

The Inauguration and the Message.
Zachary Taylor is now President of th United States. He was inaugurated on last Monday at the Capitol, which was crowded with innumerable visitors from every part of our country. His message is brief, clear and manly. Its import is " to be guided by the constitution, administer the laws impartially to make honesty, capacity and fidelity indis pensable requisites to the bestowal of office." The following gentlemen compose his cabinet and let us hope and pray that his administra tion may be peaceful prosperous and happy :
John M. Clayton, of Delaware, Secretary of State; Wm. M. Meredith, of Pennsylva nia, Secretary of Treasury; Thomas Ewing of Ohio, Secretary of the Howe Department ; Wm. B Preston, of Virginia, Secretary of the Navy; George W. Crawford, of Georgia, SeNavy; George W. Crawford, of Georgia, Se-
cretary of War; Jacob Collamer, of Vermont, cretary of War ; Jacob Collamer, of Vermont,
Postmaster General ; Reverdy Johnson, of Postmaster General ; Rever
Maryland, Attorney General.

A Great Telegraphis Enterprize
Messrs. Beach, proprietors of the New York Sun, have negociated for a line of Telegraph, soon to be erected, from Washington to the Sun's editorial reom, and from Boston to the same centre. The object of the enterprize is to get the news more correct than by the present telegraphic companies, and to get it at all times, untrammelled by any other kind of bu siness on the wires, fb but that of newspaper literature. This is the greatest undertaking on record, we believe, connected with newspaper enterprize; and, what is very generous, other papers are invited to share the news on ex ceedingly moderate terms.

Newicotton
A new species of Cotton, called the Prolific Pomegranate surpassing any of the gossypium family, has been grown in Mississippi by Gen. Mitchell, of Warren Co. The tops and side branches are all thickly studded with bolls. The stalk does not attain a height usually of more than four or five feet, but every portion of the plant is literally covored with bolls, which are sustained in an upright position by the strength and vigor of the stem and branches. The chief peculiarity of this plant is that the stem and branche have no joints as in other kinds, and although the bolls are so numerous, there can be no inconvenience in picking. The staple is beautiful, and far more silky than the best Pe tit Gulf.

How to behave at the Court Dinner.
The following insipid directions for persons attending the inauguration, last Monday, were given in that sublimely insipid sheet, the Court Journal, at Washington:
$\propto$ A glass bowl half. filled with tepid water, and scented with a few drops of orange-flower water, is placed before each guest, into which he should insert the extremities of his fingers noiselessly, and then wipe them, also a small glass tumbler half filled with tepid water is sometimes placed iu the bowl; this is used to rinse the mouth, and is a universal custom on the continent of Europe; a small quantity of this water is taken into the mouth, noiselesslf, and then the head is bent forward over the bowl, and the water is allowed to run out of the mouth into the bowl--the mouth is then wiped, and the napkin is taken away with the bowl."

New Fire Department.
A citizen of Middletown, Conn. proposes (instead of paying firemen) that the inhabitants should organize themselves into a mutual company for the purpose of insurance, and also of putting out fires. With a view to bring the citizens into his scheme, the said mutual fire department is to stand by idly, as quiet spectators, and let the property of those who do not belong to the company burn up, in case it should take fire !
A larye colony of Belgiate is about proceeding to California.

## LITERARY NOTICES.

## Holden's Dollar Magazine

The March number of this unrivalled and justly celebrated Magazine has made its appearance apon our table, as usual. We ar glad to know that the enterprise of the pub lisher in furnishing such a cheap publication, has been responded to by a large list of subscribers. This number presents well execued engravings of Niagara Falls; Louis Napo eon the first President of France; Elihu Bur ritt the Learned Blacksmith, and also an ex cellent likeness of the Rev. Dr. Baird, accom panied by Sigma's usual interesting biography in consequence of an unexpectedattack of the yellow fever our friend Holden, has been re moved to the California Hospital, but his rea ders may expect that his spirit will continue breathing life and interest to the magazine The literary contents for this month are unu sually interesting.

