

CONSTRUCTIONAL STEEL WORK: BEING NOTES ON THE PRACTICAL ASPECT AND THE PRINCIPLES OF DESIGN. By A. W. Farnsworth. London: Charles Griffin & Co., Ltd., 1905. 8vo.; pp. 248. Price, \$3.50.

The employment of mild steel work is rather an innovation in Great Britain, but its use is increasing to such an extent that we are not at all surprised to see English works on the subject. The present volume also deals with an account of the methods and tools of manufacture.

The Latest Word In Sanitation

The name Sy-Clo on a closet means health insurance for your home or any building in which the closet is placed; it means freedom from all those diseases which are usually traceable to noxious odors and poisonous gases arising from ordinary closets.

Sy-Clo stands for more than mere flushing; it stands for a wonderful syphonic action of great power—an action which literally pulls the contents of the bowl into the drain, cleansing the non-reachable parts, instantly sealing the outlet channel with a water trap to an unusual depth, and absolutely preventing all danger of gas.

The Sy-Clo Closet stands for an interior cleanliness and purity impossible in an iron closet, and unknown in any closet but one made of china—like the Sy-Clo. Hand-moulded of china all into one solid piece like a vase, the Sy-Clo is without crack, joint or rough surface to collect dirt or disease germs. It is as clean inside and out as a china pitcher, being made exactly the same way and of the same material.

The surface of the Sy-Clo Closet cannot chip off, is not affected by acid, water or wear, and hence cannot rust or discolor as an iron closet does. The Sy-Clo is strong, simple, durable; it cannot get out of order and will last, with ordinary care, as long as the house in which it is placed.

It costs but little more than the common closet, and when health and comfort are considered, it really costs less; in fact, *your doctor pays the bill*. Your plumber will tell you that Sy-Clo is absolutely the latest word in perfect sanitation.

Valuable Books JUST PUBLISHED Scientific American Reference Book

12mo. 516 Pages. Illustrated. 6 Colored Plates. Price \$1.50, postpaid

The result of the queries of three generations of readers and correspondents is crystallized in this book, which has been in course of preparation for months. It is indispensable to every library and business man. It deals with matters of interest to everybody. The book contains 50,000 facts, and is much more complete and more exhaustive than anything of the kind which has ever been attempted. The "Scientific American Reference Book" has been compiled after gauging the known wants of thousands. It has been revised by eminent statisticians. Information has been drawn from over one ton of Government reports alone. It is a book of everyday reference—more useful than an encyclopedia, because you will find what you want in an instant in a more condensed form. Sixty years of experience alone have made it possible for the publishers of the SCIENTIFIC AMERICAN to present to the purchasers of this book a remarkable aggregation of information.

Home Mechanics for Amateurs

This book has achieved an unparalleled success in one week, and a Special Edition of 4,000 copies has been ordered. It will prove of value to you much more than you realize. Do things with your hands. Send for a circular giving contents—the circulars cost only a cent—the book \$1.50 postpaid. If the book could meet you face to face you would be the first to purchase. The first large edition is almost gone, order to-day.

HOME MECHANICS FOR AMATEURS
By GEORGE M. HOPKINS
Revised and Greatly Enlarged. 2 Octavo Volumes. 1,100 Pages. 900 Illustrations. Cloth Bound, Postpaid, \$5.00. Half Morocco, Postpaid, \$7.00.

EXPERIMENTAL SCIENCE is so well known to many of our readers that it is hardly necessary now to give a description of this work. Mr. Hopkins decided some months ago that it would be necessary to prepare a new edition of this work in order that the many wonderful discoveries of modern times might be fully described in his pages. Since the last edition was published, wonderful developments in wireless telegraphy, for example, have been made. It was necessary, therefore, that a good deal of new matter should be added to the work in order to make it thoroughly up-to-date, and with this object in view some 200 pages have been added. On account of the increased size of the work, it has been necessary to divide it into two volumes, handsomely bound in buckram.

MAGIC Stage Illusions and Scientific Diversions, including Trick Photography.

This work appeals to old and young alike, and it is one of the most attractive holiday books of the year. The illusions are illustrated by the highest class of engravings, and the exposures of the tricks are, in many cases, furnished by the prestidigitators themselves. Conjuring, large stage illusions, fire-eating, sword-swallowing, ventriloquism, mental magic, automata, curious toys, stage effects, photographs of tricks, and the projection of moving motion pictures are all well described and illustrated, making a handsome volume. It is tastefully printed and bound. Acknowledged by the profession to be the Standard Work on Magic.
