Scientific American.

A. C. M., of Pa.-How did Naterer measure 220 des Fah. below zero! We never heard before of such a lo temperature being obtained.

G S. Y., of Miss.—Gun cotton is made by digesting cotton in sulpho-nitric acid. On page 212, Vol. 8, Scientific American, you will find a very full description of a good

W G. B., of Ala.-Saws strained between single springs

S. A., of Mass.—There is nothing new or patentable in

your projectiles, so far as described.

W. McB., of Ohio.—We have no doubt that you desire to advance the best interests of inventors, and we are not prepared to say that your views in respect to the fees are are incorrect. They are, however, impracticable at present. Congress will not meet till next winter, and it is out of season now to advocate reforms in the law. Re-volve the subject in your mind and collect facts thereon till the next session; then let us hear from you again, if the subject still seems to you important.

L. G. T., of Conn.—The price of the Ambrotype Manual is probably about \$1. Fairchild & Co., 109 Nas-sau street, are the publishers. "Is Turkey rhuburb (Rheum Palmitum) cultivated in this country? It ap-pears to be a distinct species from the pie plant [Rheum Rhapontucum)." Can any correspondent inform him! We have not the information.

W. R., of Fla -Small batteries were constructed and advertised quite extensively a few years ago for medical purposes. The price, we think, was \$9, and presume they can be had now in this city.

E. C., of C.—Your bomb to be exploded by concussion in striking would be defeated by the liability of the bomb to turn around while flying. The idea is very old, but your form of it is probably new and worthless. We at tach no value to your suggestions on electricity.

E. L. M., of L. I.—No. "A large wheel turning in a wagon" would not " tend to propel the wagon in the opposite direction," nor in any other. Your magnetic perpetual motion contains no elements of success.

C. H. C., of Conn.—" What would be the effect on a

body, the brig Advance for instance, if it had advanced to the north pole, and come in direct line with the axis o the earth? Answer: Nothing.

" Effects are not patentable, but only the r of producing them. If you have a saw gummer operat ing in some novel manner you can patent it, or if you produce either by new or old means a substantially novel saw, you can patent it as a new manufacture, but you can. not patent an effect alone, such as gumming saws rapidly T. B. T., of Ohio. We are not sufficiently well acquainted with the wild gooseberry to enable us to advise with you in reference to its value as a hedge.

S. C., of N. Y.-You have discovered a gas easily pro duced, with elastic power, sufficient to drive machinery like steam, and wish to condense it so that you may use the same over again, and thus obtain power at almost no cost. We consider the problem hopeless in the presen

Wm Beswick, of Lancaster, Wis., wishes to purchase water wheel best adapted to a stream with plenty of water, and only about five feet fall.

L. N. Y., of Nova Scotia.—You can p saw gummer of Hoe & Co., this city.

J J. Fleming, of St. Paul, Ind., wishes to correlate some manufacturer of cast steel wire No. 24.

M. C. L. of C. W .- You can procure such a steam en

gine as you want of Wm. Burden, Brooklyn, N. Y.
T. R., of N. Y.—The reason why your gas bill is as high since the price of gas was reduced as it was before, may be owing to a greater pressure of gas in the main pipe—a point which is now being investigated in this city. There are two kinds of gas meters, the wet and the dry. In the former the gas passes through a wheel, which it revolves in water, and its revolutions measures the quantity passing through. The dry meter is composed of flexible diaphragm chambers, which expand and contract as the gas fills and exhausts out of them. By the acts of expansion and contraction they register the

quantity that passes through them.

P. W. B., of N. Y.—lst. Breech-loading fire-armswill not stand as much wear and tear as muzzle-loading pieces. 2d. They will shoot ball as well as any other 3d. They will not carry shot at all as they are invariably rifled. The great reason why breech-loading arms have become so popular is the convenience and rapidity o loading them

Junius, of N. Y.-Write to the Commissioner of Pat ents for a copy of Huff's patent for mastic roofing. If there

is no such patent he will inform you.

H. W. M., of N. J.—Yes. It takes the same power to project a ball to a given hight as it does to raise it slowly to the same hight, and it would require the same power to generate the required velocity in the balls in your de vice as you could gain from their descent. Read " Bart-

lett's Mechanics," which you can buy for about \$2.