## The Miners Galde and Metiallurgist's DI-

 rectory.This is a very neat pocket volume, edited y J. W. Orton, Esq. one who is well quali ed for such a task, and published by A. S Barnes \& Co., New York. It is a hand book which should be in the possession, not of any ne class of men, but all classes. To person who are intending a journey onward to the gold or mining regions, it would be an excel lent companion.
The New England Farmer for March is excellent number. Thisis a valuable period ical.
The Western Journal, published by Tarver and Risk, St. Louis, Mo. is one of the best Magazines for useful information in the Wesern world.
We have received the Report of the survey of the Cleveland and Pittsburg Railroad, Ohio, accompanied with a beautiful map, by he Chief Engineer, Geo. R: Eichbaum.The Report is a very able one.
Hon. Thos. H. Bentop and Hon, Geo, Ashmun will please accept our thanks for valuable public documents.

## Properties of Charcoal.

The properties of carbon are numerous hey have been partly studied, but every day produces new facts: when it is in a state of ignition, it posseses some very remarkable proerties.
When a piece of ignited charcoal, which is very clean and free from ash, is immersed in o a solution of a metallic salt, it reduces the metallic salt which is contained in it, and the metal itself is deposited with all its natural brilliancy on the piece of charcoal. Thus, the alts of tin, copper, platina, palladium, mer cury, silver and gold, \&c., furnish most bril liant deposits.
M. Lazowski has remarked, he says, that when the salts are too acid or too much concentrated, no effect is produced. The dilut solutions of the salts of copper often yield, by covering the charcoal, the most varied shades of color, from the finest azure blue to that of
metallic copper. The parts of the charcual etalic copper. The parls of deposited in preference, are the extremities; whilst other metals cover equally all the surface of the re ducing body; at other times, and this occur with the protochloride of tin, the metal ap ears in very brilliant crystals, disseminated on the periphery of the charcoal.

## United States and Scotiand,

The Glasgow Post says that " a project is in contemplation of bringing Glasgow into direct steam communication with the United States of America. In fact, preparations for carrying the undertaking into effect have already commenced. A contemporary mentions that the keel of the first vessel of this line has just been laid down by Messrs. Denny, Brother, of Dumbarton. The vessel is to be of iron, and of 1,000 tons burden She is to be on the screw principle, and fully shiprigged. The vessel will be propelled by engines of 250 horse power, which are in course of construction by the Messrs. Caird, of Greenock. The new steamer is intended to ply directly from the Broomielaw, the name of the ship wharf in Glasgow.

American Antiquities. Several specimens of American antiquities have recently arrived at New Orleass which uins near an a traveller from comprise two idols acrificial basin hew from solid blocks of sandstone and are in good rom solid locks of ling undoubtedly the god of sacrifice, and one of the most important. It is of life size, and the only complete specimen of the kind that has ever been discovered and brought away from the country. The anatomical proportions and beauty of this statue are not admired, but the elaborate work upon its entire surface attracts at once the attention of the beholder. It is principally ornamental, interspersed with symbols of mythology, and occasional hiero glyphics. It has two faces representing youth and old age. The right hand forms an aperture, in which a light burned during the time

The smaller idol is the god of sorrow, whom worshipperscame to offer up their de otions for the tears it shed, and the relief it afforded them in their griefs. This statue is diminutive, the carvings plain, and the whole simply devised. The sacrificial basin measures two feet in diameter and displays much kill and truth in the workmanship. It is held by two serpents entwined, with their heads re-versed-the symbol of eternity, which enters largely inte the mythology of the ancient Egyptians.

## Wells.

Artesian Wells are more common in the South, than is perhaps, imagined here. A writer in the Charleston Evening News states that they exist in hundreds in Green, Dallas, Wilcox, Perry, Sumter, Louisiana, and Arkansas. They vary in depth from 800 to 900 feet. In Albany the water is invariably found on passing through a certain rock which sinks or nips slowly in the South west. Several have been undertaken in South Carolina, near Charleston, at various times, but have been unsuccessful and were abandoned. One is in depth, the object being to supply the city with water. Buring for water in this coun try has not been generally as successful as in France, for the reason that in the latter region scientific men are always consulted before such speculations are finally resolved on.

## Had and good Luck at a Flre.

Drring the burning of the Broadway House in Albany N. Y. on the 25th ult. so sudden was the progress of the flames, that the inte ior was burned nearly away before all the odgers could remove their baggage. One genleman, who had, before retiring for the nigh placed his gold watch on the table, under his hankerchief, and his pocket book, containing $\$ 150$, in bed, under his pillow, was more fortu nate than the rest. When the alarm of fire wasgiven, in the confusion of the moment he eft them behind, and only roccollected them when it was too late to return. After the fir was subdued, he took a shovel and went to work to remove the rubbish, when, indeed, he discovered not only pocket book and mo ney, but his watch, which was only slightly discolored by smoke.

