arts; it is $\$ 5$. We do not think that a rea plain, minute and simple work has yet been publishers.
"E. W. of Maine,"-We willobey your re quest next week.
W. L. of N. J."-We shall answer next week
E. B of Conn."-We shall favor your request as soon as possible. We were no aware that the revolving box was so old.
E. I. P. of Pa."-We were led to commit the error, from the tone of your letter. We shalì send you word by mail where to get the information regarding the English engine.
"J. P. of N. Y."-It is not possible to discriminate upon the best architectural work for your purpose. There are books on Architecture in this city from $\$ 1$ up to $\$ 100$. We would select the best for you a
price you would desire to pay
W. L. of Ohio."-The Galvanic Battery deposits crystals of any salt, also metals from their solutions. A battery of charcoal and zinc plates will generate electric fluid for a long time, if only buried in the ground. No acid is used for this purpose. A perpetual battery is also made by dropping the acid on sand, surrounding the plates with the moist sand and thereby preventing their oxidis tion. No benefit has resulted to agricultural science yet by the employment of electricity in the stimulation of vegetation.
"A. H. of Maine."-You shall hear from us by mail.
"R. C. of Mass."-We have answered you by mail.
"R. W. F. of Pa."-It would not be possible to secure a patent for your invention on account of the want of novelty.
"E. D. $\mathscr{C}$. of Ct."一We shall be able to give you tbe plices of Gutta Percha next week. On hand, a large pile of correspondence which cannot be answered but by mail. We would suggest the necessity of all our correspondents writing in a plain hand and in a brief, yet explicit manner. Some are too brief to be understood and others sometimes too lengthy. A careful review of a letter after it is written would be both a benefit to us and some of our worthy correspondents.

## Valuable Bine.

A rich mine of plumbago (black lead,) has been opened in Jaffrey, N. H., at the foot of the Monadnock mountan. Six tuns were brought down from Fitzwilliam on the Che shire Rail Road last week. It brings about $\$ 75$ per ton.

Patent Agency.
Applications for Patents made at this office, on the most reasonable terms. Neat drawings, specifications, and engravings of the first character, and cheaper than anywhere else. No tices of new inventions, Agency for the sale of Patent Rights, and all business of that nature, promptly attended to. Those who have patent rights to dispose: of will find a good opportunity and field for their sale-such as Horse Power Machines and Waterwheels of every description. The largest circulation in the wecid for advertisements of inventions, \&c.

## Zoucrtisentents.

ge- This paper circulates in every State in the Union, and is seen principally by mechanics and
manufacturers. Hence it may be considered the best medium of advertising, for those who import or man
ufacture machinery, mechanics tools, or such ware ufacture machinery, mechanics tools, or such ware The few advertikements in this paper are regarded with much more attention than those in closel printed dailies.
Advertisements are inserted in this paperat the ollowing rates:

## A GOOD INVESTMENT

for a practical man with a monerate capital
I HAVEa large well built three story house 40 feet I square, situated on a stream that affirdss a column
of water under a head of seven feet, of about 808 square inches four merths in the Jear, about 400
ten months and 150 square inches all the year, with
all the water power, wheels, \&c necessary. Located 13 miles Northeast of Memphis necessary. Located
the Mississ East o
Misipi River, in Shelbỳ county, Tennessee which I wish to sell or rent or enter into a co-part
nership with a worthy. energetic. honest man (none nership with a wor thy. energetic. honest man (none
other need apply, who understands the busाness,
and who will furnish all the necessary machinery and whowillfurnish all the necessary machinery
forstarting a Cotton Factory. For such an establishment the location is said to be a very eligible one
and of which I have no doubt. Any quantity o cotton in the seed can be had within one or two miles thanelsewhere in the Union. It is sitnated on the
divding line betwen the Cotton and Grain grow-
ing regions of the Mississpit ing regions of the Mississsppi Valley. I would star
the factory myself but for my total Ignorance of the the factory myself but for my total ignorance of the
business. therefore I want a sterling man of good
eh aracter, who understands the business thorough y and practically, to get the cotton machinery an either rent the site at $\$ 1000$ a year, or purchase it
at $\$ 3000$ or enter into a partnership with me which 1 would prefer HE furnishing all the machinery and
I all the balance. I would propose commencing op all the balance. I would propose commencing op.
erations early in the spring or summer. The Yimit
of this proposition shall be the 1 st of March next. f this proposition shall be the lst of March'next.-