S. P. C., of N. J.—" Vestiges of Creation" are on sale s. P. U., of N. J.—"Vestiges of Creation" are on sale in this city, price 23 cents. Hugh Miller's "Footprints of the Creator" is also for sale in all the principal book-stores. Price \$1. We have already recorded our objec-tions to floats under water for an ocean telegraph. Your scheme of such floats with a ship attached above, for the men and instruments, would obviate them, but we conseive it practically impossible to maintain such a float at any considerable depth under weter. The many long cables to confine it must be very heavy, even if they are not loaded by accumulations of aqueous animals, and every structure will leak when exposed to great pres ure.

Money received at the Scientific American Office on account of Patent Office business for the week ending Saturday, March 14, 1857:—

J. M. of N. Y., \$25 . J. D. S., of O., \$25 . J. B., of Ill \$30 ; H. & B., of Eng., \$1065 ; J. P. M., of Mass., \$25 ; T B., of Mass., \$110; B. & Van P., of Wis., \$30; S. H. & Co., of Vt., \$30; H. B., of N. Y., \$47: O. J., of N J., \$25; Y. & J., of N. Y., \$30; W. T. B. R., of Ill., \$25; S. & M., of Wis. \$25; A. C. B., of N. C., \$37; E. H., of Iowa, \$26; J. V. COMPLETE SETS OF VOLUME XII EXHAUSTED .-We regret that we are no longer able to furnish com-plete sets of the present volume. All the back numbers previous to January 1st (No. 17) are entirely ex-

GIVE INTELLIGIBLE DIRECTIONS—We often receive letters with money enclosed, requesting the paper sent for the amount of the enclosure but no name of State given and often with the name of the post office also omitted.

Persons should be careful to write their names plainly when they address publishers, and to name the post of fice at which they wish to receive their paper, and the State in which the post office is located.

Twenty-five cents a line each insertion. We respect fully request that our patron will make their adver-tisement as short as possible. Engravings cannot be admitted into the advertising columns.

All advertisements must be paid for before inser

IMPORTANT TO INVENT-ORS.

practical experience in soliciting PATENTS in this and foreign countries, beg to give notice that they continue to offer their services to all who may desire to secure Patents at home or abroad.

Over three thousand Letters Patent have been issued, whose papers were prepared at this Office, and on an average often, or one-third of all the Patents issued each week, are on cases which are prepared at our Agency.

An able corps of Engineers, Examiners, Draughtsmen, and Specification writers are in constant employment, which renders us able to prepare applications on the shortest notice, while the experience of a long practice, and facilities which few others possess, we are able to give the most correct counsels to inventors in regard to the patentability of inventions placed before us for examination.

Disease accombistions reasonating the patentability of in-

the patentability of inventions placed before us for examination.

Private consultations respecting the patentability of inventions are hold free of charge, with inventors, at our office, from 9 A. M., until 4 P. M. Parties residing at a distance are informed that it is generally unnecessary for them to incur the expense of attending in person, as all the steps necessary to secure a patent can be arranged by letter. A rough sketch and description of the improvement should be first forwarded, which we will examine and give an opinion as to patentability, without charge. Models and fees can be sent with safety from any part of the courtry by express. In this respect New York is more accessible than any other city in our country.

Circulars of information will be sent free of postage to any one wishing to learn the preliminary steps towards making an application.

any one wishing to learn the preliminary steps towards making an application.

In addition to the advantages which the long experience and great success of our firm in abtaining patents present to inventors, they are informed that all inventions patented through our establishment, are noticed at properties, in the Science rate of the American. This paper is rad by not less than 100,000 persons every week, and enjoys a very wide spread and substantial influence.

Most of the patents obtained by Americans in foreign countries are secured through us; while it is well known that a very large proportion of all the patents applied for in the U. S., go through our agency.

American and Foreign Patent Attornles, Principal Office 128 Fulton street, New York.

PATENT RIGHTS sold on commission by V. N BILLINGS Jackson, Mich. 28 4*

ANTED—Honorable and profitable traveling employment, by a man of experience. Good reference given. Address box 119 Auburn Post Office, N.Y.

