The paper that meets the eye of manufacturers throughout the United States-Boston Bulletin, \$4 00 a year. Advertisements 17c. a line.

Half Interest for sale in established Machinery Depot, new and second-hand. Steam fitting connected. Small capital, with energy,

required. Address T.V. Carpenter, Advertising Agent, Box 773, New York. See advertisement of a Woolen Mill for sale. A bargain.

I am active, have a clear record, and some capital. How can I make some money? F. Carmill, Box 1268, Boston, Mass

Pattern Letters for Machinists, Molders, and Inventors, to letter patterns of castings, all sizes. Address H.W. Knight, Seneca Falls, N.Y.

Improved mode of Graining Wood, pat. July 5, '70, by J. J. Callow, Cleveland, O. See illustrated S.A., Dec. 17, '70. Send stamp for circular.

Can a round, spring-steel rod be drawn to any desired length, with a true taper to a point, with equal elasticity the whole length, and rolled temper? What is the price per hundred pounds, and where can they be procured? Answer "Sportsman." Malone, N.Y.

 $Manufacturers \, of \, Foot \, Lathes \, and \, other \, light machinery \, please$ address Gco.B. Kirkham, 167 E. 33d st., N.Y. city. Business of importance

Safety Kerosene Lamps (Perkins & House's Patent). Explosion or breaking impossible; light equal to gas, and no odor. Families supplied and canvassers appointed, by Montgomery & Co., 42 Barclay st., New York, or Cleveland, O.

All parties wanting a water wheel will learn something of interest by addressing P. H. Wait, Sandy Hill, N. Y., for a free circular of his Hudson River Champion Turbine.

- Ashcroft's Low Water Detector, \$15; thousands in use; 17 ycar's experience. Can be applied for \$1. Send for circular. E. H. MIXING METALS.-All the hard gray American charcoal iron, Ashcroft, Boston, Mass.
- Wanted .- Machines for manufacturing Pails, Tubs, and Matches. Also, competent man to superintend construction of buildings, and manage all parts of business when complete. Address, with descriptive circulars, price, etc., No. 266 Lexington avenue, New York.
- Turbine Water Wheels, Portable and Stationary Engines, Gang and Circular Saw Mills, Rolling Mill Machinery, and Machinery for Axe Manufacturers, manufactured by Wm. P. Duncan, Bellefonte, Pa.

For best Power Picket Header in use, apply to Wm. P. Duncan, Bellefonte, Pa.

- New Blind Wirer and Rod Cutter. B. C. Davis & Co., Binghamton, N.Y.
- Self-testing Steam Gage. There's a difference between a chronometer watch and a "bull's eye." Same difference between a self-tester and common steam gage. Send for Circular. E.H.Ashcroft, Boston, Mass.

See advertisement of L. & J. W. Feuchtwanger, Chemists, N.Y.

- \$3.50. Stephens' Patent Combination Rule, Level, Square, Plumb, Bevel, etc. See advertisement in another column. Agents wanted.
- American Boiler Powder Co., Box 315, Pittsburgh, Pa., make the only safe, sure, and cheap remedy for "Scaly Boilers." Orders solicited.

Belting that is Belting .- Always send for the Best Philadelphia Oak-Tanned, to C. W. Arny, Manufacturer, 301 Cherry st., Phil'a.

E. Howard & Co., Boston, make the best Stem-winding Watch in the country. Ask for it at all the dealers. Office 15 Maiden Lane, N.Y.

For mining, wrecking, pumping, drainage, and irrigating machinery, see advertisement of Andrews' Patents in another column.

The best place to get Working Models and parts is at T. B. Jeffery's, 160 South Water st., Chicago.

Brown's Coalyard Quarry & Contractors' Apparatus for hoisting and conveying material by iron cable. W.D.Andrews & Bro,414 Water st., N.Y.

- Improved Foot Lathes. Many a reader of this paper has one of them. Selling n all parts of the country, Canada, Europe, etc. Satalogue free. N. H. Baldwin, Laconia, N. H.
- Peteler Portable R. R. Co. contractors, graders. See adviment. E. P. Peacock, Manufacturer of Cutting Dies, Press Work.
- Patent Articles in Metals, etc. 55 Franklin st., Chicago.
- Peck's Patent Drop Press. Milo Peck & Co., New Haven, Ct.
- Millstone Dressing Diamond Machine-Simple, effective, durable. For description of the above see Scientific American, Nov. 27th, 1869. Also, Glazier's Diamonds. John Dickinson, 64 Nassau st., N. Y.

