HO CORRESPONDENTS.

R. N., of N. Y.-Our correspondent's inquiries had re ference entirely to the manufacture of artificial stone and according to your own statement our answer wa correct.

A. A. W., of C. W.-We really would not like to re commend or suggest the plan you propose for curing hydrophobia.

C. B., of N. Y .- The pump you submit only differ from the common stomach pumps in the use of the rub-ber globe, and we consider it not patentable. A. Warnock, of Galt, Canada West-Wishes to purchase

a press for packing hay for a foreign markst.

W. T., of Conn.-The employment of bags to be at-tracted to vessels under water and then inflated is not new or patentable. If your way of constructing the bags is new, or your method of attaching them, those features could be patented. But you do not describe them, and therefore we cannot determine as to their novelty.

J. B., of Ind.-Beware of all advertisements where such trememdous inducements are offered for so small a consideration. It is not very prolable that \$1000 is to be made by inclosing a 3 cent stamp to the advertiser : and we are surprised that any one should ever take the trou ble to answer such an advertisement unless out of curiosity, expecting to be humbugged. Bees are the only genuine honey makers that work without pay that we ver heard of; and we should look with suspicion on all other kind.s.

M. & W. of N. Y.-We are not a branch of the U. S. Patent Office, but we prepare and obtain a very large proportion of all the patents granted by this government

W F. B., of Iowa-Silver's marine governor patent embraces its application to the regulation of every de scription of machinery, wind, water, or steam. We pub lished an engraving of this invention only a short time since. By reference to the list of claims in our paper under date of his patent you will see his claim. \$1 received and, under the circumstances, credited to your subscription

E.B. of N.Y.-Yours will be attended to in our nex number.

C. L., of Conn.—All daguerreotype pictures are imper-fect: we have noticed the defect you mention. Could you not try the plane convex lens.

R. T. II., of Ohio-You can obtain straight magnets fr J. Pike, philosophical instrument maker, Broadway, this

 J. H. L.-of Ky.-You must make some more experi ments with flavoring matters. You have received all the information we can give you on the subject.

W. H. C., of N. Y .- We do not know that the " Engi neer" publishers have any agency in this country. We receive it direct from the publication office in London.

M. G. C., of Pa.-We should be most happy to enlighten you on the subject of raising poultry, but the matter is not in our line. No doubt C. M. Saxton & Co., Agricultural Book Publishers, this city, could furnish you with just such information as you desire. J. II., of Ind.-Messrs. Wagner & Imlay, of Philadel-

phia, patented a brick machine in 1852 or 3, which covers all the fatures described in your letter, and considerable more. Try again.

II. R. II., of Ill.—Henry Rodgers, of Addison, Vt., took out a patent on a pump, in 1354, which was operated by the weight of cattle upon a platform while standing at the well. Your proposition, if we understand your explanation, emb.dies the same principle. J. A. Ayres, of Hartford, Conn., took out a patent about six months ago for operating buckets in the same manner. See No. 33,

present Vol. Sci. Am. W.A. W., of S. C.-We never engage in the sale of patbusiness in that line.

J. T., of Phila.-Liquid caoutchouc as drawn from the tree, cannot, so far as we know, be obtained in this city, nor can we direct you to any person who could supply you with it.

J. P. Storer, of Brunswick, Me., wishes to purch mill for grinding bones for manure.

P., Phila.-There are several dovetailing machines. From what you say, the improvement you have in view strikes us as a valuable one.

Moneyreceived at the Scientific American Offic on account of Patent Office business for the weekending

 Saturday, July 23, 1856 : W. W. H., of N. H., \$25; C. W. Jr., of N. Y., \$30 : D. W. W. H., of N. H., \$25; C. W. Jr., of N. Y., \$30; J. H., of Pa., \$30; J. B. E., of N. Y., \$10; J. Specifications and drawings belonging to parties with the following initials have been forwarded to the Patent Office during the week ending Saturday, July 23 :-

N. B. S. of Ind.; J. T. D., of N. Y.; W. W. H. of N.H.; M. G. H. of N. Y.; M. & B., of N. Y.; J. C. G., of O.; J. D. H. of Ill.; M. E., of N. Y.; S. McL., of N. Y.; P. B., of N. Y.; J. B., of Ill.; E. R. of O.; G. S. of N. Y.; G. C. H., of N. J. : H. G., Jr., of N. Y. : N. S. S. of N. Y. G. H. of Ill. : II. L., of N. Y.; L. B. F. of N. Y.

