# Scientific American.

## TO CORRESPONDENTS.

A. L., of N. Y .- Every steam boiler is a vacuum pan, it may be said; the only air that is in one is that of the water; your plan would save nothing. B. M., of R. I.—A long time prior to the establishment of galvanism as a science, it had been observed that if two different metals were placed in contact, under water, they were subject to a rapid oxidation though the water had no perceptible action upon them when they were alone. It had also been observed that ancient inscriptions, made of some metals, were totally defaced, while those made of pure metals were in excellent preservation. It is a beau tiful science, and it is vet in its infancy

S. W., of Texas .- It would be impossible for us to accomplish all you desire for the want of time and facilities to attend to it; parties from this section would not be willing to undertake such a risk without positive assurance of success.

J.L. O., of Lynn.-We think your plan of spring bedstead new and patentable, and request you to send a model; as to whether it will pay or not depends upon contingencies not properly within our province to decide upon.

T. C., of Va.-We have not time to write you a full receipt about the Chromatype. The supply pipe for your water ram is not material, but as your dis charge pipe is five inch dia. (a very large size, truly) it will require a fall of 12 feet to raise all the water 12 feet, or a 6 feet fall to raise half the water, or 4 feet to raise one-third the supply of water; this is not counting a little loss by friction; you can therefore judge what size of supply pipe you require. W. J. J., of Mass.-We have none of the numbers of

Vol. 4 that you ordered.

S. H., of Ind.-The idea of applying steam directly to the periphery of a wheel to act by its expansive force to propel it, is well known to those familiar with the history of the rotary engine.

W. B. H. of Ohio.-You say you are poor; we are honest. We could not obtain a patent for your invention, much as you think of it, and we therefore would not wish you to lose your money. We would say the same to a rich man. No power can be gained from a lever, as you know. The old revolving buckets and rollers, we think, are preferable to your plan, because the weight of the water is applied nearly vertically, but there are mechanical difficulties in the way of your plan, as in the old bucket plan.

W. J., of Pa.-The best material you can use for the floats, is india rubber; it is the dearest, butthere is nothing like it for air-tightness. The Goodyear India Rubber Warehouse, this city, will furnish you with what you want, but perhaps you can find one of them in the India Rubber Company stores in Philadelphia,

F. H. M., of N. Y .- When the application for the patent is filed, it is policy, usually, to substitute new claims, although you can retain such as were made in the caveat, if you prefer.

G. K, of O .- Minifie's Drawing Book is probably the best work you could procure as a text book :price \$3; postage by mail, 64c., which must be pre paid.

C. F., of N. Y .- The copy of the Sci Am., that we sent you, will be convincing proof, we think, that your invention is very old.

W. S., of S. C.-Dr. Reid resides in Rochester, N Y., and could doubtless afford you such information about the sumac as you desire, and we think you would do well to communicate with him upon the subject. It would cetainly afford us much pleasure to do so were it possible.

G. B., of Ark .- We should be pleased to see your drawings, but probably could not publish them during this Volume. The series of papers on Hydraulics, which were published in last Volume, will satisfy for the present.

G. M. C. of Me.-II. can use his machine just as h pleases after getting a patent; he may sell or not, as he likes, No one has a right to make or sell his machine. If he took more than two years to perfect his machine, B has no right to use it in any shape. If he has had it in public use for more than two years before applying for a patent, he will, in all likelihood, lose all the advantages of it. It is his duty to apply for a patent or file a caveat before the two years expire.

K. E., of N. Y .- Your plan for whitening sugar by creating a vacuum under the drainer, is a very good and practicable plan, but it will not refine sugar so fast as the new Centrifugal Machines, which can be made to work with greater rapidity.

Money received on account of Patent Office busi-

the date of the reception of orders, unless the writer expresses a wish to receive the back numbers. Whenever our friends order numbers they have missed-we always send them if we have them on hand. We make this statement to save time and trouble, to which we are subjected in replying when the numbers called for cannot be supplied. 

#### **Back Numbers and Volumes**

In reply to many interrogatories as to what back numbers and volumes of the Scientific American can be furnished, we make the following statement: Of Volumes 1, 2 and 3-none.

