Persons having remitted money to this office will please to examine the above list to see that their initials appear in it, and if they have not received an acknowledgement by mail, and their initials are not to be found in this list, they will please notify us immediately, and inform us the amount, and how it was sent, whether by mail or express.

Specifications and drawings and models belonging to parties with the following initials have been forwarded to the Patent Office, from Wednesday, Dec. 9, to Wednesday, Dec. 16, 1863:—
H. & B., of N. J. (3 cases); S. A. S., of N. Y.; S. S., of N. J.; I. E. P., of Conn.; G. P. G., of N. Y.; A. G., of N. Y.; G. L. P., of

N. Y.; J. & D., of N. Y.; T. C., of N. Y.; M. & G., of N. J.; F. H. C. M., of N. Y.; C. & D., of Conn.; W. M., of Ill.; E. P., of Mass.; G. T., of Mich.; W. K., of N. Y.; T. W. W., of Ill.; W. D. McG., of Pa.; L. W. F., of Ind.; B. L., of N. H.; C. A., of N. Y.; F. A. De M., of N. Y.; J. J. De B., of N. Y.; O. D. D., of Mich.; L. B. S., of Conn.; H. B. H., of Ill.

A. B. Jr., of N. Y.—Gas cannot be made from kerosene oil by driving a current of cold air through it. Who informed you that 1,000 cubic feet of gas could be made from a gallon of this oil? About 10 cubic feet only are obtained from a gallon. You will find an apparatus for distilling it, with much useful information on the subject, illustrated and described on page 324 (new series) of the SCIENTIFIC AMERICAN.

E. C. M., of Pa.—We do not know where you can obtain a steam engine of the class to which you refer. We advise you to get a good small horizontal engine in preference. It will give you more satisfaction in operating your crusher.

J. E. McE., of N. Y.—Employers have no more right to use an invention patented by an employee, even if made while working for them, than a stranger.