Important Items.

NEW EDITION OF THE PATENT LAWS .- We have de layed for some months the issue of another edition of the present Patent Laws in the expectation that Congress would most certainly, at this Session, make some simple amendments to them - such as are earnestly sought for by inventors and patentees. As there is ow little hope that any such changes will be made du ring the session, we have issued a complete edition of the laws, including the regulations of the Patent Office -copies of which can be had for 12 1-2 cents each. If any of our readers, who have ordered the laws and regulations, and have not received them, they will be promptly supplied upon renewing their requests by letter.

TO THE UNFORTUNATE-Weareno longer able to sup ply the following back numbers of the present volume Nos. 6, 12, 14, 15, 17, 18, 19, 21, 22, 23, 24, 25, 27, 23, 29, 30, 34, 35, and 37. Such numbers as we have to furnish, are gratuitously supplied to such sub-scribers as failed to receive them; and we would take occasion to state, that any person failing to receive their paper regularly, will confer a favor by notifying us of the fact. Missing numbers should be ordered early, to insure their receipt, as an entire edition is often exhausted within ten days after the date of pub lication.

MODELS-We shall esteem it a great favor if inventors will always attach their names to such models as they send us. It will save us much trouble, and prevent the liability of their being mislaid.

PATENT CLAIMS—Persons desiring the claim of any in vention which has been patented within fourteen years can obtain a copy by addressing a letter to this office stating the name of the patentee, and date of paten

when known, and enclosing \$1 as fees for copying. RECEIPTS-When money is paid at the office for subscription, a receipt for it will always be given; but when subscribers remit their money by mail, they may consider the arrival of the first paper a bona fide acknowledg ment of the receipt of their funds.

IMPORTANT TO INVENT-ORS. THE UNDERSIGNED having had TEN years practical experience in soliciting PATENTS in this and foreign countries, beg to give notice that they con-tinue to offer their services to all who may desire to se-cure Patents at home or abroad. Over *itree thoussand* Letters Patent have been issued, whose papers were prepared at this Office, and on an average *iffeent*, or on-*chird* of all the Patents issuedeach week, are on cases which are prepared at our Agency. An able corps of Engineers, Examiners, Draughtsmen, and Specification writers are in constant employment, which renders us able to prepare applications on the shortest notice, while the experience of a long practice, and facilities which few others possess, we are able to give the most correct counsels to inventors in regard to the patentability of inventions placed before us for ex-amination.

give the most correct counselsto inventors in regard to the patentability of inventions placed before us for ex-amination. Private consultations respecting the patentability of in-rentions are held free of charge, with inventors, at our office, irong 9.A. M., until 4 P. M. Parties residing at a distance are informed that it is generally unnecessary for them to incur the expense of attending in person, as all the steps necessary to secure a patent can be arranged by letter. A rough Netch and description of the improve-ment should be first forwarded, which we will examine and give an opinion as to patentability, without charge. Models and fees can be sent with safely from any part of the country by express. In this respect New 1 ork is more accessible than any other city in our country. Circulars of information will be sent free of postage to any one wishing to learn the preliminary steps towards making an application. In addition to the advantages which the long experience and great success of our firm in obtaining patents present to inventors, they are informed that all inventions pat-ented through our establishment, are noticed, at the prop-r time, in the Scientric Americans. This paper is read by not less than 100,000 persons every week, and en-joys a very wide apreed and substantial influence. Most of the patents obtained by Americans in foreign countries are secured through us, while it is well known that a very large proportion of all the patents applied for in the U.S., go through our agency. MuNN & CO.

American and Foreign Patent Attornies, Principal Office 123 Fulton street, New York.

