

M. E. E., of Mo.-We do not understand what you mean by converting centrifugal into centripetal force. In reply to your question whether a jointless arrangement for accomplishing it would be patentable, provided it was useful and new, we reply thatany mechanical device which is novel and userul is pater

N. A. M. H., of Pa.-We have no idea that a constant electric current would prevent the deposit of paraffine. It could be easily tried.

C. H., of Pa.-If your engine yields six horse power with 100 revolutions per minute, and you increase the number of revo lutions, maintaining the same pressure, you will increase the power in proportion; 150 revolutions will give you nine borse

C. N. B., of R. I.-You will find the best shingle machines illustrated in back numbers of the SCIENTIFIC AMERICAN dress of parties there given

W. H. H., of Phila.-Mr. H. C. Baird, No. 406 Walnut street, your city, can tell you all about works for scroll patterns F. L. K., of Wis.-You can obtain kalsomine, in the

form of powder, from any dealer in paints and oils. You had better address D. F. Tieman & Co., N. Y., in relation to it. J. S., of Ill.-Water in escaping from an opening in the

vertical side of a vesse; issues with a velocity just equal to that which would be acquired by a body falling from the surface of the water to a level with the opening. A body falling 9 feet acquires a velocity of about 23 feet per second. Water flowing at this velocity through a slit 50 by $2\frac{3}{4}$ inches. would issue at the rate of 17 cubic feet per second, equal to 1,062 pounds. This falling 9 feet would give 9,558 foot-pounds per second, equal to 573,480 footpounds per minute. Divide by 33,000 and we have 17-horse power poinds per minute. Divide by 35,000 and we have 17-horse power.
From the contraction of the vein and the great waste of a flutter wheel it is not probable that you would realize even half of this, probably not more than 5 or 6-horse power.
D. W., of Wis.—During the descent of the stone to the center of the earth there would be a mass attracting it downward

greater than the mass attracting it upward; its velocity would consequently be constantly accelerated till it reached the center, and the momentum thus acquired would carry it through to the opposite side

T. J. E., of Ill.-Air at the surface of the earth is sub jected to a pressure of about 15 pounds to the square inch; if a por tion be confined and compressed into half the volume the pressure will be doubled. The pressure is in inverse proportion to the volume.

NOTICE TO SUBSCRIBERS.

The first five numbers of the present volume of the SCIENTIFIC AMBRICAN being out of print, we shall commence the time of each new subscriber from the date of receipt of the order, unless the writer states specifically that he wishes such back numbers as can be furnished.

SPECIAL NOTICE TO INVENTORS.

The monty receipts on account of patent business, which have heretofore been published in this column, and the notification of cases sent to the Patent Office, will for the present be discontinued The receipt of specifications and money from inventors will be acknowledged promptly by mail.

Back Numbers and Volumes of the "Scientific American."

VOLUME IV., VII. AND VOLUME XI., (NEW SE-RIES) complete (bound) may be had at this office and from periods cal dealers. Price, bound, \$3 00 per volume, by mail, \$3 75 which in ould have a complete set of this publication for reference cludes posta Subscribers should not fail to preserve their numbers for binding VOLS. I., II., III., V., VI., VIII., IX. and X_{*} are out of print and cannot be supplie

RATES OF ADVERTISING.

TWENTY-FIVE CENTS per line for each and every insertion, pay able in advance. To enable all to understand how to calculate th amount they must send when they wish advertisements published we will explain that eight words average one line. Engravings will not be admitted into our advertising columns and, as heretofore, the publishers reserve to themselves the right to reject any advertisemen they may deem objectionable.

WOOD-WORKING MACHINES.—ONE 24-IN. IRON Style; one Turning M.; one Scroll Saw; one Forer Morliser; one Borling M.; three Saw Benches; one Blind Borling M.; one Ellis Bl nd Slat M.; one Hub-morishing M. Etc. Address I7 Seow OHAS. M. SMITH, No. 133 North Third street Phila.

CHEST OF TOOLS.-WE HAVE FOR SALE ONE Mechanic, Farmer or Amateur. Price \$50. Address MUNN & CO., New York. If the second second

X 1865. M.—THE RECIPE TO MAKE THE "EVER. READY GLUE" sent on receipt of \$1. A certificate with eacu recipe, worth from \$2 to \$10, and something else. Address A. M. DUNLAP. Box No. 50, Candor, Pa.

