

The Golden Land.
The golden mania is still raging in our goodly city. Recent accounts from California ly city. Recent accounts from Government reports all in the shade. No less than a country of 12,000 square miles is said to be all shining with the yellow sands. Soune have wanted us to go and teach the gold gatherers the way to pick it up scientifically as the fellows have got to be perfec heathens in turning up their noses at small pickings, but like Paul, we will abide by the good old ship.
Next week we will give some practical di rections to those who are bound for the "Gol den Land."

## The Cholera.

The cholera has scarcely created the leas: sensation in our City and is on the decrease at the Hospital. It may be said never to have entered our city. There are two kinds of cholera, the ordinary and malignant. The malignant is what is termed the Asiatic chole ra and tends to depress the vital powers an produce death. It appears to be both infec tions as well as an epidemic.
The characteristic symptoms of the disease, are purging, sickness, vomiting and pain, and either of these may occur before the rest.

When the disease begins in the lower bow els. without much pain, it may be carried of by draught, repeated several times if neces sary viz. tincture of Rhubarb, 2 or 3 spoon-fuls-incture of ginger or essence of pepperment, half a tea spoonful-tincture of opium 10 or 20 drops with a inttle syrup, or suga and water, the whole not exceeding an ounce and a balf. If the pain is very violent the same dose should be doubled with 4 tea spoon fuls of the tincture of catechu, with a little prepared chalk mixed in the syrup, with the addition of a Miffe gum water. When th disease sets in violently-no time must be lost-the patient must be put to bed and covered with warm blankets and bottles with warm water, and flannels dipped in warm water applied to the stomach and repeated while the coldness and pain continues. The fol lowing liniment should then be rubbed ove the pained parts,-four or five parts of the tincture of soap and opium, two parts of cam phorated oils and two of spirits of hartshorn of the ordinary strength. In twenty minutes, or half an hour warmth is generally felt and the pulsations of the heart and arteries gene rally become more full. Tincture of opium must be used if the above liniment cannot be obtained. While the inclination to vomit con tinues little drink should be taken, and that fittle about every half hour, made up of two teaspoonsful of the tincture of rhubarb, half a teaspoonful of ginger and 15 drops of the tincture of opium. In the stage of the great est depression, stimulants are the only means to be depended on, and these should be used with the greatest care. Castor oil, next to rhabarb, is the mildest purgative, when it can be retained on the stomach.

## San Francisco

The population of San Francisco, California in July last, was 5000 souls. The Goverment troops and passengers who have since gone out and are going, will swell the number by June next to 9000 . More dry goods have been hipped to that region since the gold fever, than could be made up in clothing in a year if all the inhabitants were tailors. Ready made clothing has been sent in the same proportion, and of broadcloths sufficient have gone to clothe all in the country for five years to come. The Journal of Commerce advises that the emigrant to California, if he has any money, should take it with him in half dollars, and when there, purchase what he may want (which will be very little in the shape ol clothing) to enable him to dig gold in summer
Did you ever hear an orator who had'at to dd " just one word"

## MTERARI NOTICES

The Gold mines of Callifornia.
We have now for sale a very interesting work bearing the above title, with a Map of the Gold Region and a historical view of tha rich country. The information is derived from official documents and other authentic sources, making a volume of nearly 100 pages Send your orders, post paid, to Munn \& Co. and they shall receive prompt attention-price 25 cents.

## Callfornia

Mr. H. S. Tanner, No. 156 Fulton st., has aid upon our table a new Map of California and New Mexico, showing the boundaries according to the last treaty, and the location he Gold regions, with a supplementary Map of North America, delineating the whole $1 o u t e$ by land and sea to San Francisco, with a table of distances, \&c., carefully compiled from authentic sources. We have carefully examined it and do not hesitate in pronouncing it not only valuable to those anticipating going there, but usetul to every individual desiring knowledge of the newly acquired territory.

## Godey's Lady's Book.

The January number of this splendid month ly has appeared upon our table and is truly the richest number of any Magazine we ever saw. The "dawn of love" a beautiful mezotint appears as the first engraving and the "Tableaux of life" drawn and engraved by Tucker as the second. The latter is a splendid engravieg and is well worth the price of a years subscription and could not be bought of us for that price were it not possible to procure another. It does the designer of it credit and is an honor to the publishers. The pre sent nurnber of Godey's commences a new vo lume and we can do no more than to advise every one that desires a beautitul work to subcribe for it. Published by L. A. Godey Phiadelphia, at $\$ 3$ per annum and may be had of Long \& Brother, 46 Ann st. New York.

