## THE CHEAPEST MODE OF INTRODUCING INVENTIONS.

INVENTORS AND CONSTRUCTORS OF NEW ALYD nseful Contrivances or Machines, whatever kind, can have their awentions illustrated and described in the columns of the SCIENTIFIC AMERICAN on payment of a reasonable charge for the en-

No charge is made for the publication, and the cuts are furmished to the party for whom they are executed as soon as they have been used. We wish it understood, however, that no second-hand or poor engravings, such as patentees often get executed by inexperienced artists for printing circulary and handbills from, can be admitted into these pages. We also reserve the right to accept or reject such subjects as are presented for publication. It is not our desure to receive orders for engraving and publishing any but ood Inventions or Machines, and such as do not meet our approbaion in this respect, we shall decline to publish.

PEARSON CROSBY'S PATENTS
FOR THE
MANUFACTURE OF LUMBER OF ALL KINDS.
By means of these improvements lumber can be manufactured better, cheaper, and a great saving in material, as set forth in the following certificates.
The subscriber has been engaged in the manufacturing of lumber for the past twenty years. For the last ten years he has manufacturing of the past twenty years.

better, cheaper, and a great saving in material, as set form in our following certificates.

The subscriber has been engaged in the manufacturing of lumber for the past twenty years. For the last ten years he has manufactured ten million feet annually.

"In the winter of 1863 and 1874, Mr. P. Crosby, of New York, applied to us to have us test his improved method of dressing and stretching saws, alleging that he could manufacture lumber in a superior manner, at a less expense, and a saving of 8 per cent. We expressed much doubt, as we thought we were manufacturing our lumber as well and as economically as it could be done. But finally consented to try the experiment.

"Mr. Crosby, in the spring of 1864, came to our mills, and put one gate in operation. We were so much pleased with it that we put three more gates in operation, at Phelp's Mills, and ordered the saws at Phelp's Mills. I can only say that we are in the same number of of the gates at the Dodge Mills. Aftereight months trial of the saws at Phelp's Mills. I can only say that we are in the same number of hours, manufacturing ten per crit more lumber, doing it in a superior manner, and at less cost per 1,000 teet, with a saving of 6 per cent in lumber, than we did previous to adopting Mr. Crosby's Patent Stretchers and method of dressing saws.

"Phelp's Mills, Lycoming Co., Pa., Jan. 10, 1865."

"We fully confirm the opinion of our Agent, Mr. E. B. Campbell, having every confidence in his judgment in everything connected with the manufacturing of lumber. He has been very careful in not over-estimating the advantages of Mr. Crosby's plan of thin saws. Our impress on is, that in sawing inch boards, our usual saving is about equal to one board in eleven. or, rather, that the eleventh board is clear gain. The single or span saws are also calculated to make an equal saving.

"Signed, Peparson Crossty, The Agent of the set improvements, will address the subscriber, Peparson Grossty, Internet of the set improvements, will address the subscriber, Peparson Grosst

UNKENHEIMER'S IMPROVED GLOBE VALVE;
A complete assortment of Brass Work for Locomotives, Porta
and Stationary Engines. For samples and catalogue address
CINCINNATI BRASS WORKS,
XII 26\* No. 13 East Seventh street, Cincinnati.

BLACKING BOXES AND PACKING CASES.—WE are manufacturing and will make to order our Patent Asphaltic Board Boxes and Packing Cases, of any required size, for blacking, axle grease, tobacco, dry paints and other substances. The material we use is impervious to oils, alkalis and moisture, and is strong and durable, being quite equal to the for many purposes, and can be fur mished at less than half the cost. For our blacking boxes particularly we claim that for cheapness, strength, workmanship and general appearance they are superior to any in the market. Samp es ularly we claim that for cheapness, strength, workmanship and gereral appearance they are superior to any in the market. Sample sent when requested. W. PAINTER & CO., No. 45 Holliday stree 1112\*

ACHINERY, PORTABLE ENGINES, LATHES, Planers, Drills, Chucks and Machinists' Supplies, Cotton Gins, Portable Flour and saw mills, Steam Pumps, Rotary Pumps, Force and Lifting Pumps of all kinds. Also all kinds of Oil-well Machinery, tor sale by FAIRMAN & WILLARD, 112\*

No. 5 Dey street, New York.

FOR SALE—A VALUABLE STEAM ENGINE, ABOUT
8-horse power, in excellent running order. Address HUMASON & BECKLEY MF'G CO., New Britain, Conn. 11 4\*

## WORK FOR INVENTORS VALUABLE

The publishers of the SCIENTIFIC AMERICAN have just prepared with much care, a ramphlet of information about Fatents and the Patent Laws, which ought to be in the hands of every inventor and patentee, and also of manufacturers who use patented inventions. The character of this useful work will be better understood after reading the following synopsis of its convents:—
The complete is stent Law Amendment Act of 1861—Practical Instructions to inventors, how to obtain Letters Patent, also about Models—Designs—Caveate—Trade-marks—Assignments—Revenue Tax—Extensions—interferences—infringements—Appeals—Re-issues of Defective Patents—Validity of Patents—Abandonment of Inventior s—Best Mode of Introducing them—Importance of the Specification—Who are entitled to Patents—What will prevent the granting of a Patent Fees; also a variety of miscellaneous items on patent awques.

ent Fees; also a variety of miscellaneous items on patent law questions.

It has been the design of the publishers to not only furnish, in convenient form for preservation, a synopsis of he PATENTLAW and PRACTICE, but to answer a great variety of questions which have been put to them from time to time during their practice of upwards of sovenien years, which replies are not accessible in any other form. The publishers will promptly forward the pamphlet bymail, on receipt of six cents in postage stamps.

Address MUNN & CO., Publishers of the SCIENTIFIC AMERICAN, No. 37 Park Row New York.

Oil! Oil : Oil For Railroads, Steamers, and for machinery and Burning, PEASE'S Improved Engine Signal, and Car Oils, indorsed and recommended by the highest authority in the United States and Europe. This Oil possesses qualities vitally essential for lubricating and bound in no other oil. It is offered to the public unon the most reliable, there ough, and practical test. Our most skillful engmeers and machinists pronounce it superior to and cheaper than any other, and the only oil that is in all cases reliable and will not gum. The Scientific American, after several tests, pronounces it "superior to any other they have used for machinery." For sale only by the Inventor and Manufacturer, F. S. PEASE, No. 61 and 63 Main street, Buffalo, N. 7.
