. RACHEL AND THE NEW WORLD-This is an anusing yolume by Leon Beauwallet, one of the suite of Mdlle. Rachel, the celebrated French Actrons. It dusits, with the nervous adder and exargeration common to all Frenchmen, the incidents and strange lights which us-fel the author and his friends in a strange land. Noth-ing suits him. Nu place but Paris is filter live in. But his kicry isteld in a dashing racy style, that interests and Broadway, N. Y.

HASWELL'S MECHANICS' TABLES—This is a very use-ful and convenient little volume, by C. Haswell, the well known Marine Engineer. It contains a great num-ber of useful tables, and rules for measuring surfaces, cubes, &c., and how to cut out sheets, hoops, and plates of metalfor boilers, domes, &c. It is such a work as severy engineer should have at his elbow to save him a vast amount of labor in calculating. It is published by Harper & Bro.this city.

THE MODERN STORY TELLER-A handsome book comprising over 300 pages, made up of selections of " the best of stories of the evit authors." For summer reading, when short piquant stories are taken with a relish, this book is particularly adapted. Price 59 cents. G. P. Put-nam & Co., 321 Broadway, publishers.

THE PICTORIAL FOURTH OF JULY BROTHER JONA-THAN is a splendid sheet. It is filled with large and beautiful engravings. B. H. Day, publisher. Beekman street, N. Y.

The MORELAND MORTISING MACHINE THE MORELAND MORTISING MACHINE Company... The patentee, Mr. Moreland, has associ-ated himself in partnership with a number of gentlemen in this city, and the Company are now engaged in the manufacture of his Patent Boring and Mortising Ma-chines: and after the 18th of June next they will be pre-pared to furnish machines of the best quality, being made of iron and steel, and are extremely strong, heavy, sim jee, durable, and not liable to get out of order. This ma-chine is well adapted for railroad car building, reaping and thrashing machines, also for wagon and carriage hubs of every description. It works two chisels, that act in dependent of each other, which can be set to give the re-gnifted taper to the mortise to suit the spoke, no trimming being necessary. The manufacture of this machine, has been retarded by Mr. Moreland losing all his machine, has been reteived by goper parties. All communications relative to said machine, from April 4, 1855, have not to receive attention should now be addressed to the Moreland Mortising Machine Co., Adrian, Mich. 403*