Office 123 Fulton street, New York. A BARE CHANCE FOR SPECULATORS IN A Patents and men seeking business.—For sale cheap or to the highest bidder, after the first of Septem-ber next, all my invertions in hub-making ma-chinery and tools, together with one temporary set of the same now in prize texe. Turns all izes and shapes in perfect fac similie, with very surprising neatness and stonihing rapidity. Nearly all the labor p performed by machinery, even to painting; boys of ordinary capact ity can do the balance. The refuse is about sufficient of the most desirable little establishments, in the way of work-shop and fixtures, imaginable. Water power that costs a mere trifle to keep in order. Boring and morits-ing machinery, saws, lathes, &c., in running order, to gether with all the little conveniences and confirts that pensuscould evises. The situation is beaulful, and every thuing admirably calculated for carriage or other similar business; and the right man would be very welcome here, and could enjoy life and make money.— Come and see. A candid reply to all interrogations by Madress ALFRED W. DOTY, Atores ALFRED W. DOTY, Atores MARBLE-WORKERS MANUAL—De-

47 24 WINGARM CERTER, GIGENE CO., A. 2. THE MARBILE-WORKERS MANUAL_De-signed for the use of Marble-Workers, Builders, and owners of houses. Containing practical information respecting marbles in general; their cutting, working, and polishing, vencering of marble, painting upon and coloring of marbles, mossaics, composition and use of ar-tificial marble, stuccos, composition and use of ar-station and the stuccos, composition and use of ar-tificial marble, stuccos, composition and use of ar-tificial marble, stuccos, composition and use of ar-tificial marble, stuccos, compos

GCOMOTION EXTRAORDINARY.—A Self-daily at 692 Broadway, from 4 to 8 P. M. The principle is even better suited for Steamships. Paddle wheels, propellers, and driving wheels exploded. Admission 25 cts. The press free. 1*

POR SALE—One second-hand 7 ft. power Planing Machine, made by the New Haven Manufacturing Co. Cost \$500, will be sold for \$300 cash. Has been used only about four months. Also an upright drill by the same makers. Cost \$9, will be sold or \$40 cash. Ad-dress GEORGE S. LINCOLN & CO., 471f Hartford, Conn.

S15 TO S25 PER WEEK-Electro-Silver a young man the above business in two months, so that he is a perfect workman, and can plate or gild on any metal. Charge, \$100: board and lodging free while learning. Un-exceptionable references required and given. Address Electro-Silver Plater, Worcester, Mass. 1*

VEISSENBORN'S PATENT INCRUSTATION Preventer—Among the testimonials to the great success of this invention, read the following from William Burdon, 102 Front st., Brooklyn :—'I am perfectly sa'i fied with its operation. I believe it is the only machine yet invented that will entirely separate lime and other impurities from the water, when using hard water.'' In addition to this, it is the best water-heater, and a supe-rior condenser. All parties are warned against infringe-ments on the patent. STEW MART KERR, Agent, 47 Seow IV Broadway, New York.

FOR SALE-A complete suit of Submarine Armor of the latest improvement, with pump, hose, and weights. Will be sold low. Address. GEORGE C. HOWARD. 47 2* 18th, below Market, Philadelphia.

MONEY CAN BE MADE by purchasing a County Right for manufacturing Burnet's patent Self-Seat-ing Fruit Cans. One county in any Southern or Western State sold for \$100, or two counties (adjoining) for \$150 cash. Dies for stamping included. A sample of top com-plete will be mailed on receipt of twelve cents in stamps to pay postage. WILLIAM BURNET, Patent Ag nt. 1* No. 153 Broadway, New York.

TURNING LATHE AND OSCILLATING EN-gine for sale,—The lathe is plain finished, made to order, swings 20 inches clear, is 11 feet 6 inches long, in complete order, with all the gearing. The Oscillating Engine is 4 horse power, cylinder 4 inch bore, foot stroke, with pump, in complete order. The above will be sold cheap for cash, by applying to 47 2* Newark, N. J.