Steel name stamps, figures, etc. E.H. Payn, M'f'r, Burlington, Vt.

- Cold Rolled-Shafting, piston rods, pump rods, Collins pat. double compression couplings, manufactured by Jones & Laughlins, Pittsburgh, Pa.
- Keuffel & Esser 116 Fulton st., N.Y., the best place to get 1st-class Drawing Materials, Swiss instruments, and Rubber Triangles and Curv
- For Solid Wrought-iron Beams, etc., see advertisement. Address Union Iron Mills, Pittsburgh, Pa., for lithograph, etc.
- For the best Self-regulating Windmill in the world, to pump water for residences, farms, city buildings, drainage, and irrigation, address Con. Windmill Co., 5 College Place, New York.
- The Merriman Bolt Cutter-the best made. Send for circulars. H. B. Brown & Co., Fair Haven, Conn.
- Taft's Portable Hot Air, Vapor and Shower Bathing Apparatus.

Facts for the Ladies. In 1870, Mrs. W. made, with her Wheeler & Wilson machine, 2,255 vests, besider doing her family sewing for six persons.

"The firm of Geo. P. Rowell & Co. is the largest and best Advertising Agency in the United States, and we can cheerfully recommend it to the attention of those who desire to advertise their business scientifically and systematically in such a way; that is, to secure the largest amount of pub-

After an exhaustive trial, at American Institute Fair for 1870, Pratt's Astral Oil was pronounced the safest and best.

Dyspepsia : Its Varieties, Causes, Symptoms, and Cure. By E. P. MIL-LER, M.D. Paper, 50 ets.; Muslin, \$1. Address MILLER, HAYNES & Co.

Vital Force: How Wasted and How Preserved: or. Abuses of the Sex aal Function, their Causes, Effects, and Means of Cure. By E. P. MILLER M.D. Paper, 50 cts. Address MILLER, HAYNES & Co., 41 West Twenty-sixth st., New York city.

- CORRESPONDENTS who expect to receive answers to their letters must, in all cases, sign their names. We have a right to know those who seek information from us: besides, as sometimes happens, we may prefer to address correspondents by mail.
- SPECIAL NOIL.—This column is designed for the general interest and in-struction of our readers, not for graduatous replies to questions of a purely business or personal nature. We will publish such inquiries, honcover, when paid for as advertisements at 1.00 a line, under the head of "Business and Personal."

of which car wheels and all such work are made, requires more heat and a longer time; to melt than soft iron, especially Scotch pig, which is the

most fluid and the easiest to melt of any iron. Consequently, unless the

melter exercises good judgment in charging, the Scotch pig will melt and

run off before the car-wheel iron is melted. If G. H. P. be particular in the quality and strength of his iron, he will make better results by using

soft American charcoal pig, with old car-wheel iron. It will make stronger castings, mix better, and melt more uniformly; but he should

always recollect in charging his furnace that soft iron will melt before

hard in the same position, in the cupola. I also think he had better use a

larger proportion of soft pig, as every time cast iron is melted it becomes

harder, so much so that iron which can be filed and turned with ease, when

HARDENING TALLOW.-If E. H. H. will use one pound of

alum for every five pounds of tallow, his candles will be as hard and white

stirred until they are both melted together, and run in molds.-F. O. H.

L. L., of N. Y.-According to Ure, strass is made as follows:

8 ounces of pure rock crystal or flint, in powder, mixed with 4 ounces of

saltof tartar, are to be baked and left to cool. The mixture is then

poured into hot water, and treated with dilute nitric acid till it ceases to

tasteless. The frit is then dried, and mixed with 13 ounces of white lead,

and this last mixture reduced to fine powder, and washed with distilled

water: 1 ounce of calcined borax is now added to every 12 ounces of the

mixture, the whole rubbed together in a porcelain mortar, melted in a

clean crucible, and poured out into pure cold water. This melting and pouring into water must be done three times, using a clean, new crucible

each time. The third frit is pulverized, five drachms of niter added, and

then melted for the last time, when a clean, beautiful white crystal mass

C. M. S., of Wis .- There are no precise proportions observed

to saturate the gravel with the hot tar without surplus.

of silicate of soda, and allowing it to stand till dry.

more economically applied when the cut-off is used.

in making the coal-tar and gravel walks of which you speak. The aim is

of the gravel are simply to be filled, and the amount required to do this

depends wholly upon the coarseness or fineness of the gravel employed.

