TO CORRESPONDENTS.

" D. E. of Mass."-We cannot see any advantage to be gained by the two wheels, but a loss by the friction of the chain. The power is all in the water, and it can all be applied to one breast wheel as well as to two by your plan. Give the subject a little more consideration and we have no doubt but you will agree with our opinion. Your manure spreader is a good apparatus and a very useful one and you should take measures to get a patent.

"E. G. of N. Y."-Your leather splitting machine is good and we do not think there is anything in the way of your getting a patent but it is scarcely possible to get any person to engage in purchase before a patent is secured. The reason of this is, that a number of people have recently sold inventions that were not new, and which have been all lost to them.

"S. M. of Ohio."-As we predicted to you, it would have been better to have paid a decent price to those who could explain and thoroughly illustrate the subject, instead of igniting the powder by throwing cold water upon it.

"J. V. R of N. Y."-Inertia means the passive nature of water.

"G. G. of Mass."-Your papers were sent to you last week.

"A. M. P. of Pa."-Get a steam engine by all means, you will find it the most economical in your part of the world.

"E B. of Connecticut."-We are much obliged to you for the pamphlet on the pendulum engine, and shall give it due attention Is it at present in fall and economical operation ?

"J. L. of Michigan."-Get an engraving published in the "Scientific American." It will cost only \$6, and the block yours which

will answer afterwards for hand-bills &c. "S. W. McA. of Va."-We can furnish a cut of your Lathe tor \$7.

"M. J. of Geo."-No oscillating engines

are used here. There is some little prejudice against them. "J. H. G. of N. C."-Of what use would

it be to employ two wheels, when the same object can be obtained by one. The less friction the better, all clear gain of power.

"W. M. Davis of Maine."-Your communication is unavoidably delayed untill next week.

"J. C. of Mass."-The papers of your dredging apparatus will be fowarded in a few days. They have required much writing.

" M. C. of Ala."-You shall hear from us again. Your Table is excellent.

" R. McQ of Texas."-You will find something to suit you on the last page.

"R.S.I. of S. C."-We are not able to give the exact proportion of ingredients at present, but may soon.

" Inventor's" article is inadmissible. Nothing personal or abusive can find a place in our columns

The Western Journal.

We have received No. 5 of this valuable magazine, published at St. Louis, by Travers and Risk. It contains an excellent article on the Geology of the Mississippi valley, and another on steam navigation to China.

Holden's Magazine.

We have received the June No. of the above Magazine. Its contents are as usual excellent The second volume commences with the July number, and is to be illustrated with splendid engravings.

Universal History.

No. 3 of this valuable work is just published by Graham, Tribune buildings, price 25 cents. This number treats of Egyptian works of art and on that account is very valuable, as the remains of Egypt's ancient greatness will be a subject of interest to all while man exists on the face of the earth.

Every Man his own Cobbler.

Scores of our neighbors are now clamping along the streets in shoes of their own soleing. Mr. Armstrong, William street, this City, has established an agency where soles are purchased by the public, and also a composition for attaching them to shoes and boots. A pair of either with foundations like a sieve, may be rendered by the new process warm and water-tight in five mintues.

Patent Agency.

Applications for Patents made at this office, on the most reasonable terms. Neat drawings, specifications, and engravings of the first character, and cheaper than anywhere else. Notices of new inventions, Agency for the sale of Patent Rights, and all business of that nature, promptly attended to. Those who have patent rights to dispose of will find a good opportunity and field for their sale-such as Horse Power Machines and Waterwheels of every description. The largest sirculation in

the world for advertisements of inventions, &c.

Advertisements.

ITHIS paper circulates in every State in the Union, and is seen principally by mechanics and manufacturers. Hence it may be considered the best medium of advertising, for those who import or manufacture machinery, mechanics tools, or such wares and materials as are generally used by those classes. The few advertisements in this paper are regarded with much more attention than those in closely printed dailies.

Advertisements are inserted in this paper at the

THE above is an engraving of an Improved Wrench, invented by George C. Taft, and ma-nufactured by Newcomb, Dixle & Co. Worces

▲ Wrench, invented by George C. Tart, and ma-nufactured by Newcomb, Dirle & Co. Worces-ter, Massachusetts. A, is the handle ; B, the stock ; C, the screw ; D, the slide, and E, the head. The advantages of this Wreach are apparent. In the inside of the stock there is a rack which is wor-ked by the screw C, and this rack is covered up free from dirt, and cannot be injured by a fall or oth-er heavy substance on its working pnrts, (this qual-ity no other Wrench possesses yet patented.) This screw can be worked with the thumb and all used with one hand. The ease with which this can be done must make this Wrench invaluable to every mechanic, as the fixed jaw is in the handle and the larger the nut to be screwed up or down the greater the lever power. The above Wrench will be ready for the trade on the 20th of June next. Orders addressed to the sub-scribers will meet immediate attention. NEWCOMB, DIXIE & CO Worcester, Mass., May 1838 m27 tf

Important to the Public.

IT must not only be important, but interesting to the public to know at what establishment in New York Hats or Caps of the best quality and lateststyle can be purchased at the cheapest price THE place is Knox's, where may be found every variety of a Hat from a shilling Palm Leaf to a Five Dollar Bea-ver, or a Cap from at wo shilling oil cloth to a beau-tiful new style cloth for \$1.50. Knox's is THE place—128 Fulton street. m203m

Fire and Burglar's Alarm.

rire and Burglar's Alarm. THIS important and humane invention to which We often recur, is getting to be truly appreciated. Any one desiring to embark in a safe and profitable business which requires but little capital is request-ed to communicate to this office where rights may be obtained for any Territory which is not already occupied. The inventor will instruct purchasers of rights how to adjust the machines properly, without extra charge. ∯G-Address at this Office (nost neid)
