

PATENTS

The first inquiry that presents itself to one who has made any improvement or discovery... The best plan is to solicit proper advice at the beginning.

Messrs. MUNN & CO., in connection with the publication of the SCIENTIFIC AMERICAN, have been actively engaged in the business of obtaining patents for over twenty years...

Those who have made inventions and desire to consult with us, are cordially invited to do so. We shall be happy to see them in person, at our office, or to advise them by letter.

All business committed to our care, and all consultations, are kept by us secret and strictly confidential.

Preliminary Examination.--In order to obtain a Preliminary Examination, make out a written description of the invention in your own words, and a rough pencil or pen-and-ink sketch.

In Order to Apply for a Patent, the law requires that the model should be neatly made of any suitable materials, strongly fastened, without glue, and neatly painted.

When the invention consists of a medicine or compound, or a new article of manufacture, or a new composition, samples of the article must be furnished, neatly and in proper proportions.

Reissues.--A reissue is granted to the original patentee, his heirs, or the assignees of the entire interest, when by reason of an insufficient or defective specification the original patent is invalid.

Caveats.--A caveat gives a limited but immediate protection, and is particularly useful where the invention is not fully completed, or the model is not ready, or further time is wanted for experiment or study.

Quick Applications.--When, from any reason, it is desirable to apply for Patents or Caveats, in order to write, without a moment's loss of time, they have only to write or telegraph us specially to that effect, and we will make special arrangements for them.

Foreign Patents.--American inventors should bear in mind that, as a general rule, any invention that is valuable to the patentee in his country is worth equally as much in England and some other foreign countries.

Patents are granted for Seventeen Years, the following schedule of fees:-- On filing each caveat, \$10. On filing each application for a Patent, except for a design, \$15.

On filing application for design (seven years), \$15. On filing application for Design (fourteen years), \$25. In addition to which there are some small revenue-stamp taxes.

BUERK'S WATCHMAN'S TIME DETECTOR.--Important for all large Corporations and Manufacturing concerns--capable of controlling with the utmost accuracy the motion of a watchman or patrolman, as the same reaches different stations of his beat. Send for a Circular.

N. B.--This detector is made in U. S. Pat. No. 435. Parties using or selling these instruments without authority from me will be dealt with accordingly. 213* tf
