Scientific American.

TO CORRESPONDENTS.

R. W., of Pa.-There can be no doubt about the excitement respecting reaping machines: we are glad to see such an interest manifested by our farmers for improved machinery, and appreciate your acknowledgments respecting the good which the Sci. Am. has done in this field. We are collecting reliable information respecting reaping machines; we shall publish the same with some engravings in our nextvolume. We shall have something to say sbout old Reapers.

R. S. of Ill.-We know of no manner in which you can prevent parties, who manufacture from the same machine, selling their products to go into the limits of your territory. It is the machine that is patented, and the Letters of Grant do not cover the products. Perhaps your assignor has a special clause attached to his assignments, which confine each as-signee to the sale of the product in his own territory, in which event the party, from whom you received your grant, could interpose and prevent others from obtruding their products upon your territory.

F. A. L, of Mass.-Apatent was granted not long since for embedding imitation of marble chimney pieces, painted on glass, into an iron case, by means of cement.

J. P. O., of Pa.-The information you solicit respecting the price of seamless stocking looms we can not give.

G. D., of N. Y .- We believe your mode of attaching hubs to axles is new and patentable. We have never seen the like before.

S. L. S. of Ohio-We have never seen the machine patented by Mr. Smith, but from the nature of his claim we should think your drill an improvement on his. We are more strongly of the opinion than ever that your machine would receive a patent on certain points, but we could not so well define the particular points on which to base the claims until we have a model to examine. Your subscrip en expired at No. 43, but for the dollar enclosed in your last letter we have re-entered your name for another six months. Sent back numbers.

G. E. D., of Me - The notice must have got into your paper by mistake : your subscription is paid to the middle of next volume.

W. G H, of Pa.-We have now credited you for the whole of Vol. 8.

T. H., of Pa.-Oxygen is not that which make what we call "impure or bad iron," other matters, sulphur, phosphorus, &c., are the evils. Nitrogen would be of no use in a furnace; there would be no combustion without the oxygen. No oxygen is admitted into a crucible; the charcoal doesabsorb the oxygen during combustion.

J. S. of Ohio-It is a common custom, in the East Indies, to hang up mats in the windows of the houses and keep them wet during the hot season. The air passes through the moist mats, and the evaporation enables Europeans to bear the weather tolerably We have never heard of a blanket arranged like a syphon, as you have done, nor has it ever been applied to the same apparatus before. We believe it to be good and patentable.

A. K., of N. Y.-A patent for a life-preserving hat was patented in this country, in 1840, by an Englishman of the name of White. The plan you suggest seems to be precisely the same as the one described in the patent alluded to.

P.S., of Iowa-The Patent fees are required at the time the application is made. It will be necessary that you forward the model to us, accompanied with government fees (\$30), free of expense. The examinations are about three months behind at the Office.

T. S. P., of Pa - The first 26 Nos. of Vol. 7, Sci. Am, we will send you on receipt of \$1. For further information concerning the Voltameter Battery, address George Mathiot, Washington, D. C.

S. B., of 0 .- We regret to be obliged to inform you that neither of the plans you submit are patentable. L. J. G., of Md .- If your pump will work as you have illustrated it by diagram, you have an important invention. The best thing you can do is to build one and try it; we predict it will not operate at all.

B. D. G., of S. C.-If you will turn to the 4th page of your second volume of the Sci. Am., you will find the fullclaims of Howe's Sewing Machine.

G. G. C., of N. Y .- There are more than one pa tented machine for making mouldings. The work is done by machinery in this city, in a number of es. tablishments.

E. C., of Boston-We know of no portable mills with bolts attached that are kept for sale in this city. Your subscription would have expired with ad you not remitted.

Money received on account of Patent Office business for the week ending Saturday Aug. 28:

hers for the week ending saturday Aug. 25: K. & N., of Pa., \$15; E. W. N., of Mass., \$40; T. S, of Pa., \$20; J. W. M., of N. Y, \$20; J. L B, of \bullet , \$65; F. T., of N. Y, \$2; M J, of N. Y, \$20; J F. M., of Pa., \$20; J. D. W., of N. Y., \$30; G. & Co, Pa-ris, \$350; L. B. B., of Vt, \$30; G. & S, of N. C., \$10; J. W. M., of N. H., \$55; J. I., of N. Y., \$33; W. M., of Ga., \$15; W. M., of N. Y., \$55.

