THE PRACTICAL BRASS AND IRON FOUNDERS' GUIDE. Concise Treatise on Brass Founding, Molding the Metals, and their Alloys, etc. To which are added Recent Improvements in the Manufacture of Iron and Steel by the Bessemer Process, etc. By James Larkin, late Conductor of the Brass Foundery Department in Reaney, Neafie & Co.'s Works Philadelphia. Fifth Edition. Revised with extensive Additions. Philadelphia: Henry Carey Baird, Industrial Publisher, No. 406 Walnut street. Price, by mail free of postage. \$2.25. mail, free of postage, \$2.25.

This edition of a well-known and popular work, has been prepared from the manuscript of the author, and is essentially improved and enlarged. It now contains a vast mass of practical information, useful not only to brass and iron founders, but to mechanics of all kinds. It is one of those books that any mechanic can read with pleasure and profit.

GRISWOLD'S RAILROAD ENGINEERS' POCKET COMPANION FOR THE FIELD. Comprising Rules for Calculating Deflexion, Distances, and Angles, Tangential Distances and Angles, and all necessary Tables for Engineers; also the Art of Leveling, from Preliminary Survey to the Construction of Railroads. Intended expressly for the Young Engineer. Together with numerous valuable Rules and Examples. By W. Griswold. Philadelphia: Henry Carey Baird, Publisher, No. 406 Walnut street. Price, by mail, \$1.75.

This is a book of reference, designed to aid the memory in field work, and has been prepared from notes taken during a long experience in rail road engineering. It is bound in morocco, with a clasp and pocket, and seems to be in every way adapted to subserve the purpose designed.

#### Advertisements.

The value of the SCIENTIFIC AMERICAN as an advertising medium cannot be over-estimated. Its circulation is ten times greater than that of any similar journal now oub Hahed. t aces into all the States and Territories, and is read in all the principal libraries and reading-rooms of the world. We invite the attention of those who wish to make their business known to the annexed rates. A business man wants something more than to see his advertisement in a printed newspaper. He wants circulation. It itis worth 25 cents per line to advertise in a paper of three thousand circulation, it is worth \$250 per line to adverse in one of thirty thousand.

RATES OF ADVERTISING.

Back Page - . - . \$1'00 a line. Inside Page - - - . 75 cents a line.

Engravings may head advertisements at thesame rate per dne, by mea urement, as the letter-press.

## Every Man his own Tanner.

Southern Products capable of tanning Calf, Kid. Deer, and other light skins in 25 days-substitutes for Sicilian and Virginia Sumacs. A new and profitable industry from May to Dec.

and profitable industry from May to Dec.

F. Peyrc Porcher. M. D., of Charleston. S. C., has received Letters Patent for a method and the use of materials recently discovered and widely diffused in our Southern forests, which by his process, can be employed in the crude state by planters, farmers, or manufacturers in the preparation of all light stims—which they will tan thoroughly in from 2 to 25 days—a longer period being required for hides and sole leather. These plants, which require little trouble in gathering, can by his precess yield 32 to 42 per cent of extra Acts rich in tannin, which will also tan in 2t to 25 days. By the special combination of properties which they possess they make a leather of very superior quality. The extracts may be prepared with great ease, either on a large or a small scale, and offer great inducements to capitalists, to tanners, and dealers in leather, or to private in dividuals throughout the Southern States.

Where it is desirable to manufacture the extracts, which are easy of transportation, works may be crected at depots along the line of our railroads, or on river courses in every section of the country where fuel is abundant.

State and county rights (with the exception of the

actions and the country where reconstructions and the country surrounding Charleston and within 60 miles), will be sold; also, royalty for the use of the crude material or for the manufacture of extracts, or rights to private individuals for tranning on plantations. Explicit Instruction, which is extremely simple in its application, will be furnished. Parties desiring to purchase such rights are requested to make their offers in writing.

Address the patentee at Charleston, S. C., P.O. Box 499.
