APPLICATIONS FOR EXTENSIONS.

Applications have been duly filed, and are now pending, for the extension of the following Letters Patent. Hearings upon the respective applications are appointed for the days hereinafter mentioned:

21,213.—MACHINE FOR FORGING NAILS.—S. S. Putnam. July 31, 1872.
21,275.—ICE STAND.—H. A. Roberts. August 7, 1872.
21,311.—SECURING PLANE IRON.—L. Bailey. August 14, 1872.

EXTENSIONS GRANTED.

20,243.—FINGER OR GUARD FOR HARVESTERS.—L. Miller.
20,192.—EXPANSIVE BIT.—W. A. Clark.
20,245.—SEWING MACHINE GUIDE.—L. W. Serrell.

EXTENSIONS REFUSED.

Extension of Robert Wilson, of Milton, Pa., for fly nets. Patented May 11, 1858; refused May 10, 1872.
Extension of G. W. Morse, of Greenville, S. C., for cartridge cases. Patented May 11, 1858; refused May 11, 1872.
Extension of Jeroboam B. Creighton, of Akron, Ohio, for railroad cars for day and night service. Patented May 18, 1858; refused May 9, 1872.

Value of Extended Patents.

Did patentees realize the fact that their inventions are likely to be more productive of profit during the seven years of extension than the first full term for which their patents were granted, we think more would avail themselves of the extension privilege. Patents granted prior to 1861 may be extended for seven years, for the benefit of the inventor, or of his heirs in case of the decease of the former, by due application to the Patent Office, ninety days before the termination of the patent. The extended time inures to the benefit of the inventor, the assignees under the first term having no rights under the extension, except by special agreement. The Government fee for an extension is $100, and it is necessary that good professional service be obtained to conduct the business before the Patent Office. Full information as to extensions may be had by addressing

FOREIGN PATENTS---A HINT TO PATENTEES.

It is generally much better to apply for foreign patents simultaneously with the application in the United States. If this cannot be conveniently done, as little time as possible should be lost after the patent is issued, as the laws in some foreign countries allow patents to any who first make the application, and in this way many inventors are deprived of valid patents for their own inventions. It should also be borne in mind that a patent is issued in England to the first *introducer*, without regard to the rights of the *real* inventor; therefore, it is important that all applications should be entrusted to responsible agents in this country, who can assure parties that their valuable inventions will not be misappropriated. The population of Great Britain is 31,000,000; of France, 37,000,000; Belgium, 5,000,000; Austria, 36,000,000; Prussia, 40,000,000; and Russia, 70,000,000. Patents may be secured by American citizens in all of these countries. Mechanical improvements of all kinds are always in demand in Europe. There will never be a better time than the present to take patents abroad. We have reliable business connections with the principal capitals of Europe. A large share of all the patents secured in foreign countries by Americans are obtained through our Agency. Address

NEW BOOKS AND PUBLICATIONS.

SPECTRUM ANALYSIS EXPLAINED, illustrating its Uses to Science, and including the Theory of Sound, Heat, Light, and Color. Being No. 3 of "Half Hour Recreations in Popular Science." Price 25 cents. New York: Lee, Shepard, and Dillingham, and John Wiley and Son.

PRINCIPLES OF POLITICAL ECONOMY; with Some of their Applications to Social Philosophy. By John Stuart Mill. New York: Lee, Shepard, and Dillingham; Boston: Lee and Shepard.

A full and exhaustive criticism of this book will not be expected in this place. The renown of its author as a logician, the lucidity of his style, and the clearness of his reasoning are well known. Of his doctrines, it must be said, and their author would doubtless allow, that there are exceptional circumstances in various forms of human society that might render their application unadvisable. But the book is worthy of study by everybody who is interested in the welfare of the community in which he lives. Succinct, clear, and terse, without a superfluous paragraph in it, the book is full of mental "meat;" and any student, either of political economy, logic, or the language, will do well to master its contents.