Specifications and drawings belonging to parties with the following initials have been forwarded to the Patent Office during the week ending Saturday, Aug. 28 :

C. B., of N. Y.; T. S., of Pa. : M. J., of N. Y.; P. J. C., of Ct; J. J. W., of Mass.; W. N. C., of N. Y.; G. & S., of N. C.; J. I., of N. Y.; T. & U., of K.y., re-issue.

Back Numbers and Volumes.

In reply to many interrogatories as to what back numbers and volumes of the Scientific American can be furnished, we make the following statement: Of Volumes 1, 2 and 3-none.

Of Volume 4, about 20 Nos.; price 50 cts.

Of Volume 5, all but 4 numbers, price, in sheets, \$1 Of Volume 6, all; price in sheets, \$2; bound, \$2,75 Of Vol. 7, all back numbers at subscription price

Patent Claims.

Persons desiring the claims of any invention which has been patented within fourteen years, can obtain a copy by addressing a letter to this office;stating the name of the patentee, and enclosing one dollar as fee for copying,

Patent Laws, and Guide to Inventors.

We nublish, and have for sale, the Patent Laws of the United States. The pamphlet contains not only the laws but all information touching the rules and regulation of the Patent Office. Price 121-2 cts. per copy

Agency

Agency IMPORTANT TO INVENTORS ---- The under-isigned having for several years been extensively engaged in preouring Letters Patent for new mecha-nical and chemical inventions, offertheir services to inventors upon the most reasonable terms. All business entrusted to their charge is strictly confi-dential. Private consultations are held with inven-tors at their offee from 9 A. M., until 4 P. M. In-ventors, however, need not incur the expense of at-tending in person, as the preliminaries can all be ar-ranged by letter. Models can be sent with asfety by express or any other convenient medium. They should not be over 1 footsquare in size, if possible. Having Agents located in the chief cities of Eu-rope, our facilities for obtaining Foreign Patents are unequalled. This branch of our businessreceives the especial attention of one of the members of the firm, who is prepared to advise with inventors and manu-facturers at all times, relating to Foreign Patents. MUNN & CO, Scientific American Office, + 128 Fulton street, New York.

WANTED-A situation by a practical Engineer, in some establishment where the W in some establishment where the services of a first rate man would be valuable. The advertizer is fully conversant with the routine of the drawing office, as well as the building and putting up of en-gines, whether locomotive, marine or other descrip-tion. He is fully competent to undertake any work connected with engineering : has lived five years with Messrs. Hawthorne, of Newcastle-upon-Tyne, England, who took the prize at the World's Fair for Locomotives. Address "S. G.," Box 121, New York P. O. 1*

CHERRY & BYRAM'S AMERICAN CLOCKS HERRY & BYRAM'S AMERICAN CLOCKS, FOR CHURCHES, PUBLIC BUILDINGS, RAIL-ROAD STATIONS, &c. REGULATORS FOR JEW-ELLERS, and other styles, designed for Banks, Off-ces, etc., also Astronomical Clocks. The undersign-ed have introduced such improvements in the con-struction of their, clocks, as to be enabled to warrant them the most durable and accurate (highest grade to vary less than two minutes in twelve months), of any others now in use. Glass dials for illumination furnished at short notice. Address SHERRY & BY-RAM Ochlard Works Sarg Harbor Long Literd

MECHANICS' INSTITUTE CLASSES-Class-es in Architecture, Mechanical, Ornamental, and Perspective Drawing: also in Ornamental and Figure Modelling, Geometry, and Algebra, will be commenced at the Rooms of the Institute, corner of Bowery and Division st., on Monday evening, Oct 1st., 1852. The course will consist of 20 lessonr. Terms, \$4; to Members of the Institute \$1 perterm less. Further information may be obtained from the Actuary, at the Rooms from D A. M. to 10 P. M. JOHN T. FISHER, PETER GRANT, JOHN LAN-DOR-Committee. 51 5*