Of Volume 4, about 20 Nos.; price 50 cts. Of Volume 5, all; price, in sheets, \$2; bound, \$2,75

Of Volume 6, all price in sheets, \$2; bound, \$2,75.

# American and Foreign Patent

American and Foreign Patent Agency INPORTANT TO INVENTORS.---The under-signed having for several years been extensively engaged in procuring Letters Patent for new mecha-nical and chemical inventions, offer their services to inventors upon the most reasonable terms. All business entrusted to their charge is strictly confi-dential. Private consultations are held with inven-tors at their office from 9 A. M., until 4 P. M. In-ventors, however, need not incur the expense of at-tending in person, as the preliminaries can all be ar-ranged by letter. Models can be sent with safety by express or any other convenient medium. They should not be over 1 foot square in size, if possible. Having Agents located in the chief cities of Eu-rope, our facilities for obtaining Foreign Patents are especial attention of one of the members of the fight, who is prepared to advise with inventors and manu-facturers at all times, relating to Foreign Patents.

ers at all times, relating to Foreign Patents. MUNN & CO., Scientific American Office, 128 Fulton street, New York. factur

COGAN VAIL & CO., No. 9 Gold street, New York, agents for George Weil . . York, agents for George Vail & Co., Speedwell Iron Works, have constantly on hand Saw Mill and Grist Mill Irons, Press Screws, Bogardus' Horse-Powers, and will take orders of Machinery of any kind, of iron and brass; Portable Saw-mills and Steam Engines, Saw Gummers of approved and cheap kind, &c. Gearing, Shafting, large and small, cast or of wrought iron. 11tf

WANTED-By a middle-aged man, a situation where he could make himself generally useful by book-keeping, drawing machinery and architec-ture, with a house or engine builder, or railroad con-structor, or in a factory of any description; and could teach drawing and French. Has no objection going to any part of the Union. Direct answer to E. B. French, Chatham Square Post Office, N.Y. 113\*

THE SUBSCRIBER has on hand several impr THE SUBSCRIBER has on hand several impro-vedSteam Engines of superior quality, and made of the best materials, particularly adapted to manu-facturing, saw mills, four mills, &c. He will also make to order, at the shortest notice, engines and bollers of from 2 to 50 horse power, with all their appendages; prices reduced. Also, shafting, mill gearing, saw mills, presses, drills, &c. He has also facilities for furnishing lathes, planes, and scroll chucks, of the most approved styles and patterns, at short notice. Chain pumps always on hand, whole-sale andretail, atNo. 4 Howard st., New Haven, Ct. 10 7\* AARON KILBORN.

Two STEAM ENGINES FOR SALE-Of 3 and 6 horse-power (new); price \$150 and \$200; also, now finishing, 1 1-2 doz., more of those superior 8 feet Slide and Screw Cutting Lathes; price, inclu-ding countershaft, hangers, pulleys, and full set of gearing, \$250. Inquire of CARPENTER & PLASS, corner of Hester and Elizabeth streets, N.Y. 10 2\*

THE SATURDAY EVENING POST, THE Leading Literary Weekly in the Union.—The pro-prietors think it unnecessary to dwell upon the dis-tinguishing features of the "Dost," whose brilliant success, during an existence of thirty years, is a sure guarantee of the future. For the coming year we have made arrangements for the following nouvel-letts :—''Eoline, or Magnolia Vale," by Mrs. Caro-line Lee Hentz, author of Linda, Rena, &c; "Trial and Triumph," by T S. Arthur, author of The Iron Hand, Temperance Tales, &c. &c., &c. The "Post" will also contain, weekly, choice selections, news, bank note list, state of markets, &c. Terms—Single copy, §2 per year, or three yearsfor \$5, in advance. Clubs (to be sent to one P. 0.), 4 copies, \$5; 9 copies, \$10; 14 copies, \$15; 21 copies, \$20, in advance. Ad-dress always post-paid. DEACON & PETERSON, 66 south 3rd st., Philadelphia. A copy of the "Post" will be sent as a specimen to anyone. 105