Pictorial Nationai Library.
This very excellent periodical has made its monthiy call again and is teeming with inte resting matter as usual. It is truly a National posed of American tales and events, besides the engravings are American views exclusive 19. Published by William Simonds \& Co., Boston, and may be had of G. W. Adriance, 177 Bowery, this city.

The Student of Salamanca.
We do not besitate in pronouacing this one of the most thrilling and interesting tales ever published. It conveys to the reader many important facts connected with the Carlist war in Spain and is written in a clear, graphic, and powerful style. The reader could scarcey lay asidesuch a work without feeling benefited and interested. Fublished by H. Long \& Brother, 46 Ann st. Price 25 ceats.
Mrs. Gort's New Novel, Castles in the Air Mrs. Gore is truly one of the clearest and most vigorous writers of the present day, and we must confess that she has amply illustraed her powers in her new novel. We promise for all who read it a rich entertainment. It is published by H . Long \& Brother, 46 Ann t. Price 25 cent3.
angelina Laxinore or the Life of a Beauty
From a hasty perusal of the above story, we are disposed to recommend it as one of uncommon interest. It is written in fine taste, and combines numerous and profitable advise to mothers. The narrative is exceedingly well developed. Published by H. Long \& Brother 46 Ann st. Price 25 cents.

## Smithsonian Instituse.

The Board of Regents of the Smithsonian Institution met on Wednesday week last at the room of the President of the United States, (in the Capitol,) and immediately adjourned to Monday next, in order to give the newly re-elected members, Messrs. Choate and Hawley, an opportunity of attending the first business meeting. The above named gentlemen were advised by telegraph of their re-election.

A pipe of cast iron 14 inches in diameter and three-fourths of an inch thick, will sustain a head of water of 600 feet. One of oak, 2 inches thick and of the same diameter, will suatain a head of 180 feet.

Sclentife American This journal, although not ranking as a Magazine, is nevertheless, one of the very best and valuable publications of the country. It is published in the city of New York, by Munn \& Co, at $\$ 2,00$ per annum.-Every number is embellished with a large number of well executed engravings, illustrative of late inventions or works of mechanism; and, judging from this department alone, it is quite evident that the proprietors of the paper are at great expense. We know not how many subscribers to the Scientific American there are in Washington county; but we do know that it ought to be in the hands of every Me chanic and scientific man in the community Frequently as we have called attention to th great value of this journal, we still feel incli ned to say more than ever in behalf of it and urge it more strongly upon the patronage of the intelligent people of Washington county. Any person desiring to see copies, may do so by calling at our office, and any information desired by those wishing to subscribe will be cheertully granted by us, so far as we are able
[The above generous and unsolicited compliment to the Scientific American is copied from the "Examiner" published at Washington, Pa. For which the Editor will please accept our hearty thanks, and best wishes. We are now publishing the 4th volume of our Journal and have no reason to complain of the generous support it has received from the industrious and intelligent mechanics of the country. To say we have not been benefitted by the spontaneous testimonials of the Press generally would be ungrateful, for it is impossible to deny that our efforts have been brough into notice in a great measure by such fatter ing recommendations. We now circulate between 11 and 12,000 copies weekly, and our readers may rest assured that no expense shall be spared on our part to render the Scientific American instructive and interesting.
The worst wish we have for the Examiner is that its circulation may extend to twice our number, and judging from the manner in which it is conducted we shall be surprised to hear that any family in the county is with out this pleasant companion.

Great Vintage in France

The Courier des Etats Unis, of this city says "Never was the vintage so abundant as it has been in 1848. In all the vine-growing districts in France there is a deficiency of cask for pressing the grapes. In Bearn it is so dif ficult to gather in the crop on account of its abundance, that the attempt has been aban doned. In many vineyards the mules are al lowed io eat it ; and at Laresnes, severa wine growers, desirous of èmptying their cel lars, have put up the following notice outside their houses :
"Wine at will-drinking here at a penny an hour"
In the neighborhood of Paris, also, the crop has been so enormous that the peasants dare no longer bring their grapes into the city for sale. The disposal of them wholesale would be uncertain, and they would incur the muni cipal tax of six centimes per kilogram. In consequence of this a species of grape-fair has been established outside several of the marke barriers. On one occasion, lately, the whole camp of the Champs Elysees turned out to buy their provisions, and re-entered together, each man carrying a kilogram and a half, three pounds weight, which is the quantity allowed to be brought in duty free. They had the air of returning from a marauding ex pedition.