A **RTESIAN WELLS**—Thomson's patented im-tesian Wells, in search of water or minerals, having been practically tested, capitalists, land proprietors, miners, and others, are informed that rights are for sale for any part of the United States. The machines can be had of the patentee, and are warranted; they come cheaper than the usual boring apparatus, are more managable, bore more rapidly, with but little increase of labor, however deep, and will go to depthemuch greater than the present system admits of. The cleaning is done in a fraction of the usual time. Communications will be answered cheerfully and workisgmodels sent on receipt of \$5. JOHN THOMPSON, 504* 75 Otter st., Kensington, Philadelphia.

50 4* 75 Otter st., Kensington, Philadelphia.

To STEAM ENGINE BUILDERS, OWNERS, and Engineers.-The subscriber having taken the agency of Aschroft's Pressure Gauges, would recommend their adoption to those interested. They have but lately been introduced into this country, but have been applied to many of our first-class river and ocean steamers, and on many rail-roads, on all of which from their simplicity, accu-racy, and non-liability to derangement, they have given the utmost satisfaction. CHAS. W. COPE-LAND, Consulting Engineer, 64 Broadway, N. Y. 50 5*

W ood work the PLANING MACHINES, on hand and manufactured to order, of supe-rior quality, at reduced prices; warranted perfect. Also steam engines and other machinery, by JOHN H. LESTER, 57 Pearl st., Brooklyn, L. I. 502*

DATENT RIGHTS FOR SALE-The subscri ber having secured a patent on his improvement on operating doors to houses, would like to dispose the operating dors to houses, would nice to inspose of town, county, or State rights, on very cheap terms. The invention is a good one, and has four-teen years protection by Letters Patent. Engra-wings of this invention will be found in another co-laum of this paper, and for further particulars ad-dress WM. RIPPON, Providence, R I. 484*

WARRANTED CAST STEEL - About 30 ton **WARRANTED CAST STEEL**—About 20 tons assorted sizes, warranted quality cast-steel, to close the sale of a special lot; it is particularly adapted to machinists use, and will be sold in lots of 500 lbs. and upwards, at 33 1-3 per cent. less than cost or price of the best imported. Amongst the sizes are square, 1-2, 5 8, 7-8, 1 1-8, 1 1-2, and c. flat. 1 by 3-8, 1 3 8 by 1-2, 1 1-2 by 1-2, 1 1-2 by 3-4, 1 1-4 by 5-8. Also small and large sizes: also rolled 11-8 by No 4, 1 1-4 by No 4 wire gauge. Round 5-16, 7-16, 9-16, 5-8; it is well worth the attention of consu-mers. JOHN W. QUINCY, 81 John st. 49 4*

MERICAN RAILWAY TIMES-This is a MERICAN BAILWAY TIMES-This is a A large weekly journal, issued on Thursdays, well filled with matter concerning every element of the Railway System, viz., financial management, con-struction, depreciation, improverifeut fail running and machinery, - and every other subject connected with the general economy of the system, furnished from the pens of the most intelligent engineers and prac-tical railway men in the United States. It likewise contains intelligence upon all the railway enterpri-zes of the country; statistical tables of receipts, ex-penditures, and income; reports of railway law ca-ses; movements of money and trade; review of the money market; prices current of stocks, etc., etc. John A. Haven; Editor. Price \$3 per annum. HA-VEN & JONES, publishers, 27 Devonshire street, Boston. Mass. A Boston. Mass.