JOHNSON'S UNEQUALLED SAW GUM-MER for gumming out the test ness for the week ending November 24. N. A., of Ct., \$20; S. M. P., of N. Y., \$20; E. L. N., of Mass., \$32; W. Mc., of N. Y., \$25; J. H. C., of Ohio, \$30; A. S., of Pa., \$10; G. F. F., of Mo., \$50. Chiracter and the forgumming out the teeth of saws, an ar-ticle indispensible for saw mill owners. This article sale by G. A. KIRTLAND, 205 South street, New Street, Street, Street, New South Street, New South Street, New South Street, New South Street, New Street, Street,

TRAUTWINE ON RAILROAD CURVES.— By John C. Trautwine, Civil Engineer, Philadel-phia; just published and for sale by WM HAMIL-TON, Actuary of the Franklin Institute. Price \$1. "This is a really good work, and we heartily re-commend it to our civil engineers."—[ScientificAm. "We have carefully examined this work, and re-gardit as the best that has yet appeared on the sub-ject," &c.—[Am. Railroad Jour. 8 10\*

DOST'S PATENT SLIDING DOOR FRONTS **P**-For Stores and Public Buildings; a new, cheap, and simple fixture for securing store fronts, which renders them fire and burglar proof, has been inven-ted and patented by the subscriber, who is now pre-pared to sellrights. Messrs. Quarterman & Son, 114 John st., N.Y., are general agents. Address (post paid) Wm. POST, Architect, Flushing, L. I. 6 3m

TILTON's Patent Violin.-The undersigned ha-Throw's Patent's Volin. - The undersigned na-ving patented his Violin Improvement, is pre-pared to exhibit it to the public. Being now in New York, he may be found at No. 18 Park Place (Mr. J. Wiley's), where he will be pleased to see such gentle-men as take an interest in his invention. All com-munications'addressed "Wm. B. Tilton & Co.," as above, or at Carrolton, Pickens Co., Ala. 3 12\* WM. B. TILTON.

LEBOW & BLODGETT'S PATENT ROTA. BY SEWING MACHINE.—The undersigned having purchased the right to use, sell, and manu-facture these machines for the States of Alabamaam facture these machines for the States of Alabamaand Mississippi, and their other business engagements preventing them from giving it their personal atten-tion, they are disposed to sell eut their right to the above-mentioned States, or counties in them, if pre-ferred, upon favorable terms. To an energetic and industrious man we will sell upon such terms as will insure a large and handsome profit. Apply to Mr. W. SORUGGS, of the firm of Messrs. Scruggs, Drake & Co., Charleston, S. C., or to WM. MAILLER, De-catur, Ala.

PROFESSOR ALEX. C. BARRY'S TRICO-PHEROUS OR MEDICATED COMPOUND.— Professor Barry does not hesitate to put his Trico-pherous, for the two grand requisites of efficacy and netapness, against any preparation for cleansing, re-newing, preserving, and strengthening the Hair, that has ever been advertised or offered for sale. He chal-lenges the associated skill and science of the medical world to produce, at any price, an embrocation that will reduce external irritation, cure ordinary cuta-neous diseases and severe cuts, sprains, pains, &c. Sold in large bottles, price 25 cents, at the principal office, 157 Broadway, New York, and by the princi-pal merchants and druggists throughout the United States, Canada, Mexico, West Indies, Great Britain, France, &c. 4 12\* Franco, &c.

CLICCHS FOR CHURCHES, PUBLIC BULLD-CLINGS, RALLROAD STATIONS, & c., and REGU-LATORS FOR JEWELLERS.—The undersigned ha-ving stcceededin counteracting effectually the influ-ence of the changes of the temperature upon the pendulum, and introduced other important improve-ments in the construction of clocks, are prepared to furnish an article, superjor in overy response (the high-ers grant wandhed to Yaly Test dual the moment a year) to any made in the United States. Ample opportanity will be afforded to test their qualities. Glass (iluminated) dials of the most beautiful de-scription furnished. Address SHERRY & BYRAM, Oakland Works, Sag Harbor, Long Island, N. Y. "At the Oakland Works of Sherry & Byram there are made some of the finest clocks in the world."— [Scientific American. "Mr. Byram is a rare mechanical genius."—[Jour. of Commerce.

"Mr. Byram is a rare mechanical genius."-[Jour. of Commerce. 5 10