W. P. T., of Ohio.-Two teams of horses, of equal strength,

pulling against each other, by means of a rope, would create the same

tension in the rope, as one of the teams drawing against an immovable

W. H. B., of Va.-Ice can be made by compressing air, and,

after it has radiated its heat, allowing it to extract the heat of water with

be raised, by compressing the air to one fourth its original volume, to 317° Fah; and the air would radiate and absorb again, in expanding, about 190

E. T. H., of Ga.-The friable sandstone, a specimen of which

you send us, may, we think, be rendered firmer by soaking it in a solution

J.A. V., of Ohio.—The use of steam expansively, by means

of cut-off appliances, enables the expansive force of the steam to be utilized, which cannot be done when the pressure is maintained at one

standard, and steam admitted through the full stroke. It takes no more power to do a given amount of work in one case than in the other, but

more boiler capacity, and more fuel, as the working power of the steam is

Geo. F. R., of Ohio .- Type metal is composed of 3 parts lead

and 1 part antimony for smallest, hardest, and most brittle types; 4 oflead

and 1 of antimony for next grade; 5 of lead and 1 of antimony for medium

sizes; 6 of lead and 1 of antimony for larger types; and 7 of lead and 1 of

antimony for the largest.

effervesce, and the "frit" is then washed in water till the water comes off

. The alum must be dissolved in water, then put in the tallow, and

re-cast will often be found too hard to work. -J. T., of N.Y.

All reference to back numbers must be by volume and page.

APPLICATIONS FOR EXTENSION OF PATENTS.

HARVESTERS.-William T.B. Read, Chicago, Ill., has petitioned for an extension of the above patent. Day of hearing, May 17, 1871.

MODE OF FASTENING SHEET METAL ON ROOFS, ETC.-Asa Johnson, Brooklyn, N. Y., has petitioned for an extension of the above patent. Day of hearing, May 3, 1871.

METHOD OF PRINTING IN COLORS.-Rosalie Croome, Brooklyn, N.Y., has petitioned for an extension of the above patent. Day of hearing, May 3, 1871.

MACHINERY FOR COMPRESSING GASEOUS BODIES .- William A. Royce Newburgh, N. Y., has petitioned for an extension of the above patent. Day of hearing, May 10, 1871.

PLOWS.-John S. Hall, Pittsburgh, Pa., has petitioned for an extension of the above patent. Day of hearing, May 17, 1871.

CARRIAGE WHEELS. - James D. Sarven, New Haven, Conn., has petitioned for an extension of the above patent. Day of hearing May 24, 1871.

New Patent Law of 1870.

INSTRUCTIONS

HOW TO OBTAIN

LETTERS-PATENT

Information about Caveats, Extensions, Interferences, Designs, Trade-Marks, and Foreign Patents.

ropean Patent Agency is that the practice has been tenfold greater han that of any other agency in existence, with the additional advantages of having the aid of the highest professional skill in every department, and a Branch Office at Washington, that watches and supervises cases when necessary, as they pass through Official Examination.

MUNN & CO.,

Ask Special Attention to their System of doing Business.

Consultation and Opinions Free.

Inventors who desire to consult with MUNN & Co. are invited to call at their office 37 PARK Row, or to send a sketch and description of thein vention. which will be examined and an opinion given or sent by mail without charge.

A SPECIAL EXAMINATION

is made into the novelty of an invention by personal examination at the Patent Office of all patented inventions bearing on the particular class. This search is made by examiners of long experience, for which a fee of \$5 is charged. A report is given in writing.

To avoid all possible misapprehension, MUNN & Co. advise generally, that inventors send models. But the Commissioner may at his discretion dispense with a model-this can be arranged beforehand.

MUNN & Co. take special care in preparation of drawings and specifications If a case should for any cause be rejected it is investigated immediately, and the rejection if an improper one set aside.

NO EXTRA CHARGE

is made to clients for this extra service. MUNN & Co. have skillful experts in attendance to supervise cases and to press them forward when necessary-

REJECTED CASES.