SECRET ART OF CATCHING FISH—Sent for \$1. N. R. Gardner, box 1772, Peace Dale, R. I., 28 4*

A NEW AND SCIENTIFIC INVENTION.—Dr. Cheever's Galvano-Electric Regenerator. Patent issued Jan 15th, 1856. A circular relating to the use of the instrument, embracing a general treatise of atony of the spermatic organs, the result of which tends to softening the medullary substance of which the brain is composed, may be had gratis, and will be sent to any address by mail by their indicating a desire to receive it. All letters should be directed to DR. J, CHEEVER, No. 1 Tremont Temple, Boston.

D. BARNETT, Malleable and Grey Iron Foundry, Hamilton street, corner of McWhorter Newark, N. J. Orders promptly attended to. 28 10*

BOILER FLUES—All sizes, and any length desired promptly furnished, by JAMES O. MORSE & CO. No. 79 John street, New York.

ROUGHT IRON PIPE—Plain and galvanized sold at wholesale, by JAMES O. MORSE & CO. No. 79 John street, New York.

TEAM PUMPS, Boiler Feed Pumps, Stop Valves Oil Cups, Cocks, Steam and Water Gauges, sold by JAMES O. MORSE & CO., No. 79 John street, New York. 23 13

GOOD PRACTICAL BOOK—For Painters, Gilders and Varnishers—The Painter, Gilder and Varnishers—The Painter, Gilder and Varnishers' Companion, containing rules and regulations in everything relating to the arts of painting, gliding, varaishing and glass staining. Second Edition, 12 mo., cloth. Published and for sale by HENRY CAREY BAIRD, Philadelphia. Price 76 cents. Sent by mail post free. 23 2

Philadelphia. Price 75 cents. Sent by mall post free. 25 2

TO ENGINEERS Contractors, Surveyors, and Mechanles.—Scribner's Engineers' Contractors' and furveyors' Pocket Table Book, comprising logarithms of numbers, logarithms of sines and tangents; natural sines and natural tangents; the traverse table and a full set of excavation and embankment tables, together with numerous other tables for engineers, &c. Fifth edition. By J. M. Scribner, A. M., author of "Engineers' and Mechanics' Companion," &c., &c. 264 pages, 16mo., Tucks, glit edges. Price \$1 25.

SCRIBNEER'S ENGINEERS' AND MECHANICS' COMPANION, comprising United States weights and measures, mensuration of superficies and solids; tables of squares and cubes, square and cube roots, circumference and areas of circles. The Mechanical Powers—centers of gravity of bodies, strength, weight and crush of materials, water wheels, hydrostatics, hydraulics, statics, centers of per cus ion and gyration, friction, heat, tables of the weighted metals, pipes, scantling, &c. Steam and the Steam Engine. Thirteenth edition, revised and enlarged. By J. M. Scribner, A. M., author of "Engineers' Pocket Table Book," &c. &c. &24 pages, ibmo., Tucks, glit edges Price \$1 25. Copies of the above books will be sent by mail on receipt of the advertised price. Published by MASON BROTHERS, 108 and 110 Duane st., New York.

STATES MAGAZINE, the "young original monthly," contains each year fourteen hundred pages, and about six hundred beautiful pictorial embellishments. It is rapidly growing into Popular favor. With its purely national character, its high literary tone, its bold, independent citicisms, and its artistic embellishments, it is securing hosts of admirers among every class and profession. It is belie red that it may challenge comparison with any magazine steed. Subscription \$3 a year to lowest club \$3.2 a second. Subscription \$3 a year to lowest club \$3.7 TES JOURNAL is a large illustrated monthly paper, now in its eighth volume, having reached a circulation of nearly one hundred thousand copies per month. Each number contains sixteen large pages, presenting a complete monthly record of valuable information in every department of life, and review of current events throughouthe world. It combines all the valuable features of a literary, mechanical, agricultural and family paper. Subscription, 50 cents a year; lowest club price, \$40 cents a year.