## More or Callfornia Gold.

The Washington Union publishes the fol owing anecdote about the gold soil of Cali tornia. We consider it to be the best story extant upon the subject and deserving a me extant
dal.
".
" We have just heard a very curious anec dote from an American who has recently returned from Liverpool. He obtained it from Gen. Armstrong, who had it immediately from the gardener of the Earl of Darby himself. The Earl lives within about eight miles of Liver pool. He had just received some bulbous roots from California, wrapped in the dirt of their native country; and as a mere matter of curiosity, he directed the earth to be washed for the purpose of seeing whether it contaned any particles of gold. His instructions were followed, and the result was nearly a handful of gold dust and shells from the washing of the earth."

Air is 816 times lighter than water, not 8

## Tea and Nay Machine.

A yea and nay machine has been fitted up in the Pennsylvania Legislature. The members vote by touching keys (for yeas and nays) placed at each desk ; the result of each touch being a perforation on the yea or may side of a printed list of members named. One vote of 58 yeas and 40 nays, was recorded in less thantwo seconds.

## Fall of the White Water Canal Cuivert and Aqueduct.

We learn from the Cincinnati Commerical that on the night of the 21 st ult., owing to the sudden departure of the frost from the materials, or something else, the culvert under the aqueduct at Mill Creek gave way; andas the aqueduct rested on the culvert, it followed as a consequence, making a total smash of the whole! The aqueduct and culvert cost an imasense sum at first, and their being. rebuilt two or three times, seems in no way to lessen expense. The aqueduct is some 200 or 300 feet long : the cost is some $\$ 100$, 000!

## Certain Rights.

All men are endowed with inalieuable rights-except poor men. All men who do not pay their honest debts are great scampsexcept those who cheat on a large scale. All men are born free and equal-except negroes.. All men are sinners-except those who helong to the Church. All men are allowed to. think and act freely-except those who work for a living. All well dressed, accomplish. ed women are ladies-except factory girls.

## A Roman Prophecyor Washington.

In one of Cicero's fragments, the following emarkable sentence occurs, written some eighteen hundred years ago: "Far across the ocean, if we may credit the Sybiline books, and after many ages, an extensive and ich country will be discovered, and in it will arise a hero, whoby his counsel and arms will deliver his country from the slavery by which she was oppressed. This shall he dounder favorable auspices; and oh! how much more admirable will he be than our Brutus and Camillus? These predictions were known o our Accius, and embellished with the ornaments of poetry."
[The above is going therounds and it would be a treat to many to know in what fragment of Cicero's works, the above is to be found.
The English man-of-war steamer Cormorant, was recently supplied at Port Camosack, Vancouver's Island, with sixty-two tons of good coal in three days. The coal at Chili and Port Famine is also abundant, and the Pacific may be easily navigated by steamers.
All the Orange trees in Florida have been killed by the late severe frost. On one plan. tation, that of Capt. Bennett, near Apalachicola, four thousaud trees were killed in one night. The loss falls heavier upon the planers.

The American Institute passed a resolution not long since against the admission of perons not members of the Institute to the meetings. Under this regulation the public, or whose enlighten ment the Institute was es ablished, will be shut out from its learned and luminous discussions.
A line of telegraph is now being constructed from Nashville, through Clarksville and Parucah, to St. Louis. The first section was completed some daysago.
In a letter to Mr. Crosby, an extensive English Iron manufacturer, it is stated that the Bank of England has become mortgagee in possession of several iron manufacturing es possession of several iron manufacturing es-
tablishments. The writer complains that in tablishments. The writer complains that in
making offers of sale k.e is constantly met with making offers of sale L.e is constantly met with
the reply that the Bank of England will sell. considerably lower.
The Duke of Argyle and sons, and Lads Blantyre, have been excommunicated by Bi shop Trover, a tractarian, for attending divine service in Glasgow, in a Presbyterian church What of it .
One of the monstrous bed plates for the Steamer Atlantic was cast by Messrs, Stillman, Allen \& Co. on Friday, at the Novelty Works. It weighs over thitty-four tons. A. number of persons were present on the occa sion and all were highly gratified.