RLAX SEED.-200 BUSHELS OF CLEAN SAPLING Flax-seed for sowing, for sale, at 34 50 per bushel, by HOMER FLAX MILLS, Homer, Corliand Co., N.Y. Parties wishing to order can remit through Wm. H. Baboock, Esq., U. S. Express Agent, Homer, N.Y. 17 2

 BABBITTONIAN
 PENMANSHIP.—" THE MOST

 worth \$3 instead of \$10.—40 our, and Mess.
 " Magnificent, and

 "The latest invention an! the best. By its all any one twelve years old can make a first-class penman without schools or teachers."—(Chris. Herald.
 "Beautiful copies for practice. The whole art of penmanship is fully explained and illustrated. To all mechanics and young men whole explore the set is and the system will be found highly valuable, while for family use among children it is most useful. By its aid we think that almosc any one may learn to write in good style, without an instructor."—(Scientific American.

SCOTCH GLASS TUBES, STEAM AND WATER GAGES FOR SALE. E. BROWN, No. 311 Walnut street, Phil-adelphia, Pa

MANUFACTURING PROPERTY FOR SALE.

MANOFACTURING PROPERTY FOR SALE. THE CLINTON IRON COMPANY offer for sale the whole or a part of their SPRING AND AXLE FACTORY situated in the Town of Clinton. Conn., on Long Island Sound, midway between New Haven and New London. The com-munication with New York is all that could be desired, either by railroad or water. Sald factory is on a desirable stream of water, with a pond cover-ing some twenty acres, with a permanent stone dam, and a fall of water from twelve to fifteen feet. The main water wheel is nearly new, is seventeen feet diameter with eleven feet buckets. The ma-chinery is in fair order, and the works are capable of turning off 300 tuns each of Springs and Axles per annum. The buildings are large, and well calculated for the present busi-ness, or for the manutacture of other goods, it having been used formerly as a paper factory, and is well calculated for that pur-pose.

ormerty as a paper factory, and we'r carculated for that pur-one. The main building is 25x87 feet, with a wing attached 24x60. The tore house is 16x81 feet. There is also a small foundery. There will be sold with the above, if desired, a dwelling house and barn, and several building lots. For further information apply to S. STANARD. Agent, near the premises, WM J. BUCK, No. 458 Broadway, N. Y., Or, S. HIGGINS, Norwich.

PETROLEUM. Prof. H. DUSSAUCE, Chemist, is ready to furnish Plans of Oil Refineries and Drawings of Apparatus; Processes to Manufac ture, Refine, Dedorize and Discolorize Petroleum, Recipes to Manu-facture Lubricating «iis, Parafime, Artificial Spirit of Turpentine, and Oil of Bitter Almonds, Colors of Coal Tar. Examination of Oil Lands and Analysis of Crude Oils, Reports on the same. Address New Lebanon, N. Y. on of U. Address 1*

CAN I OBTAIN A PATENT ?-FOR ADVICE AND instructions address MUNN & CO., No. 37 Park Row, New York, for TWENTY YEARS Attorneys for American and Foreign Patents. Careats and Fatents suickly prepared. The SCIENTIFIC AMERICAN, \$3 a year. 30,000 Patent Cases have been prepared by M. & Co.

VALUABLE DISCOVERY.—IT HAS BEEN ASCER-TAINED that Railroad Ties may be preserved for a greatlength of time by the application to them of a composition discovered and lately patented by B. S. FOREMAN, Architect and Builder, at Mor-rison, II. 15 6*

NEEDLES.-SAND'S NEEDLE CO., MANUFAC-TURERS of Machine Spring Needles. These needles are made by patented machinery, and consequently we claim a uniform ty of spring which cannot be obtained in the ordinary way of making Address, with two samples inclosed, SAND'S NEEDLE COM PANI, laconia, N. H.

Laconia, N. H. 16 tf **F**. B. HUNT'S HOOSIER FODDER CUTTER—PAT— cutter in use: it cuts with equal facility bay, straw and corn fodder; is simple and durable, and can be worked with ease by a boy of ten years, having the most simple and complete change of feed, cutting any length desired. This machine was patented Jan. 5. 1864, and it took 16 first and 2 second premiums. In each case I failure to get the first premium the committees were divided—self-interest ccn-irolling the majority. Seldom has there anything become so sud-have bad any real experience or observation in the matter pro-nounce it a fixed fact—a success herond all controvers. Although it has been but a short time since this machine was introduced, it has been conclusively proven that the fodder from an arer of corn cut or chaffed by this machine is worth the emitre for sale by TOBLAS, LANE 4 CO., Richmond. Ind. 17 2*