RAZEE'S PATENT PORTABLE UPRIGHT Steam Saw Mill, the cheapest and best in the world. It is warranted to be capable of cutting from six to eight thousand feet per day, and will more than pay for itsel'in three months, in almost any section where there is a de-mand for lumber. A large engraving of the mill in opera-tion, with full particulars, will be forwarded to all who want it. J. M. EMERSON & Co., 3* oam 1 Spruce st., New York

TO INVENTORS AND OWNERS OF PAT-ents-The undersigned have established a house at st. Louis for the introduction, sale, and exhluition of ma chinery, inventions, and patent rights. They will receive models and samples for exhibition, and will buy or sell rights for lowal Illinois, or Missouri when to rms suit. Ad-dress JAMES W. MACDONALD & CO., S7 Fourth st., St. Louis, Mo. 46 2*

K NITTING MACHINES-Circular and straight knitting machines of all sizes and gauges on hand and made to order. WALTICK AIKEN, Frunklin, N.H. 46 8*

STEAM ENGINE FOR SALE-A good second-hand Steam Engine, ten horse power, with boiler 30 feet long, by 30 inch diameter; also, an extra boiler. same size as above. Apply to CRESSON, STUART & PETERSON, Philadelphia, Pa. 46 2*

FAN BLOWER FOR SALE-Two fan blowers each 35 in. diameter, one of Dimpfel's, and one o L'each 35 in. diameter, one of Dimpfel's, and one of Alden's both in good order, and will be sold cheap. Ar ply to CRESSON, STUART & PETERSON, Phil delphia, Pa. 46 2*

DRY PRESS BRICK MACHINE,—Persons in-the terested in, or in any way connected with the man-ufacture, sale, or use of machinery for making bricks from dry or untempered clay, may find it to their advan-tage to address the undersigned at New Berne, N. C. #62* HENRY J. B. CLARK.

NEW PORTABLE BAKING OVEN-The patent for a very superior Baking Oven of any re-quired capacity, for hotels, boarding houses, and bakeries is for sale entire, or for States and counties. The attention of capitalistis invited to this important and popular in-vention. For information, address JESSE OHMERT, Patentree, J. MUMMA, Mount Morris, Ogle County, 11. 45 3*

PAGE'S PATENT PERPETUAL LIME KILN, will burn 100 barrels of lime with three cords of wood every 24 hours; likewise my coal kiln will burn 150 bushel witn 1 tuh bituminous coal in the same time; coal is not mixed with limestone. Rights f.r. sale. 45 26 C. D. PAGE, Rochester, N. Y.

10. 2.—Charles Bradfield, of the "Quaker City Ag-ricultural Implement Manufactory,

10. 3.—Has just opened an extensive Agricultural and Mechanical Emporium at Fitth and Chestnut sts., Philadelphia.

No. 4.—One splendid spacious room, about 30 x 100 feet, on that great thorough fare he has set apart to

No.5.—New Inventions, where all inventors and pat-entees may place their models free of charge be-fore the thousands of visitors. The public press speaks in the highest terms of this enterprise. 45 3*

DARREL AND'KEG HEAD TURNING AND Planing Machine, N. W. Robinson's patent Kees ville, N. Y. This machine cuts the head out and p anes it all at one operation, and will make .rom 300 to 400 per hour 400 pe hour

50 STEAM ENGINES—From 3 to 40 horse power also portable engines and boilers; they are firs class engines, and will be sold cheap for cash. WM BURDON, 102 Front st., Brooklyn. 41 tf

GOLD QUARTZ MILLS of the most improved con-than any machine now in use, and costs much less. WM BURDON, 102 Front st., Brooklyn. 41 tř

Increase of the set of

WELLS & CO., Florence, Hampshire Co., any Mass.—Are atalltimes prepared to fill orders for any size (single or double) of Well's Patent (Improved) premium Circular Saw Mills, which take the lead of all other mills in market for manufacturing lumber. Also Morrison's Shingle Machines, which rive, shave, and joint perfectly, 60 shingles per minute.—Self-Setting, Shingle, and Lath Sawing machines, capable of sawing 1000 shingles per hour, or 4000 lath per day. Cuts, and List of Prices sent by mail when deisred. 45 6 teow