A signee's sale of Machinists' Tools : these tools have been in use about four months, and consist of Planers, Lathes, Dilis Presses, and Universal Chucks, which are for sale from 20 to 25 per cent. less than cost. For particulars address (post-paid) JOHN PARSHLEY, New Haven, Ct. 49tf

scruction of their clocks, as to be enabled to warrant them the most durable and accurate (highest grade to vary less than two minutes in twelve months), of any others now in use. Glass dials for illumination furnished at short notice. Address SHERRY & BY-RAM, Oakland Works, Sag Harbor, Long Island, N. Y. "At the Oakland Works of Sherry & Byram there are made some of the finest clocks in the world."— [Scientific American. "Mr. Byram is a rare mechanical genins"] [Y-TRON FOUNDERS MATERIALS-viz. : good

BEARDSLEE'S PATENT PLANING MA-BEARDSLEE'S PATENT PLANING MA-boards and Plank.—This recently patented machine is now in successful operation at the Machine shop and Foundry of Messrs. F. & T. Townsend, Albany N. Y.; where it can be seen. It produces work supe-rior to any mode of planing before known. The number of plank or boards fed into it is the only limit to the amount it will plane. For rights to this machine apply to the patentee at the abovenamed foundry—or at his residence No. 764 Broadway; Al-bany. GEO. W. BEARDSLEE. 23tf

MACHINERY.--S. C. HILLS, No. 12 Platt-st. N. Y. dealer in Steam Engines, Boilers, Iron Pla-ners, Lathes, Universal Chucks, Drills; Kase's, Voa Schmidt's and other Pumps; Johnson's Shingle Ma-chines; Woodworth's, Daniel's and Law's Planing machines; Dick's Presses, Punches and Shears; Mor-ticing and Tennonig machines; Belting; machinery oil, Beal's patent Cob and Corn mills; Burr mill and Grindstones; Lead and Iron Pipe &c. Letters to be noticed must be post-paid. 26 tf

Wood's IMPROVED SHINGLE MACHINE **WOOD'S IMPROVED SHINGLE MACHINE** -Patented January 8th 1850, is withoutdoubt the most valuable improvement ever made in this branch of labor-saving machinery. It has been thoroughly tested upon all kinds of timber and so great was the favor with which this machine was held at the last Fair of the American Institute that an unbought premium was awarded to it in prefer-ence to any other on exhibition. Persons wishing for rights can address (post-paid) JAMES D. JOHN-SON, Bridgeport, Ct.; or WM. WOOD, Westport; Ct., All letters will be promptly attended to. 22tf

To INVENTORS—The subscribers will enter into arrangements, on the most reasonable terms, for furnishing Drawings, Patterns, and Models, believ-ing that they have one of the most thorough and sci-entific men, in that line of business, to be found in New York. Their object is merely to fill up time, they not having sufficient work of their own to keep him in steady employment, and do not like to have him leave for fear they could not obtain his servi-ces when required. Apply at Dunlop's Manufactu-turing Emporium, No. 36 Gold street. 41 13* FRASER & EVERITT.

PAINTS, dc. dc.-American Atomic Drier Graining Colors, Anti-friction Paste, Gold Sise, Zino Drier, and Stove Polish. QUARTERMAN & SON, 114 John st., 23tf Panters and Chemists

JOHN W. GRIFFITHS-Ship Builder and Ma-nine Architect, 658 Fourth st., N. Y., furnishes models and draughts of all description of vessels, with the computation of stability, capacity, displace with the computation orstability, capacity, displace-ment, and necessary amount of impulsion. Propel-ling power located and proportionably adapted to the form of the vessel, whether sailing or steaming. Mr. G. also superintends the construction of vessels, and may be consulted upon all subjects pertaining to the various departments of the science or practice of ship building. Draughts forwarded by letter to all parts of the words, and to any desired scale; all letters must be post-paid.

Lathes FOR BROOM HANDLES, Etc.-We Locontinue to sell Alcott's Concentric Lathe, which is adapted to turning Windsor Chair Legs, Pillars, Rods and Rounds; Hoe Handles, Fork Handles and Broom Handles.

Broom Handles. This Lathe is capable of turning under two inches diameter, with only the trouble of changing thedies and pattern to the size required. It will turn smooth over swells or depressions of 3-4 to the inch and work as smoothly as on a straight line—and does excellent work. Sold without frames for the low price of \$25—boxed and shipped with directions for setting up. Address (post paid) MUNN & CO. At this Office. At this Office.

