

ATENTS The First Inquiry

The First Inquiry
that presents itself to
one who has made any
inprovement or disocycry is: "Can I obtain a Patent?" A potitie answer canonly be
had by presenting a
complete application.
An application cersist.
An application cersist.
An application of Patents.
An application cersist.
An application cersist.
The inventor to do all this business himself are
generally without success. After a season of great perplexity and delay, he is usually glad to seek the sid of
persons experienced in patent business, and have all the
work done over again. The best plan is to solicit proper
advice at the beginning.
If the parties consulted are honotable men, the inven-

sons experienced in patent business, and have all the ke done over again. The best plan is to solicit proper fee at the beginning. The parties consulted are honorable men, the inventage safely confide his ideas to them: they will advise their the improvement is probably patentable, and give him all the directions needful to protect his its.

Tehts.

Messrs, MUNN & CO., in connection with the publication of the SCIENTIFIC AMERICAN, have been actively engaged in the business of obtaining patents for over twenty years—nearly a quarter of a contary. Over Fifty thousands inventors have had ben effit from currounsels. More than one third of all patents granted are obtained by this firm

than one third of all patents granted are obsained by the firm.

Those who have made inventions and desire to consult with us, are cordially invited to do so. We shall be happy to see them in person, at our office, or to advise them by letter. In all cases they may expect from us an honest opinion. For such consultations, opinion, and advice, we make no charge. A pen-and-ink sketch, and a description of the invention should be sent, together with stamps for return postage. Write plainly, do not use pencil nor pale lik; be brief.

All business committed to our care, and all consultations, are kept by us secret and strictly confidential. Address MUNN & CO. 37 Park Bow. New York.

Foreign Patents.—American Inventors should bear

tions, are kept by us secret and strictly confidential. Address MUNN & CO., 37 Park Row, New York.

Foreign Patents.—American Inventors should bear in mind that, as a general rule, any invention that is valuable to the patente in this country is, worth equally as as much in England and some other foreign countries. Five Patents.—American, English, French, Belgian, and Prussian—will secure an inventor exclusive monopoly to his discovery among one hundred handled that the monopoly to fit most intelligent people in the world. The tacilities of business and steam communication are such that patents can be obtained abroad by our citizens almost as easily as at home. The majority of all patents taken out by Americans in foreign countries are obtained through the Scientific of Americans of the most information and a Synopsis of the Patent Laws of various countries will be furnished on application to Messrs. Munn & Co.

For Instructions concerning Foreign Patents, Reissues, Interferences, Hints on Sciling Patents, Rules and Proceedings at the Patent Office, the Patent Laws, etc., see our Instruction Book. Sent free by mail on application. Those who receive more than one copy thereof will oblige by presenting them to their friends.

# AIR CYLINDER GRAINING

MACHINE.

This machine Grains in Oil Colors, perfect imitations of Walnut, Rosewood, Chestnut, and Oak, in all their varieties. The impressions are as sharp and true as those of the photograph. The advantages of this machine are:

1st. It performs many times as much labor as can be done by hand. 2d. No hand work, how-

ever painstakingly and slowly done, can equal it. 3d. It does not require a highly skilled workman. 4th. It is adapted to all kinds of work, and can be applied to any surface, flat or curved. 5th. The machine is substantially made of vulcanized rubber, with brass sideplates, so simple and durable that it will last for years without getting out of order. 6th. By an improvement made last year, the figure can be carried close to the ends of the panel. 7th. The pattern plates are now reinforced by a patent backing, which prevents their breaking.

This machine has taken the First Premium at the American Institute Fair, this year. See Report of Committee, Also, see Scientific American, August 3, 1867. Samples of the work done on exhibition at the office. For circulars and further particulars address 9 6os eow