## Good Recomdation.

Mr. Walker, Secretary of she Treasury, pre poses to take off all duties on the trade between Canada and the United States, and also to es tablish international free trade with Mexico He also proposes to reduce the price on pabic lands to 25 cents an acre.
We should like to see free trade with the whole of the American Continent, and this will yet be when they are all gradually merged in one great federal compact for the good of the whole.
Tke bill before the Vermont Legislature to exempt homesteads from attachment has been defeated in the House-86 to 80.

The Pensacola Gazette an a channcl. or two Pensacola Gazette says that untila a year entrance of our harbor to within half a mile of the Perdiod Bay, a distance of eight or tea miles, had an entrance into our bay, at a point near the residence of Major Chase, the chan nel at one time admitting vessels drawing se ven and eight feet, and all the vessels laden with brick for the buildiag at Fort McRae passed through this channel into the lagoon to discharge their cargoes. By the action of the surf rolling in from the ocean, the en trance was gradually closed. Thus the lagoon remained for three months, constantly receiving accessions from the little streams making into it, until it was two or three fee above the level of the bay and sea. At this time a young man residing in the neighbor hood, "just for the fun of the thing," cut little ditch through the sand at a low poin near the fort, when the water commenced running, and in a few hours it was cutting away everything before it, and in a day or two there was a channel of more than a hundred yards wide, and in the deepest place, twelve or fourteen feet. The channel has ever since been encroaching upon the fort and a few months since began to wash its base Major Chase, seeing that the beautiful fort hat had been erected under his supervision at a cost, probably, of a million of dollars, was in danger of being blown up by an unexpected enemy, and knowing that the structure ested upon a sandy foundation, turned his attention to stopping the breach, and used a number of methods; but all falled, until the happy expedient suggested itself of procuring some 20,000 corn sacks, which were filled with sand, sewed up and tumbled into the channel, and in a short time the water wa successfully stopped and the tort saved. The Major is now endeavoring to divert the water into another channel but at a point where he fort is not in such dangerous proximity."

## Singular Aftalr.

Some two weeks since a merchant in Banor, Me, in emptying a tea chest, found in he bottom a snuff box containing a five dollar orit an the Dever, N. H. Bank, and attactied it, the following epistle written on a piece of paper of the quality generally used by the Chinese in putting uptea in pound packages
Dear Mother-I Piekin, Dec. 1846.
Deare, and have am a prisoner in a Tea you would go to Washingten and get our gorermment to interfere and obtain my release. enclose you a five dollor note; it was preented to me by an American gentleman ; it is of no use to me, but it may be to you. Edward Lovell
Directed to Mrs. Nancy Lovell, Boston, Mass,
Miss Marietta Smith, the young lady who caused so many stories to be circulated about abduction and so on, has at last been found. She ran away from this city and went to Bos. on to learn the trade of a milliner. She has displayed but little sense or affection, or she would have in some manner let, her parenta know that she was free, and well.
A young lanyer having been asked by a udge whether in the transmigration of souls he would prefer being turned into a horse or an ass? An ass, quickly replied the lawyer. Why, says the judge ? Because I have heard on ass being a judge, but never a horse, was the reply.
A cow that broke her leg in England recently, was supplied with a wooden one, and strange to tell, in two months she became exceedingly expert in the use of it, by crippling on her three and one and thumping her neighon he
bors.

The value of domestics exported from Boson since January has been $\$ 1,983,10663$, an increase of 11,400 bales and cases from same time last year.
The state of Missouri is about to construct a levee along the west bank of the Mississippi from New-Madison, to the state line of Arkansas, a distance of fifty-four miles.
The Ohio Penitentiary is lighted with gas. It enables the prisoners to read good books during the long evenings, after the labors of
the day are over. the day are over.