Fourth Annual Exhibition will courte-The **ENTUCKY MECHANIC'S INSTITUTE**—The Fourth Annual Exhibition will commence, in Louisville, on Sept. 30th. 1856. Gold silver, and bronze medals, and diplomas will be awarded for superior arti-cles, and special premiums for the most meritorious.— Competition is invited from every part of the Union. The Hall will be ready for the reception of goods on Sept. 18. Articles for exhibition only admitted free of charge— Goods must be carefully packed and directed 'Kentucky Mechanic's Institute, care of Carter and Jewett, Louis-ville, Ky.'' Persons applying for space or desiring further information, will address D. Mc PHERSON, Secretary of the Exhibition Committee. 45 4*eow

DORTABLE STEAM EVGINES. -S. C. HILLS, No. 12 Plattst., N. Y., offers for sale these Engines, with Boilers, Punps, Heaters, etc., all complete, and very compact, from 2 to 10 horse power, suitable for print-ers, carpenters, farmers, planters, &c. A 21-2 horse can be seen in store, it occupies a space 5 by 3 feet, weights 500 lbs., price \$240; other sizes in proportion. 27 e3w

THE AUBIN PORTABLE GAS WORKS are now admitted to be the best known, whether for private houses or for villages, because of thei simplicity of construction and operation, their freedom from smell, and their unequalled economy; they do not require me-chanical skill or constant attendance; they will work night and day if required—never clog the pipes, and can-not explode; they generate gas from any material con-taining it. These great advantages, in connection with the fact that with a working plan a: y experienced work er in metal can set up the works, make rights under our patents as afe and profitable investment. Parties in search of business will do well to investigate. If they do they will buy. We refer to our works in operation on the steamer Isaac Newton, at the Delavan House, Albany, and in many other places. In a few weeks they will be in use for several villages now in negotiation. For fur-ther information apply to N. AUBIN, No. 353 Broad way, New York, or H. Q. HAWLEY & Co., Albany. 444

NORRIS WORKS, Norristown, Pa.—Inglis, Carson & West, Iron and Brass Founders, Machinists, Boiter Makers and Steam Engine Builders.—Manufacture Cor-nich Pumping Engines of an improved construction for mines and Water works, of any Capacity. All kinds of Mining Machinery, Sugar Mills, Propelier Engines for Canal Boats, Blowing Cylinders, and all heavy machinery required in the Engineering business generally. ANIJREW INGLIS, RICHARD R. CORSON, 43tf JOHN WEST.

AWRENCE SCIENTIFIC SCHOOL-Harvard University, Cambridge, Mass. The next term will open on Thursday, Aug. 28th. For catalogue containing full particulars address E. W. HORSFORD, Dean of the Faculty. 42 8

ARREL MACHINERY-CROZIER'S PATENT Dis unrivalled in point of quality and quantity of work performed, and may be seen in constant operation at the Barrel Manufactory of the undersigned. For rights and machines address WELCH & CROZIER. 43 18* Oswego, N. Y.

FNO CAR RUILDERS—For Sale, one new Upright Boring Mill for boring car wheels. Maker's price \$600, will be sold for \$200 cash. Address GEO. S. LIN-COLN & CO., Hartford, Ct. 431f

CROVER'S PATENT WIRE CUTTERS-A for sale wholesale and retail by E. D. & G. Draper, are itor sale wholesale and retail by E. D. & G. Draper, Hopedale, Millord, Mass. We are also sole agents for the sale of Dutcher's Patent Temples, Perry's Patent Parallel Shuttle Motion, Hayden & Wyllys' Paten Drawing Regulators or Eveners, Thompson's Patent Oilers, &c. 42.78

CREAT WESTERN MACHINERY AND PAT-ed a house for the sale of machinery and patent rights at No. 64 Randolph St., Chicaro, Ill. 33 10* RICHARDS, ELLSWORTH & CO.