Munn & Co. give very special attention to the examination and prosecution of rejected cases filed by inventors and other attorneys. In such cases a fee of 5 is required for special examination and report; and in case of probable success by further prosecution and the papers are found tolerably well prepared, MUNN & Co. will take up the case and endeavor to get it through for a reasonable fee to be agreed upon in advance of prosecution.

CAVEATS

Are desirable if an inventor is not fully prepared to apply for a Patent. A Caveat affords protection for one year against the issue of a patent to another for the same invention. Caveat papers should be carefully prepared. The Government fee on filing a Caveat is \$10, and MUNN & Co.'s charge for preparing the necessary papers is usually from \$10 to \$12,

REISSUES.

A patent when discovered to be defective may be reissued by the surren der of the original patent, and the filing of amended papers. This proceeding should be taken with great care.

DESIGNS, TRADE-MARKS, & COMPOSITIONS Can be patented for a term of years, also new medicines or medical com-

Glynn's Anti-Incrustator for Steam Boilers-The only reliable preventive. No foaming, and does not attack metals of boilers. Price 25 cents per lb. C. D. Fredricks, 587 Broadway, New York.

For Fruit-Can Tools, Presses, Dies for all Metals, apply to Bliss & Williams, successor to May & Bliss, 118, 120, and 122 Plymouth st., Brooklyn, N.Y. Send for catalogue.

2d-hand Worthington, Woodward and Novelty Pumps, Engines 25 to 100 H.P., 60 Horse Loc. Boiler. W.D. Andrews & Bro., 414 Water st., N.Y. Agents wanted, to sell the Star Bevel. It supersedes the old style. Send for Circular. Hallett & White, West Meriden, Conn. English and American Cotton Machinery and Yarns, Beam H. H. A., of N. Y .- The lining up of a beam engine, in a Warps and Machine Tools. Thos. Pray, Jr., 57 Weybosset st., Providence, R.I For small, soft, Gray Iron Castings, Japanned, Tinned, or Bronzed, address Enterprise Manufacturing Company, Philadelphia, Conklin's Detachable Rubber Lip, for bowls, etc., works like a charm. For Rights, address O. P. Conklin, Worcester, Mass., or A Daul, Philadelphia, Pa.

To Ascertain where there will be a demand for new machinery or manufacturers' supplies read Boston Commercial Bulletin's Manufacturing News of the United States. Terms \$4 00 a year.

evaporating power, and in that sense is proper. If its evaporative power be sufficient to perform a given amount of work, it is proper to estimate that work in horse power. Water can not be pumped out of a pipe from which atmospheric air is excluded. A pipe driven into a soil impervious to air, can never yigld water unless the water is forced up by hydraulic power, as in the artesian system.

A. P. Y., of N. Y .- You will find descriptions of iron enamelling processes, on pages 297 and 408, Vol. XII. of this journal. It can be done in colors. See Ure's "Dictionary of Arts and Manufactures."

H. C., of Pa.-We do not think increasing the size of the journals of your car axles from 2½ inches to 6 inches diameter, would make them run lighter.

vessel, is a process for which no definite mode of procedure is exclusively applicable. It is an operation to which common sense and judgment must be brought, and for which each engineer must be a law unto himself.

J. S., of Va.-The use of horizontal propellers to force balloons up or down is not a new suggestion. It has been tried, but, we be lieve, without much practical success.

J. T. S., of N. Y .- You will find further information on the subject of transmitting power by compressed air, in our editorial columns of last week.

pounds, and useful mixtures of all kinds.

When the invention consists of a medicine or compound, or a new article of manufacture, or a new composition, samples of the article must be furished, neatly put up. There should also be forwarded a full statement of its agredients, proportions, mode of preparation, uses, and merits. CANADIANS and all other foreigners can now obtain patents upon the sam terms as citizens.

EUROPEAN PATENTS.

MUNN & Co. have solicited a larger number of European Patents than any other agency. They have agents located at London, Paris, Brussels, Berlin, and other chief cities. A pamphlet containing a synopsis of the Foreign Patent Laws sent free.

MUNN & Co. could refer, if necessary, to thousands of patentees who have had the benefit of their advice and assistance, to many of the principal business men in this and other cities, and to members of Congress and prominent citizens throughout the country.

All communications are treated as confidential.