SPLENDID LIBEARY.—To any person who will get up a club of twenty subscribers for each of the above publications, at the lowest club prices, either at one or more Post Offices, or amounting to \$48, for either or both publications, we will present a splendid library, consisting offorty large volumes, elegantly bound, and embracing the most popular works in the market. Those who wish to take advantage of this extraordinary offer are requested to send at once for specimen copies, with list and description of works in the library, and suggestions how to form the club. Two specimen copies of each publication will be mailed for the purpose on receipt of 20 cents.

A RTIFSIAN WELLS.—The subscriber, engineer

RTESIAN WELLS.—The subscriber, engineer of artesian wells and boring for water, has been energaged in this business near thirty years, has recently bored a well for John Taylor & Co., at their saloon and International Hotel, Broadway, also, wells for our principal brewers, sugar refiners, and others. I wish to caution the public against frauds imposed upon them by parties claiming to have patents for tools and pipes used in this business. Address JOHN DISBROW, 61 Walker street, or at the Columbian Foundry, 45 Duane st. 28 10*

TEAM BOILERS.—Three fine Cornish Boilers, 39 feet long, 6 feet diameter, 42 in flue, have been in use but a short time. Also, one first-rate tubular boiler, 15 feet long, 3 feet diameter, 23 3.inch tubes, with safety valve, feed pipe, &c., complete, in good order, for alle low, by CHAS. HIGKMAN, No. 60 Cherrystreet, New York.

AWS.—HOE & CO. S Patent Ground Saws, Plastering Trowels, &c., can be had wholesale and retail, at the principal hardware stores, at the salestroms of the manufacturers, 29 and 31 Gold st, or at the works cor. of Broome, Sheriff, and Columbia sts., N. Y. Illustrated catalogues, containing prices and information interesting to sawyers generally, will be sent by post on application. 27 3mos

TRUSTEE'S SALE OF MACHINERY—Now is the time to buy machinery of all kinds cheap for cash. We have a few more Planers, Lathes, Geer Cuters, Drills, Chucks, horizontal Drilling Machines, Bolt Outers, Belting, Patterns for making Machinery of all descriptions, &c., together with a large quantity of small tools, all of which will be sold in lots to suit the purchasers. Planers varying in size from 26 to 8 feet.—Lathes of the most approved pattern, from 26 to 6 feet in length. Among this lot are some 6 hand lathes. All of the above named tools are in good repair, and will be sold cheap, or at the customer's own price. Please call and examine, or send your order, which will be as fully complied with as if you were present yourself. Inquire of N. D. SPERRY, Trustee of the estate of John Parshley, New Haven, Conn.

Parshley, New Haven, Conn. 27 6

11 (1) W TO WRITE—A new pocket manual of composition and letter writing. A popular hand-book, embracing hintson penmanship, choice of writing materials, practical rules for literary composition in general, and epistolary and newspaper writing, punctuation and proof-correcting in particular, with letters of business, relationship, friendship, and love, illustrated by numerous examples of genuine epistles, from the pens of the best writers, including forms for letters of introduction, noies, cards, etc., and a collection of poetical quotien, noies, cards, etc., and a collection of poetical quotiens, price in paper, prepaid by mail, 30 cts., muslin, 50 cts. The following, in press, will be issued as soon as possible: "How to Talk," or hints toward a grammatical and graceful style in conversation and debate. 30 cents: "How to Behave," a manual of etiquette and guide to correct personal habits, with rules for debating socie ties and deliberative assemblies. Price 30 cts., muslin, 50 cts. "How to do Business," a guide to success in practical life, and hand-book of legal and commercial forms. Same. \$1 will pay for the four works in paper, and \$1/5 in muslin, They will be sent to subscribers, postage prepaid, as fast as issued, by FOWLER & WELLS, 308 Broadway, N. Y.

AW GUMMERS—G. A. PRESCOTT, of Sandy Hill, N. Y., continues to manufacture Saw Gummers, Saw Tools, &c., calculated for Gang, Muley, and large Circular Saws. For sole by Thompson Brothers, Buffalo, N. Y., J. B. McCenniss, and W. F. Dominck, Chicaeo. II., Caswell & Gaylord, and Nazor. Milwaukie, Wis.; S. S. Sherwood, Fondulac, Wis.; Allen & Billings, Oshkosh, Wis.; Schenck Machinery Depot, New York.