1852 TO 1856.----WOODWORTH'S PA-1852 To 1856.....WOODWOHTH'S FA-beting, and Moulding Machines. - Ninety-nine hun-dredths of all the planed lumber used in our large cities and towns continues to be dressed with Wood-worth'sPatent Machines. Price from \$150 to \$760. For rights in the unoccupied towns and counties Of New York and Northern Pennsylvania, apply to JOHN GIESON, Planny Mills Albany, N. Y. 26ff

BONARD'S MACHINERY DEPOT, 109 Pearlest and 60 Beaver, N. Y.-Leather Banding Manufactory, N. Y.-Machinists's Tools, a large as-sortment from the "Lowell Machineshop," and oth-er celebrated makers. Also a general supply of me-chanics' and manufacturers' articles, and a superior uplite of a the torust Vactor Boltime quality of oak-tanned Leather Belting. 45tf P. A. LEONARD.

PATENT CAR AXLE LATHE-I am now ma-nufacturing, and have for sale, the above lathes; weight, 5,500 lbs., price \$600. I have also for sale my patent engine screw lathe, for turning and chucking tapers, cutting screws and all kinds of common job work, weight 1500 lbs., price \$225. The above lathe warranted to give good satisfaction. J. D. WHITE, Hartford, Ct. 39 26*

407

 W. F., of Pa.—Your plan for gathering fruit may be very good, but there is nothing patentable about it. B. M. H., of Ind —We are unable to discover from your description that you have made any invention whatever. You certainly would not ask for a patent on asquare box, because it was made water-tightand the applying such a box for any specific purpose would not require invention. Who is the next man with a lfe preserver? We have had scores of let- ters on the subject of life preservers since the burn- ing of the learry Clay, and not one of them suggests a new idea. G. M. R., of Pa.—Your bundle of drawings and manuscript has arrived, but we cannot afford the time it would occupy to even read all your commu- nications without attempting to decypher your dia- grams. Send us \$5 and we will report on all the inventions. 	CAUTION-Whereas, certain persons are manufacturing and selling Fan Elast Separators, or Winnowing Machines, which infringe upon my patent, which was issued on the 8th day of April, 1851. This, therefore, is to caution all persons against purchasing any right or privilegas of any person whose machine conflicts with mine, as set forth in my Letters Patent, as I shall hold every trespasser of my rights to strict account. Any person holding powers of attorney from me, which have not been legally recorded, are cautioned against disposing of territorial rights, or manufacturing and selling machines, and the public are likewise cautioned against purchasing rights of such persons. J. L. BOOTH, Patentee Cayua Fawing Boards J. L. BOOTH, Patentee Cayua Fawing Boards Cayua Sheet Fastener.	Presses, Fan Blowers, Lathes, Planers, Artesian Wells, Chain and Force Pumps, Pipe, Heating Appa- ratus for Houses, etc. 42 10* PATENT ALARM WHISTLE. —Indicators for speaking pipes, for the use of hotels. steamships, factories, store-houses, private dwellings, etc. etc. This instrument is intended to supersede the use of the bell, being more simple in itsarrangement, more effective in its operation, and much less liable to get out of order, being directly connected with the speak- ing pipe, it requires no lengthy wires in its use, which are continually getting out of order or break- ing. There have been several hundreds of them fit- ted up in this city and vicinity with the greatest suc- cess. They can be attached to pipes, which are al- ready fitted up without damage to buildings, and for much less than the cost of a bell, and warranted to operate. The public are invited to call and examine them at the factory of the patentees. 57 Ann street, New York	Iron Works, have constantly on hand Saw Mill and Grist Mill Irons, Press Screws, Bogardus' Horse Powers, and will take orders of Machinery of any kind, of iron and brass; Portable Saw-mills and SteamEngines, Saw, Gummers of approved and cheas kind, &c. Gearing, Shafting, large and small, cas or of wrought iron. 11 ly NEW HAVEN MANUFACTURING COM pany, Tool Builders, New Haven, Conn., (suc cessors to Scranton & Parshley) have now on han \$25,000 worth of Machinis's Tools, consisting o power planers, to plane from 5 to 12 feet; slide lathe, from 6 to 18 feet long; 3 size hand lathes, with o without shears; counter shafts, to fit all sizes suc
