PATENT OFFICES, American and European,

MUNN & CO., No. 37 Park Row, New York.

or a period of nearly twenty-five years Munn & Co. have occupied the position of leading Solicitors of American and European Patents, and during t 1 is extended experience of nearly a quarter of a century, they have exmined not less than fifty thousand alleged new inventions, and have pros-

ted upwards of thirty thousand applications for patents, and, in addition to this, they have made at the Patent Office over twenty thousand Prelimition ary Examinations into the novelty of inventions, with a careful report on the

This wide experience has not been confined to any single class of inventions but has embraced the whole range of classification, such as Steam and Air Engines, Sewing Machines, Looms and Spinning Machinery, Textile, Manufactures, Agriculture and Agricultural Implements, Builders' Hardare, Calorifics, Carriages, Chemical Processes, Civil Engineering, Brick aking, Compositions, Felting and Hat Making, Fine Arts, Fire-arms, lass Manufacture, Grinding Mills, Harvesters, Household Furniture, Hydra ulics and Pneumatics, Illumination, Leather Manufactures, Mechanical Engineering, Metallurgy, Metal Working, Navigation, Paper Making, Philosophical Instruments, Presses, Printing and Stationery, Railroads and Cars, Sports, Games, and Toys, Stone Working, Surgical Apparatus, Wearing Ap arel, Wood Working.

MUNN & Co. deem it safe to say that nearly one-third of the whole number of applications made for patents during the past fifteen years has passed brough their Agency.

CONSULTATIONS AND OPINIONS FREE.

Those who have made inventions and desire to consult with us are cor dially invited to do so. We shall be happy to see them in person, at our office, or to advise them by letter. In all cases they may expect from us an honest opinion. For such consultation, opinion, and advice, we make no charge. A pen-and-ink sketch and a description of sent. Write plainly, do not use pencil or pale ink. A pen-and-ink sketch and a description of the invention should be

RECEIPTS.—When money is paid at the office for |subscriptions, a receipt for it will be given; but when subscribers remit their money by mail, they may consider the arrival of the first paper a bona-fide acknowledgment of their funds.

CITY SUBSCRIBERS.—The SCIENTIFIC AMERI-CAN will be delivered in every part of the city at \$3:50 a year. Single copies for sale at all the News Stands in this city, Brooklyn, Jersey City, and Williamsburg, and by most of the News Dealers in the United States.

Advertisements.

The value of the Scientific American as an advertising medium cannot be over estimated. Its circulation is ter times greater than that of any similar journal now pub *lished. It goes into all the States and Territories, and is read in all the principal libraries and reading-rooms of the world. We invite the attention of those who wish to make their business known to the annexed rates. A business man wants something more than to see his advertise mer tin a printed newspaper. He wants circulation. If it is worth 25 cents per line to advertise in a paper of three thousand circulation, it is worth \$2.50 per line to advertise in one of thirty thousand.

RATES OF ADVERTISING.

Back Page.....\$1.00 a line. line, by measurement, as the letter-press.

Druggists! Sell your customers Sweet Quinine

VALENTINE'S Turbine Water Wheels.—

cheapest and best. Agents wanted. Samples very low
to Agents. Wanted, one smart Agent to control each
county. Speakquick. Address
18 3 ASHUELOT S. M. CO., Hinsdale, N. H.

If a SPECIAL SEARCH at the Patent Office is required, which embraces a personal examination of all patented inventions and a report in writing, a fee of \$5 is charged. This examination is only advised in doubtful cases.

To Apply for a Patent, a model must be furnished, not over a foot

in any dimension. Send model to Munn & Co., 37 Park Row, New York, by express, charges paid, also a description of the improvement, and remit \$16 to cover first Government fee, revenue and postage stamps.

The model should be neatly made of any suitable materials, strongly fast-

ened, without glue, and neatly painted. The name of the inventor should be engraved or painted upon it. When the invention consists of an improve ment upon some other machine, a full working model of the whole machine will not be necessary. But the model must be sufficiently perfect to show with clearness, the nature and operation of the improvement

THE GREAT ADVANTAGES

OF MUNN & CO.'S AGENCY are that their practice has been ten-fold greater than any other 'Agency in existence, with the additional advantage of having the assistance of the best professional skill in very department, and a Branch Office at Washington, which watches and supervises all their cases as they pass through official examination. If a case is rejected for any cause, or objections made to a claim, the reasons are inquired into and communicated to the applicant, with sketches and explanations of the references; and should it appear that the reasons given are insufficient, the claims are prosecuted immediately and the rejection set aside and usually

$WITHOUT\, EXTRA\, CHARGE.$

MUNN & Co. are determined to place within the reach of those who confide to them their business the highest professional skill and experience

Caveats are desirable if an inventor is not fully prepared to apply for Patent. A Caveat affords protection for one year against the issue of a patent to another for the same invention. Caveat papers should be carefully

Reissues.—A patent, when discovered to be defective, may be reissued, by the surrender of the original patent and the filing of amended papers. This proceeding should be taken with great care.

Patents can be Extended.-All patents issued prior to 1861, and now in force, may be extended for a period of seven years upon the presentation of proper testimony. The extended term of a patent is frequently of much greater value than the first term, but an application for an extension, to be successful, must be carefully prepared. Munn & Co. have had a large experience in obtaining extensions, and are prepared to give reliable advice.

Interferences between pending applications before the Commissioners are

managed and testimony taken; also Assignments, Agreements and Licenses prepared. In fact there is no branch of the Patent Business which MUNN & Co

are not fully prepared to undertake and manage with fidelity and dispatch.

Designs, Trade Marks, and Compositions can be patented for a term of years; also new medicines or medical compounds, and useful mix tures of all kinds.

When the invention consists of a medicine or compound, or a new article of manufacture, or a new composition, samples of the article must be furnished, neatly put up. Also, send us a full statement of the ingredients, proportions, mode of preparation, uses, and merits.

EUROPEAN PATENTS.

American inventors should bear in mind that, as a general rule, any invention that is valuable to the patentee in this country is worth equally as much in England and some other foreign countries. Five Patents—American, English, French, Belgian and Prussian—will secure an inventor exclusive monoply to his discovery among one hundred and THIRTY MILLIONS of the most intelligent people in the world. The facilties of business and steam communication are such that patents can be obtained abroad by our citizens almost as easily as at home. Munn & Co. have prepared and taken a larger number of European patents than any other American Agency. They have Agents of great experience in London, Paris Berlin, and other cities.

For instructions concerning Foreign Patents, Reissues, Interferences Hints on Selling Patents, Rules and Proceedings at the Patent Office, the Patent Laws, etc., see our Instruction Book. Sent free by mail on application. Those who receive more than one copy thereof will oblige by presenting it to their friends.

Address all communications to

Office in Washington, corner of F and 7th streets.

Facts for the Ladies.

Thinking it due your labors in behalf of easing woman's work, I herewith state, that in the year 1854 I purchased one of the Wheeler & Wilson Sewing Machines, being at that day most fully informed of their excellence over all others. This machine has been in almost uninterrupted use ever since (a period of nearly fifteen years), on many totally different materials, such as my own boots, my boy's clothing, needle-books, beside the usual heavy and light goods worn by ladies and children. It has never been repaired, and does not need it yet. I have often blessed the day on which I first entered MRS. J. W. D. PATTEN.

Washington, D. C.
