Dr. Gilbert professes to remove and ous. The natives who rear the young duck in cure the most inveterate cancers, without the the surrounding country know exactly the day agency of any cutting instrument. He extracts when it will be ready for removal; and in two the foreign and poisonous substance from the days after the shell is burst, the whole of the flesh, by the application of plasters of his own, little creatures are sold and conveyed to their discovery, and thus entirely eradicates the dis- new quarters. ease. We have seen innumerable complete cures effected in this manner. It is vain to endeavour to refute such evidences as have been presented to our senses on this subject. We are forced to believe them whether we will or not. A few days since we were invited to be present at the extraction of a Fungus, or bloody tumor, from the shoulder of Mr. Artemon Hill. a well known citizen of New Orleans. We were called away at the time, but a few days afterwards we met Mr. Hill, who told us that he was nearly well, and that a tumor as large iron steamships. This butt was erected on citizen is content with so small a variety.as two fists had been taken out of his shoulder the mud, at a distance of 460 yards from the by Dr. Gilbert, without using a knife, or draw- Excellent, and the practice took place at high ing a drop of blood. The former was in a rapid process of healing, and, the substance extracted filled a medium-sized jar. Certainly were fired. The result show pretty conclusuch facts as these are of wonderful character, and we, who belong not to the faculty, will hardly be held to a very severe accountability against batteries, for it is now tolerably cerfor yielding to such strong proofs. To all per- tain that the fatal effects of every shot receivsons, therefore, who are afflicted with sores, ed on board would be quadrupled by the tencancers or tumors of any kind, we say go to | dency of the ironwork to splinter, fly off, and Dr. Gilbert's, (72 Magazine street,) and if destroy everything in the vicinity of the conhe don't cure you, your case must be a very cussion, more especially when the ball itself obstinate and difficult one.

[The above is from the N. O. Delta; know ing this to be a virulent disease, and one which cut off an acquaintance of ours, one of the finest of fellows, we deem it right to give publicity to anything apparently truthful respecting it.

Scientific American.

Egg Hatching in China.

The hatching houses is a long shed with mud walls and thickly thatched with straw. Along the ends and down one side of the building are a number of round straw baskets, well plastered with mud, to prevent them from ta. ple worshipped this snake. Iron War Vessels not so Strong as Wooden Walls.

England has always boasted of her wooden walls, and recent experiments at Portsmouth, in that country, in testing the effect of shot and shell upon the sides of iron vessels, justi. fy the claim to superiority of oaken sides implied in the boast. Capt. Chads, of the Excellent, had a large iron boat made, representing the two sides of an iron vessel, each side of the strength and consistency of one of the water from guns of several calibre, and various charges of powder, both shot and shell, sively that iron vessels are not fit to cope with vessels of wood, neither are they fit to go is also likely to split and break to pieces likewise.

A Runaway Locomotive.

On New Year's day, 1850, a catastrophe, which it is fearful to contemplate, was averted by the aid of the telegraph. A collision had occured to an empty train at Gravesend and the driver having leaped from his engine, the latter started alone at full speed for Lon- cotton is said to be established beyond dispute. don. Notice was immediately given by tele- This is certainly news : last year we had acgraph to London and other stations; and while the line was kept clear, an engine and other arrangements were prepared as a buttress to receive the runaway. The superintendent of the railway also started down the line on an good American cotton gins have been sold this engine; and on passing the runaway he re- year. There is an English factory for making versed his engine and had it transferred at the next crossing to the up-line, so as to be in the rear of the fugitive; he then started in the chase, and on overtaking the other he ran into in Silliman's Magazine, has given the results it at full speed, and the driver of the engine of a microscopic examination of the accumutook possession of the fugitive, and all danger was at an end. Twelve stations were passed in safety; it passed Wolwich at fifteen miles iteeth. Animalcules and vegetable products an hour; it was within a couple of miles of were found in every instance except two. In London when it was arrested. Had its approach been unknown, the mere money value day, and a thread was passed between the of the damage it would cause might have teeth daily. Windsor soap was also used by equalled the cost of the whole line of tele-jone of these two persons with the brush. Dr. graph.

Southern Vegetable Diet.

We can have vegetables the year round, and with so little labor, that it is a matter of wonder to a provident man that an independent The cabbage tribe will give us boiled vegetables from first of May to the first of January, even if we could not grow the cabbage heads we then have the turnip until April or May.-We can have sweet potatoes from January to January. Then there are pumpkins, parsnips, and winter squashes for winter; squashes for summer; beans, peas, corn, &c., for summer turnip tops, spinach, asparagus, &c, for spring. What living for we of the South !-But fruits in their season are not to be forgot ten. Strawberries from 15th of April to 15th of May; then Chickasaw plums until first or middle of June; figs, then raspberries; nutmeg peaches; soon after, Early York, Early Tillotson, and other peaches; June apples; Nothing makes a man so stupid as too much | Early Catharine, Jargonelle, and other pears

Now, tain to meet death either by drowning, or from 'it'' during the remainder of your life, for no other than this one reason, viz., you could not do without it."

Cotton Growing in the East Indies.

The New Orleans cotton planted in the District of Dharwar, present a most favorable appearance; 23,000 acres have been planted; and the successful cultivation of American counts from India of the complete abortion of India cotton cultivation-now a new face is put upon the matter this year. Is it to affect the market, or what? A great number of them in the Candish district.

Infusorla on Teeth.

Dr. H. I. Bowditch, of Boston, in a paper lation on the teeth of 49 individuals, most of whom were very paticular in their care of the those cases the brush was used three times a B. had tried various substances for destroying the animalcules, and especially tobacco, which seemed to be without effect. Soap suds and the chlorine tooth wash, however, were potent destrovers.

Cure for the Dropsy.

Take one half cup of black mustard seed, one large root of horse radish, two cloves of garlic, one lump of saltpetre about the size of a large nutmeg; chop these all fine, then put them in a quart bottle, and pour it full ofgood rye whiskey; then let this remain for three days, after which take one table spoonful three times a day.

An immediate cure for drunkenness has been liscovered by a French chemist. It is acetate of ammonia dissolved in sugarand water.

[These two cures are selected; we cannot warrant one of them, but rather express our strong doubts about their value; as they relate to cases of experimental physics, we give them for what they are worth, premising that if a man drinks the acetate of ammonia, he will not get drunk on cider.
